### Mission Statement, Goals, Focus Areas

#### MISSION STATEMENT

The Public School Retirement System of Missouri and the Public Education Employee Retirement System of Missouri (PSRS and PEERS) work in partnership with the member school districts of this state to provide eligible employees and their beneficiaries with a significant source of income based on the employee's length of service and compensation in order to enhance retirement, disability and death benefits received from other sources.

### GOAL

To provide retirement security to Missouri's educators and education employees after a full career of service.

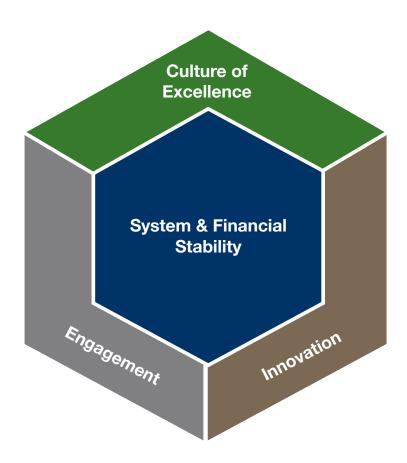

#### **GOAL**

To help school districts attract and retain the best and brightest educators and employees for Missouri's school children.

### **GOAL**

To manage the Systems in a prudent and cost-efficient manner while continuing to provide exceptional service to our members.

#### **FOCUS AREAS**

### **Board of Trustees**

As of June 30, 2019

The PSRS/PEERS Board of Trustees is charged by law with the administration of PSRS/PEERS. Trustees are committed to providing services to the members and beneficiaries professionally, promptly, courteously and efficiently. The Board meets regularly six times a year, with special meetings called as necessary.

It is the fiduciary responsibility of those charged with the administration of PSRS and PEERS to:

- Effectively collect contributions,
- Prudently invest the assets to obtain optimum returns,
- Equitably provide benefits,
- Impartially and in accordance with applicable law administer the benefit programs, and
- Set contribution rates that are adequate to fund promised benefits.

The seven-member Board consists of three elected PSRS active members; one elected PEERS active member; and three governor-appointed trustees, one of whom must be a PSRS or PEERS retiree. Trustees serve four-year terms and serve without compensation.

### Transmittal Letter

PUBLIC SCHOOL & EDUCATION EMPLOYEE RETIREMENT SYSTEMS OF MISSOURI

December 2, 2019

To the Board of Trustees and Members of the Retirement Systems:

We are pleased to present the *Comprehensive Annual Financial Report* (*CAFR*) of the Public School Retirement System of Missouri (PSRS) and the Public Education Employee Retirement System of Missouri (PEERS) for the fiscal year ended June 30, 2019. The PSRS/PEERS' Board of Trustees and staff understand Missouri's educators and education employees work tirelessly to provide the best possible learning opportunities for their students. *While our members and participating employers provide a path to future success through education, PSRS/PEERS provides retirement opportunities.* We work to ensure all members have access to the best possible financial future by providing lifetime retirement benefits and financial security in retirement. The collaboration between PSRS/PEERS, our participating employers, and members has a positive impact on many lives, now and into the future. The financial strength and stability of the Systems combined with a strong governance structure continue to provide financial security to all members.

In addition to providing information to our Board of Trustees and members concerning the financial condition of the Systems, this report also meets our reporting requirements under Sections 169.020. (4).16 and 169.450(4).11 of the Revised Statues of Missouri (RSMo). Printed copies are available to the public upon request and the complete report is also posted on our website, **www.psrs-peers.org**.

This letter provides a brief overview of the contents of the CAFR. We encourage you to read the Management's Discussion and Analysis on pages 17 to 22 for a more detailed analysis of our financial position for the fiscal year.

### Report Contents and Structure

Responsibility for the preparation, accuracy and completeness of this report, including all disclosures, rests with the management staff of PSRS/PEERS (the Systems). The Systems' financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP) within the guidelines established by the Governmental Accounting Standards Board (GASB). To the best of our knowledge, the enclosed data is accurate in all material respects and fairly presents our financial position and operating results.

The management of the Systems is responsible for internal accounting controls, which are designed to provide reasonable but not absolute assurance that the financial statements are free of any material misstatements and assets are safeguarded. The cost of internal controls should not exceed the benefits to be derived. The Systems employ two internal auditors who perform operational reviews to ensure that the internal controls are functioning effectively. We believe the internal controls in place are adequate to meet the purpose for which they were intended.

Location 3210 W. Truman Blvd. / Jefferson City, M0 65109 Mail P.O. Box 268 / Jefferson City, M0 65102 Website www.psrs-peers.org

Phone (573) 634-5290 Toll Free (800) 392-6848 FAX (573) 634-7934 Email psrspeers@psrspeers.org

Our independent external auditors, selected by the Board of Trustees, have conducted an audit of the basic financial statements in accordance with U.S. generally accepted auditing standards. This audit and the financial statements and related footnotes are presented on pages 15 to 56 of this report.

### Overview of the Retirement Systems

The Public School Retirement System of Missouri (PSRS), a cost-sharing multiple employer retirement system, was established in 1946 by the Missouri legislature to provide certificated public school employees and their families with a significant and stable source of retirement income, disability and survivor benefits. The majority of PSRS members do not contribute to Social Security.

The Non-Teacher School Employee Retirement System of Missouri (NTRS), also a cost-sharing multiple employer retirement system, was established in 1965 by the Missouri legislature to build a plan similar to PSRS, but for non-certificated public school personnel. The name of the non-teacher system was changed to the Public Education Employee Retirement System of Missouri (PEERS) in August 2005 to more positively represent the members of the System. Members of PEERS contribute to Social Security.

PSRS and PEERS are governed jointly by a seven-member Board of Trustees, composed of three elected PSRS members, one elected PEERS member and three members appointed by the governor.

Unlike most public pension systems, the members of PSRS and PEERS share equally in funding the contributions to the Retirement Systems. The contribution rates in total approximate the contribution rates of similar public plans. However, this funding mechanism has kept the employer contributions lower and the employee contributions higher than many similar public plans.

The combined Systems serve approximately 278,000 total members in 534 districts and other employers. As of June 30, 2019, over 94,000 individuals received retirement benefits from the Systems. Total annual benefits paid were nearly \$3.0 billion for the year ended June 30, 2019. At June 30, 2019, PSRS/PEERS had a market value of net assets of approximately \$45.6 billion, making it larger than all other public retirement systems in the state of Missouri combined.

### Funding Status and Valuation Results

The Board of Trustees evaluates a large amount of information each year including, but not limited to, the annual actuarial valuations prepared by the Systems' external actuaries, PricewaterhouseCoopers, LLP. Annually, the Board of Trustees reviews the sensitivities to changes in cost-of-living adjustment (COLA) assumptions and investment returns. Missouri law requires the Systems to perform an actuarial audit at least every ten years. Due to the significance of the work by the Systems' external actuaries and the fact their work is highly technical and complex, the Board of Trustees approved conducting an actuarial audit every five years. During the current fiscal year, Cavanaugh MacDonald Consulting, LLC performed an actuarial audit of the June 30, 2018 actuarial valuations and the most recent experience study prepared by PricewaterhouseCoopers, LLP. Cavanagh MacDonald Consulting, LLC concluded that the actuarial methods, assumptions, processes, and reports are consistent with the applicable Actuarial Standards of Practice and their understanding of GASB Statement No. 67. They did note a few opportunities for improvement, but none that would have a material impact on the actuarial valuation results. They specifically indicated there was no urgency for change.

Based on the results of the actuarial valuations, actuarial audit and sensitivity analysis, the Board of Trustees did not make any amendments to the Systems' Actuarial Funding Policies during the current year. The Funding Policies are reviewed based on two critical elements that are at the forefront of all System decisions: the Board of Trustees' fiduciary responsibility and their funding goals.

### Transmittal Letter, continued

Fiduciary responsibility includes the duties of loyalty and impartiality. The duty of loyalty requires the operation of the Systems for the exclusive benefit of the members and retirees of those Systems, and must supersede the interests of all other parties. The duty of impartiality requires that the Board not favor any one type of plan participant over another (e.g. active, inactive, retired members). The Board has a fiduciary duty to: 1. Effectively collect contributions, 2. Prudently invest the assets to obtain optimum returns, 3. Equitably provide benefits, 4. Impartially and in accordance with applicable law, administer the benefit program, and 5. Set contribution rates that are adequate to fund promised benefits.

The Board of Trustees funding goals are: 1. Provide for the security and financial stability of the Systems, including maintaining at least an 80% pre-funded ratio, continuing to amortize the unfunded liability until PSRS/PEERS is 100% pre-funded, and allowing for a reasonable assumed rate of return given capital market estimates, 2. Maintain the contribution rates of both Systems at or below current levels, and 3. Provide a consistent COLA for PSRS/PEERS benefit recipients to maintain their purchasing power, noting COLAs should be dependable and affordable without harming the financial stability of the Systems. The Board of Trustees funding goals are in direct alignment with the Systems mission, goals and strategic plan.

The Systems' funding objective continues to be to achieve a funded ratio of 100% over a closed 30-year period. For this purpose, funded ratio is defined as the actuarial value of assets divided by the actuarial accrued liability determined under the entry age normal cost method and the actuarial assumptions adopted by the Board of Trustees. As of June 30, 2019, PSRS was 84.4% pre-funded, while PEERS was 86.4% pre-funded. Both Systems showed a slight increase in funding from the June 30, 2018 funded percentage of 84.0% for PSRS and 86.1% for PEERS. Additional information on actuarial assumptions and funding can be found in the Actuarial Section of this report. Based upon the June 30, 2019 valuations and overall financial projections, the Board of Trustees set the fiscal year 2021 contribution rates at the fiscal year 2020 level for both members and employers.

### **Investment Activities**

The Systems' assets increased through investment earnings by \$2.9 billion from the previous year with a total fund performance of 7.0% (6.9% net of all investment expenses and fees). The total plan return, net of all investment expenses and fees, was slightly under both the policy benchmark return of 7.3% and the long-term investment goal (actuarially assumed return) of 7.5%. The Systems are long-term investors with a diversified portfolio that continues to produce strong long-term returns where the annualized investment return is 8.3% (8.1% net of all investment expenses and fees) over the last 30 years.

Additional detailed information regarding the Systems' investments, including policies and strategies, can be found in the Investment Section of this report.

### Legislative Changes During Fiscal Year 2019

Governor Michael L. Parson signed legislation (House Bill 77 and CCS Senate Bill 17) impacting the Systems that became effective August 28, 2019. These bills modified the statutory provision regarding PSRS retirees working after retirement for community colleges and allows a retired member of the Systems who has elected a reduced retirement allowance to provide for survivor benefits for his or her spouse to have the retirement allowance increased to the single life annuity amount, with no survivor

benefits, if the member became divorced prior to September 1, 2017 and meets certain criteria as established by the bill. Additional information on this legislation and plan provisions is available on our website, **www.psrs-peers.org**.

### **Awards**

Public Pension Coordinating Council (PPCC), Public Pension Standards Award

PSRS and PEERS each received the Public Pension Standards Awards in 2019 in recognition of meeting professional standards for plan administration and plan funding as set forth in the Public Pension Standards of the PPCC. These awards are presented by the PPCC, a confederation of the National Association of State Retirement Administrators (NASRA), the National Conference on Public Employee Retirement Systems (NCPERS), and the National Council on Teacher Retirement (NCTR).

### Certificate of Achievement for Excellence in Financial Reporting

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to PSRS and PEERS for the *Comprehensive Annual Financial Report* for the fiscal year ended June 30, 2018. The Certificate of Achievement is a prestigious national award recognizing excellence in the preparation of state and local government financial reports. To be awarded the Certificate of Achievement, a government unit must publish an easily readable and efficiently organized CAFR whose contents meet or exceed program standards. This report must satisfy both U.S. generally accepted accounting principles, applicable legal requirements and GFOA standards. A Certificate of Achievement is valid for only one year. We believe our current report continues to meet the Certificate of Achievement program requirements and are submitting it to GFOA for consideration again this year.

### **Professional Services**

Certain professional services are provided to the Systems by retained consultants. The required opinion letters from two of those consultants, PricewaterhouseCoopers, LLC, actuaries, and Williams Keepers LLC, independent certified public accountants, are contained elsewhere in this report.

General investment consulting services have been provided by Verus Advisory, Inc.

### Acknowledgements

We would like to express our thanks and gratitude to the Board of Trustees, staff, and consultants who have worked diligently to produce this report and to ensure the successful operation of the Systems.

Respectfully submitted,

M. Steve Yoakum

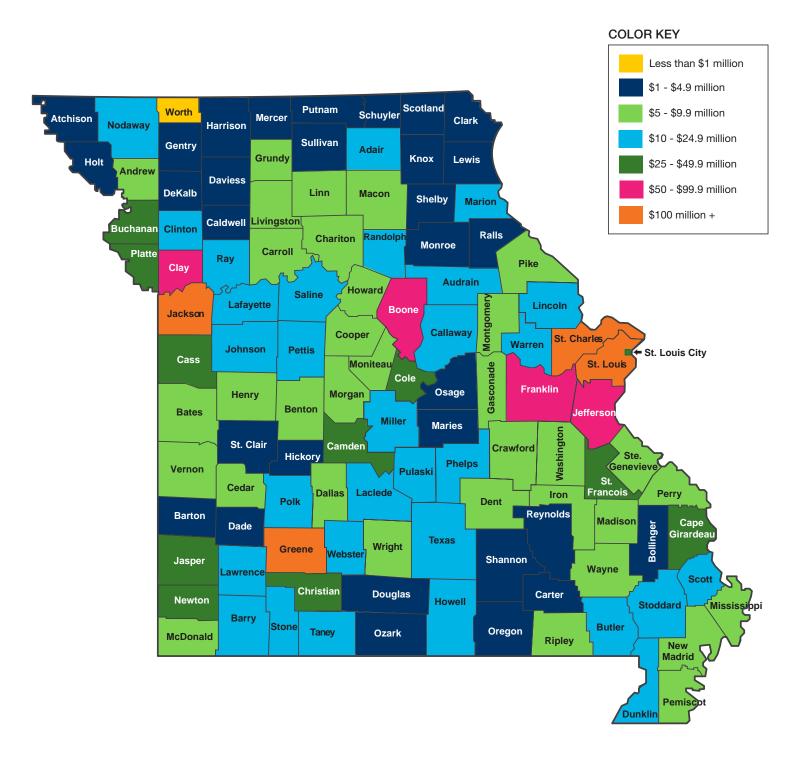

Executive Director

Anita Brand, CPA Chief Financial Officer

### **Economic Impact**

The benefits distributed by PSRS/PEERS make a sizable contribution to Missouri's economy and help Missouri public schools attract and retain quality teachers and education employees.

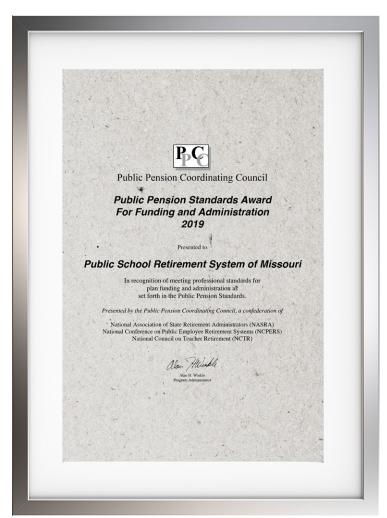

As of June 30, 2019, over 94,000 individuals received benefits from PSRS/PEERS. Total benefits paid for the one-year period ending June 30, 2019 were nearly \$3 billion. Of this amount, more than \$2.6 billion, or 89%, was distributed among Missouri's 114 counties, positively impacting the state's economy.

The Board of Trustees of the Public School and Public Education Employee Retirement Systems of Missouri

We have audited the accompanying financial statements of the Public School and Public Education Employee Retirement Systems of Missouri (the Systems), which comprise the statements of fiduciary net position as of June 30, 2019, the related statements of changes in fiduciary net position for the year then ended, and the related notes to the financial statements.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with U.S. generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the Public School and Public Education Employee Retirement Systems of Missouri as of June 30, 2019, and the respective changes in fiduciary net position for the year then ended, in conformity with U.S. generally accepted accounting principles.

American Institute of Certified Public Accountants | Missouri Society of Certified Public Accountants | Member, Allinial Global

### Independent Auditors' Report, continued

#### Other Matters

### Prior Year Information

The prior year combined total information has been derived from the Systems' 2018 financial statements and, in our report dated November 30, 2018, we expressed unmodified opinions on the respective financial statements of the Systems' fiduciary net position.

### Required Supplementary Information

U.S. generally accepted accounting principles require that the management's discussion and analysis on pages 17-22, schedules related to the defined benefit plans (schedules of changes in the employers' net pension liability, employer contributions, investment returns, and notes to schedules) on pages 48-53, and schedules related to the defined benefit OPEB plan (schedule of changes in the net OPEB liability and related ratios) on page 54 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context.

We have applied certain limited procedures to the required supplementary information in accordance with U.S. generally accepted auditing standards, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audits of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Public School and Public Education Employee Retirement Systems of Missouri basic financial statements. The introductory, investment, actuarial and statistical sections and the additional information presented on pages 55 and 56 are presented for purposes of additional analysis and are not a required part of the financial statements.

The additional information presented on pages 55 and 56 is the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with U.S. generally accepted auditing standards. In our opinion, the additional information presented on pages 55 and 56 is fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory, investment, actuarial and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

November 26, 2019

Williams - Keepers LLC

# Management's Discussion and Analysis

### Introduction

This discussion and analysis of the financial position of the Public School Retirement System of Missouri (PSRS) and the Public Education Employee Retirement System of Missouri (PEERS), collectively referred to as the Systems, provides an overview of the Systems' financial activities for the fiscal year ended June 30, 2019. We encourage you to consider the information presented here in conjunction with the *Transmittal Letter* included in the *Introductory Section* and the financial statements and other information presented in the *Financial Section* of this *Comprehensive Annual Financial Report* (CAFR).

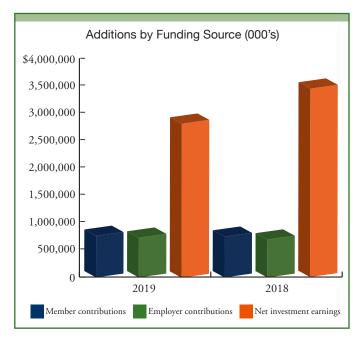

### Financial Highlights

The following highlights are explained in more detail for each System later in this discussion.

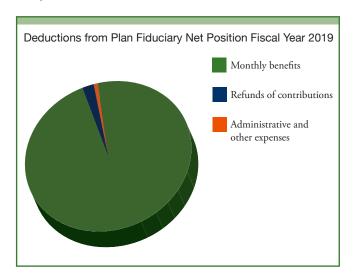

- The Board of Trustees adopts actuarial assumptions, each of which individually represents a reasonable long-term estimate of anticipated experience for the Systems, derived from experience studies conducted every fifth year. The most recent comprehensive experience study was completed in June 2016. All economic and demographic assumptions were reviewed and updated, where appropriate, based on the results of the study and effective with the June 30, 2016 valuations. For the June 30, 2017 valuations, the investment rate of return was reduced from 7.75% to 7.6% and the assumption for annual cost-of-living adjustments was updated in accordance with the funding policies amended by the Board of Trustees at their November 3, 2017 meeting. The Board of Trustees further reduced the investment rate of return to 7.5% at their October 29, 2018 meeting. The actuarial assumed rate of return of 7.5% was effective with the June 30, 2018 valuations and fiscal year 2019 investment performance. No additional assumption changes have occurred. The significant actuarial assumptions are detailed in the notes to the financial statements and the notes to the schedules of required supplementary information.
- As of June 30, 2019, PSRS' fiduciary net position as a percentage of the total pension liability increased to 84.6% from 84.1% for the prior year. PSRS' net pension liability approximated \$7.4 billion as of June 30, 2019. As of June 30, 2019, PEERS' fiduciary net position as a percentage of the total

- pension liability increased to 86.4% from 86.1% for the prior year. PEERS' net pension liability approximated \$791.0 million as of June 30, 2019. The net pension liability is calculated utilizing the market value of assets in accordance with Governmental Accounting Standards Board (GASB) Statement No. 67, Financial Reporting for Pension Plans, for accounting presentation purposes.
- The pre-funded status of the Systems is measured as the ratio of assets available for benefits to a benefit liability measure for the Systems. While there are several such measures that could be appropriately used, the benefit liability measure that ties most closely to the Systems' funding policies is the actuarial accrued liability (AAL) computed in accordance with assumptions and methods approved by the Board of Trustees. The pre-funded ratio uses the actuarial value of assets (AVA), a smoothed asset value that recognizes 20% of the total investment gain or loss on the AVA for each of the preceding five years. This is the significant difference between accounting measurements in accordance with GASB Statement No. 67 and funding calculations. As of June 30, 2019, the pre-funded ratios for funding purposes were 84.4% for PSRS and 86.4% for PEERS.
- The Systems' assets increased through investment earnings by \$2.9 billion from the previous year with a total fund performance of 7.0% (6.9% net of all investment expenses and fees). The total plan return, net of all investment expenses and fees, was slightly under both the policy benchmark return of 7.3% and the long-term investment goal (actuarially assumed return) of 7.5%. Over long periods of time, the Systems continue to produce investment returns that meet or exceed the Systems' objective. The annualized investment return for PSRS and PEERS is 8.3% (8.1% net of all investment expenses and fees) over the last 30 years.
- The Systems' investment returns for the last five years have exceeded 70% of the peer group as defined by the Wilshire TUCS universe of public pension plans with assets in excess of \$1 billion. Additionally, the Systems generated the returns (and longer-term investment returns) while taking less risk than approximately three-fourths of comparable public funds in the United States.
- Cost-sharing, defined-benefit, retirement systems such as the Systems have a long-term perspective on financial activities. The Systems' primary responsibility is to assure that sufficient funds will be available to provide retirement, disability and survivor benefits to current and future members.

- Condensed Statements of Fiduciary Net Position and Statements of Changes in Fiduciary Net Position are provided for each System on the following pages.
- Pension benefits are funded through a combination of member and employer contributions and investment income. The following chart depicts the combined amount of funding received by the Systems from each source for the years ended June 30, 2019 and 2018.

• Expenses are incurred for the sole purpose for which the Systems were created: the payment of benefits to the Systems' membership and their beneficiaries. Included in the deductions from fiduciary net position were monthly benefit payments, refunds of contributions due to member terminations or deaths and administrative and other expenses. The pie chart below depicts the combined Systems deductions from Plan Fiduciary Net Position for the year ended June 30, 2019.

- The net position of the combined Systems increased by \$1.6 billion. The net position of PSRS increased by \$1.3 billion while the net position of PEERS increased by \$248.8 million.
- Total revenues for fiscal year 2019 were comprised of contribution revenue of \$1.71 billion and investment gains of \$2.9 billion, compared to contribution revenue of \$1.66 billion and investment gains of \$3.6 billion for fiscal year 2018.
- Expenses increased 4.3% over the prior year from \$2.9 billion to \$3.0 billion. Retirement benefits and member refunds increased by \$125.9 million from the prior year, while administrative expenses increased by \$0.6 million during the same time period. The increase in administrative expenditures is directly related to the implementation of a new financial and human resource system, which is partially offset by a reduction in annual OPEB expenses. The Systems implemented GASB Statement No. 75, Financial Reporting for Post-Employment Benefit Plans other than Pension Plans, during fiscal year 2018.

### Overview of the Financial Statements

The CAFR reflects the activities of the Systems as reported in Statements of Fiduciary Net Position and the Statements of Changes in Fiduciary Net Position (the Systems' financial statements). The Systems' financial statements, notes to the financial statements, and required supplementary information were prepared in conformity with GASB Statement No. 67, Financial Reporting for Pension Plans, as amended. This discussion and analysis is intended to serve as an introduction to the financial section of the CAFR. The financial section of the CAFR consists of: the basic financial statements comprised of the Statements of Fiduciary Net Position and the Statements of Changes in Fiduciary Net Position, the notes to the basic financial statements, required supplementary information and other supplementary information.

The Statements of Fiduciary Net Position present information on the assets and liabilities of the Systems, with the difference between the two reported as net position. The net position of the Systems reflects the resources available to pay benefits to members when due. Over time, increases and decreases in net position measure whether the Systems' financial position is improving or deteriorating.

The Statements of Changes in Fiduciary Net Position present information detailing the changes in net position

that occurred during the current fiscal year. All changes in net position are reported on an accrual basis. This means that the revenue or expense is recognized as soon as the underlying event giving rise to the change occurs, regardless of when the actual cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods. For example, contributions due from an employer, even though not yet paid by year end, will be reflected as revenue. Earned vacation accruals will be reflected as an expense, even though they have not been paid to employees.

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in the financial statements. The notes can be found on pages 26 through 47.

The report also contains required supplementary information in addition to the basic financial statements themselves. The required supplementary information consists of the following schedules and related notes:

- The Schedules of Changes in the Employers'
   Net Pension Liability include historical trend
   information about the annual changes of the net
   pension liability, including assumption changes and
   variances of assumed experience.
- The Schedules of Employers' Net Pension Liability include historical trend information about whether each System's net position is increasing or decreasing over time relative to the total pension liability. The schedules provide a long-term, ongoing perspective of the accumulation of assets to pay benefits when due.
- The Schedules of Employer Contributions present historical trend information about the actuarially determined contributions of employers and the actual contributions made by employers.
- The Schedules of Investment Returns present historical annual money-weighted rate of returns.
- The Schedules of Changes in the Net OPEB
   Liability and Related Ratios include historical trend
   information about the defined benefit other post employment benefit (OPEB) plan from a long-term,
   ongoing perspective.
- The Notes to the Schedules of Required Supplementary Information provide additional information that is essential to a full understanding of the data provided in the schedules.

Other supplementary schedules are also included. The Schedules of Administrative Expenses present the overall cost of administering the Systems. The Schedules of Professional Services further detail this category of administrative expense. The Schedules of Investment Expenses show the costs associated with investing the assets of the Systems. These expenses are shown as a reduction of revenue on the Statements of Changes in Fiduciary Net Position.

### Financial Analysis of the Public School Retirement System of Missouri (PSRS)

PSRS is a mandatory cost-sharing multiple employer retirement system for full-time certificated employees and certain part-time employees of participating employers. PSRS members were required to contribute 14.5% of their annual covered salary during fiscal year 2019. The employer was required to match that amount. Most PSRS members do not contribute to Social Security, except for employees hired after 1986 who contribute to Medicare only. In some instances, positions may be determined not to be exempt from Social Security contributions. PSRS members required to contribute to Social Security are required to contribute two-thirds of the approved PSRS contribution rate and their employer is required to match the contribution. The members' benefits are further calculated at twothirds the normal benefit amount.

#### **Assets**

Total assets of PSRS as of June 30, 2019 were \$43.2 billion and were mostly comprised of cash, investments, investment sales receivables and contributions due from employers. Total assets increased by \$1 billion or 2.3% from the prior year due to investment earnings.

### Liabilities

Total liabilities as of June 30, 2019, were \$2.6 billion and were mostly comprised of payables from the purchase of investments and obligations under security lending arrangements. Total liabilities decreased by \$346.7

### **FINANCIAL SECTION**

million from the prior year. This was due to a decrease in investment purchase liabilities, accounts payable and obligations under security lending arrangements.

### **Net Position**

PSRS assets exceeded liabilities at June 30, 2019, by \$40.6 billion. This was an increase of \$1.3 billion from the 2018 net position. This increase was a result of investment earnings that totaled \$2.6 billion for the year offset by benefit payments and other expenses which exceeded contribution revenue by \$1.3 billion.

Deferred inflows and outflows are presented in accordance with GASB Statement No. 75.

### Revenues – Additions to Fiduciary Net Position

The reserves needed to finance retirement benefits are accumulated through the collection of employer and employee contributions and through investment earnings. Total contribution revenue for the year increased by \$36.0 million to \$1.5 billion. This was a 2.5% increase over the prior year. Retirement contributions were calculated at 14.5% of retirement salary for each member during fiscal year 2019. The employer matched this amount. Contribution rates were unchanged from the prior year. In addition to contributions on salary, members may also pay contributions to reinstate previously refunded service or to purchase various types of elective service. Such contributions were approximately \$5.7 million more than the prior year. This along with an increased retirement salary base and the addition of new members resulted in the overall increase in contributions.

The net investment gain was \$2.6 billion as compared to a net investment gain of \$3.2 billion in 2018. The current year gains are reflective of a 6.9% net return on the Systems' diversified investment portfolio, compared to 8.7% in the prior year. All investment related expenses, such as fees paid to investment managers, are reflected as a reduction in revenue and are accounted for in this net figure. The *Investment Section* of this report contains additional information regarding investments and securities lending activity.

### Expenses – Deductions from Fiduciary Net Position

The primary expenses of PSRS include the payment of pension benefits to members and beneficiaries, refunds of contributions to former members, and the cost of administering the System. Total expenses for fiscal year 2019 were \$2.7 billion, an increase of 3.9% over fiscal year 2018.

Benefit expenses increased by \$105.3 million to \$2.66 billion. This was a result of an overall increase of 1,777 monthly benefit recipients from the prior year end. There were no changes to the benefit formula during 2019. Refunds of contributions decreased by \$2.0 million during the current year to a total of \$49.3 million.

Administrative expenses increased by \$0.3 million to \$11.3 million. The increase in administrative expenditures is directly related to the implementation of a new financial and human resource system, which is partially offset by a reduction in annual OPEB expenses. The cost of administrative items was charged 61% to PSRS and 39% to PEERS, unless the expense was determined to be of direct benefit to only one System. In such instance, the allocation of expense was 100% to the benefited System. As always, we will continue to look for ways to streamline costs when prudent.

### Financial Analysis of the Public Education Employee Retirement System of Missouri (PEERS)

PEERS is a mandatory cost-sharing multiple employer retirement system for non-certificated employees and certain part-time certificated employees of participating employers. PEERS members were required to contribute 6.86% of their annual covered salary during 2019. The employer was required to match that amount. PEERS members also contribute to Social Security.

Fiduciary net position	\$ 5,018,524	\$ 4,769,766	\$ 248,758				

### **Assets**

Total assets of PEERS as of June 30, 2019 were \$5.3 billion and were mostly comprised of cash, investments, investment sales receivables and contributions due from employers. Total assets increased by \$213.2 million or 4.2% from the prior year due to investment earnings.

### Liabilities

Total liabilities as of June 30, 2019 were \$329.3 million and were mostly comprised of payables from the purchase of investments and obligations under security lending arrangements. Total liabilities decreased by \$35.6 million. This was due to a decrease in investment purchase liabilities, accounts payable and obligations under security lending arrangements.

### **Net Position**

PEERS assets exceeded liabilities at June 30, 2019 by \$5.0 billion. This was up from the 2018 net position of \$4.8 billion by \$248.8 million. This increase was a result of investment earnings that totaled \$319.8 million for the year offset by benefit payments and other expenses which exceeded contribution revenue by \$71.0 million.

Deferred inflows and outflows are presented in accordance with GASB Statement No. 75.

Public Education Employee Retirement System of Missouri Changes in Fiduciary Net Position (000's)					
	2019	2018	Change		
Additions

Other	9	7	2		
Total deductions	317,666	294,747	22,919		
Change in fiduciary net position	\$ 248,758	\$ 323,348	\$ (74,590)		

### Revenues – Additions to Fiduciary Net Position

The reserves needed to finance retirement benefits are accumulated through the collection of employer and employee contributions and through investment earnings. Total contribution revenue for the year increased by \$10.1 million to \$246.7 million. Retirement contributions were calculated at 6.86% of retirement salary for each member during fiscal year 2019. The employer matched this amount. Contribution rates were unchanged from the prior year. Overall contribution revenue increased by 4.3%. In addition to contributions on salary, members may also pay contributions to reinstate previously refunded service or to purchase various types of elective service. Such contributions were \$1.0 million more than the prior year. The increase in total contributions is attributable to purchases of service, a higher retirement salary base, the addition of new members and an increase in contributions for members working after retirement.

The net investment gain was \$319.8 million as compared to a net investment gain of \$381.5 million in 2018. The current year gains are reflective of a 6.9% net return on the Systems' diversified investment portfolio, as compared to 8.7% in the prior year. All investment related expenses, such as fees paid to investment managers, are reflected as a reduction in revenue and are accounted for in this net figure. The *Investment Section* of this report contains additional information regarding investments and securities lending activity.

### Expenses – Deductions from Fiduciary Net Position

The primary expenses of PEERS include the payment of pension benefits to members and beneficiaries, refunds of contributions to former members, and the cost of administering the System. Total expenses for fiscal year 2019 were \$317.7 million, an increase of 7.8% over fiscal year 2018.

Benefit expenses increased by \$22.2 million to \$291.6 million. This was a result of an overall increase of 1,490 monthly benefit recipients from the prior year end. There were no changes to the benefit formula during 2019. Refunds of contributions increased by \$0.4 million from the prior year.

Administrative expenses increased by \$0.3 million. The increase in administrative expenditures is directly related to the implementation of a new financial and human resource system, which is partially offset by a reduction in annual OPEB expenses. The cost of administrative items was charged 61% to PSRS and 39% to PEERS, unless the expense was determined to be of direct benefit to only one System. In such instance, the allocation of expense was 100% to the benefited System. As always, we will continue to look for ways to streamline costs when prudent.

### Summary

The total net returns of 6.9% for PSRS and PEERS was slightly under both the long-term investment goal of earning 7.5% and the total plan policy benchmark return of 7.3%. Due to the long-term nature of defined benefit pension plans, it is important to look at the financial performance of the Systems over a period of years and not just at this single point in time. Over long periods of time, the Systems continue to produce investment returns that meet or exceed the Systems' objectives. The annualized investment return for the Systems over the last 30 years is 8.1%, net of all fees and expenses.

The actuarial assumed rate of return was 8.0% from 1980 through fiscal year 2016. The Board of Trustees set the actuarial assumed rate of return at 7.75%, effective with the June 30, 2016 actuarial valuations and fiscal year 2017 investment performance measurement. The Board of Trustees considered the current funded status of the Systems, expectations of capital markets and other factors during fiscal year 2017 and 2018. Based on these considerations the Board of Trustees approved reducing the risk profile of the plans by approving a further

reduction of the actuarial assumed rate of return to 7.6% as of June 30, 2017 and 7.5% as of June 30, 2018. The actuarial assumed rate of return of 7.5% was effective with the June 30, 2018 valuations and fiscal year 2019 investment performance. Detailed information regarding the Systems' investment portfolio is included in the *Investment Section* of this report.

The Systems' funding objective is to achieve a funded ratio of 100% over a closed 30-year period. For this purpose, funded ratio is defined as the actuarial value of assets divided by the actuarial accrued liability determined under the entry age normal cost method and the actuarial assumptions adopted by the Board. Detailed information regarding the Systems' actuarial assumptions is included in the *Actuarial Section* of this report.

The economic factor that is of primary significance to the Systems is the investment rate of return earned in global capital markets. Legislative, demographic, and actuarial assumption changes can also have a significant impact on the funded status of the Systems. All of these factors are incorporated into the annual actuarial valuations, which determine the contribution rates at which participating employers must contribute in order to appropriately fund benefits.

The fiscal year 2021 contribution rates remain unchanged from the fiscal year 2020 rates and were approved by the Board of Trustees at their October 28, 2019 meeting. The fiscal year 2021 contribution rate for PSRS remains 29.0%. The fiscal year 2021 contribution rate for PEERS remains 13.72%. The fiscal year 2021 contribution rates are in compliance with the PSRS/PEERS Board of Trustees' Funding Policies and represent the continued stability of contribution rates for employers and members.

The Board of Trustees, management and staff continually strive to improve the financial position of the Systems through a prudent investment program and long-term strategic planning.

### Requests for Information

This financial report is designed to provide the Board of Trustees, our members, and other users of our financial report with a general overview of the Systems' finances and to demonstrate the Systems' accountability for the money it receives. If you have any questions about this report or need additional financial information, contact the Public School and Education Employee Retirement Systems of Missouri (PSRS/PEERS), P.O. Box 268, Jefferson City, MO 65102.

See accompanying Notes to the Financial Statements.

### Notes to the Financial Statements

### Note 1 - Plan Descriptions

The Board of Trustees of the Public School Retirement System of Missouri administers two separate retirement systems, the Public School Retirement System of Missouri (PSRS) and the Public Education Employee Retirement System of Missouri (PEERS). The Board of Trustees consists of seven members, three of whom are elected PSRS active members, one an elected active member of PEERS and three persons appointed by the governor, one of whom must be a retired member of either PSRS or PEERS.

The funds of the two Systems are managed simultaneously. Investments of the Systems are combined in a commingled investment pool as allowed by state statute. Each System owns an equity position in the pool and receives proportionate investment income from the pool in accordance with their respective ownership percentage. Each System's allocated share of each type of investment in the pool is shown on the Statements of Fiduciary Net Position. Investment gains and losses are reported in the Statements of Changes in Fiduciary Net Position. Each System's assets may be used only for the payment of benefits to the members of the separate System in accordance with the statutes governing that System as well as expenses required to administer the System.

### The Public School Retirement System of Missouri (PSRS)

PSRS is a mandatory cost-sharing multiple employer retirement system for all full-time certificated employees and certain part-time certificated employees of all public school districts in Missouri (except the school districts of St. Louis and Kansas City) and all public community colleges. The System also includes certificated employees of PSRS, Missouri State Teachers' Association, Missouri State High School Activities Association, and certain employees of the state of Missouri who elected to remain covered by PSRS under legislation enacted in 1986, 1987 and 1989. The majority of PSRS members are exempt from Social Security contributions. In some instances, positions may be determined not to be exempt from Social Security contributions. Any PSRS member who is required to contribute to Social Security comes under the requirements of Section 169.070 (9) RSMo, known as the "2/3's statute." PSRS members required to contribute to Social Security are required to contribute two-thirds of the approved PSRS contribution rate and their employer is required to match the contribution.

The members' benefits are further calculated at twothirds the normal benefit amount.

PSRS was established as an independent trust fund by the Missouri General Assembly effective August 1, 1945. Statutes governing the System are found in Sections 169.010-169.141 and Sections 169.560-169.595 RSMo. It is a defined benefit plan providing service retirement, death and disability benefits to its members. Members are vested for service retirement benefits after accruing five years of service. Individuals who (a) are at least age 60 and have a minimum of five years of service, (b) have 30 years of service, or (c) qualify for benefits under the "Rule of 80" (service and age total at least 80) are entitled to a monthly benefit for life, which is calculated using a 2.5% benefit factor. Actuarially age-reduced benefits are available for members with five to 24.9 years of service at age 55 or with 25 years of service (if not yet age 55). Members who are younger than age 55 and who do not qualify under the "Rule of 80" but have between 25 and 29.9 years of service may retire with a lesser benefit factor. Members that are three years beyond normal retirement can elect to have their lifetime monthly benefits actuarially reduced in exchange for the right to also receive a one-time partial lump sum (PLSO) payment at retirement equal to 12, 24, or 36 times the Single Life benefit amount. Annual cost-of-living adjustments (COLAs) are provided for eligible service and disability retirees and for surviving beneficiaries receiving payments under optional benefit plans, up to a lifetime maximum of 80% of the original benefit amount.

For a more detailed summary of benefits for the members of PSRS, refer to the *Summary Plan Description* in the *Actuarial Section* of this report.

Contributions – PSRS members were required to contribute 14.5% of their annual covered salary during fiscal year 2019. Employers were required to match the contributions made by employees. The contribution rate is set each year by the PSRS/PEERS Board of Trustees upon the recommendation of the independent actuary within the contribution restrictions set in Section 169.030 RSMo. The annual statutory increase in the total contribution rate may not exceed 1% of pay. Administrative costs are financed through investment earnings. Contributions for employees of the State of Missouri were made by the state in accordance with the actuarially determined contribution rate needed to fund current costs and prior service costs of state employees as authorized in Section 104.342.8 RSMo.

*Members* – The number of PSRS members and benefit recipients served by the System at June 30, 2019:

Retirees and beneficiar	63,072		
Inactive members entit	led to, but not yet rec	ceiving benefits	9,076
Active members:	Vested	60,375	
	Non-vested	18,488	
Total active members	78,863		
Other inactive member	8,999		
Total			160,010

*Employers* – PSRS had 533 contributing employers during fiscal year 2019.

### The Public Education Employee Retirement System of Missouri (PEERS)

PEERS is a mandatory cost-sharing multiple employer retirement system for all public school district employees (except the school districts of St. Louis and Kansas City), employees of the Missouri Association of School Administrators, and public community college employees (except the Community College of St. Louis). Employees of covered districts who work 20 or more hours per week on a regular basis and who are not contributing members of the Public School Retirement System of Missouri (PSRS) must contribute to PEERS. Employees of PSRS who do not hold Missouri educator certificates also contribute to PEERS.

PEERS was established as a trust fund by the Missouri General Assembly effective October 13, 1965. Statutes governing the System are found in Sections 169.600 - 169.715 and Sections 169.560-169.595 RSMo. The statutes place responsibility for the operation of PEERS on the Board of Trustees of the Public School Retirement System of Missouri.

PEERS is a defined benefit plan providing service retirement and disability benefits to its members. Members are vested for service retirement benefits after accruing five years of service. Individuals who (a) are at least age 60 and have a minimum of five years of service, (b) have 30 years of service, or (c) qualify for benefits under the "Rule of 80" (service and age total at least 80) are entitled to a monthly benefit for life, which is calculated using a 1.61% benefit factor. Members qualifying for "Rule of 80" or "30-and-out" are entitled to an additional temporary .8% benefit multiplier until

reaching minimum Social Security age (currently age 62). Actuarially age-reduced retirement benefits are available with five years of service at age 55. Members who are younger than age 55 and who do not qualify under the "Rule of 80" but have between 25 and 29.9 years of service may retire with a lesser benefit factor. Members that are three years beyond normal retirement can elect to have their lifetime monthly benefits actuarially reduced in exchange for the right to also receive a one-time partial lump sum (PLSO) payment at retirement equal to 12, 24, or 36 times the Single Life benefit amount. Annual cost-of-living adjustments (COLAs) up to a lifetime maximum of 80% of the original benefit amount are provided for eligible service and disability retirees and for surviving beneficiaries receiving payments under optional benefit plans.

For a more detailed summary of benefits for the members of PEERS, refer to the *Summary Plan Description* in the *Actuarial Section* of this report.

Contributions – PEERS members were required to contribute 6.86% of their annual covered salary during fiscal year 2019. Employers were required to match the contributions made by their employees. The contribution rate is set each year by the PSRS/PEERS Board of Trustees upon the recommendation of the independent actuary within the contribution restrictions in Section 169.620 RSMo. The annual statutory increase in the total contribution rate may not exceed 0.5% of pay. Administrative costs proportional to its membership size are reimbursed by PEERS to the Public School Retirement System of Missouri (PSRS) and are financed through investment earnings.

*Members* - The number of PEERS members and benefit recipients served by the System at June 30, 2019:

Retirees and beneficiar	31,850		
Inactive members enti	tled to, but not yet rec	ceiving benefits	6,744
Active members:	Vested	26,913	
	Non-vested	22,432	
Total active members	49,345		
Other inactive member	ers and terminated acco	ounts	30,374
Total			118,313

*Employers* – PEERS had 530 contributing employers during fiscal year 2019.

### Note 2 – Summary of Significant Accounting Policies

### **Basis of Accounting**

For financial reporting purposes, the Systems adhere to accounting principles generally accepted in the United States of America. The Systems apply all applicable pronouncements of the Governmental Accounting Standards Board (GASB).

The Systems' financial statements, notes to the financial statements, and required supplementary information were prepared in conformity with GASB Statement No. 67, Financial Reporting for Pension Plans, as amended. GASB Statement No. 67 addresses accounting and financial reporting requirements for pension plans. Significant requirements include an actuarial calculation of total and net pension liability. It also includes comprehensive footnote disclosures regarding the pension liability, the sensitivity of the net pension liability to the discount rate and extensive investment activity disclosures. The total pension liability, determined in accordance with GASB Statement No. 67 is presented in Note 5 - Net Pension Liability of Employers.

The financial statements of both Systems were prepared using the accrual basis of accounting. For both Systems, member and employer contributions are recognized when due, pursuant to formal commitments and statutory requirements. Benefits and refunds are recognized when due and payable in accordance with the statutes governing the Systems. Expenses are recognized when the liability is incurred, regardless of when payment is made. Administrative expenses are funded through investment earnings.

#### Cash

Cash includes cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

#### Receivables

Receivables consist primarily of contributions owed and yet to be remitted by employers, pending investment trades and interest and dividends payable to the Systems as of the end of each fiscal year.

### Method Used to Value Investments

Investments are reported at fair value. The fair value of investments is based on published market prices and quotations from major investment brokers at current

exchange rates, as available. Many factors are considered in arriving at fair value. Fixed income securities not traded on a national or international exchange are based on equivalent values of comparable securities with similar yield and risk. The value of private equity, private credit and real estate investments that do not have an established market is determined based upon the most current net asset values and activities through year end. When values are not readily available, alternative investments are valued based on a good faith determination by the General Partner.

GASB Statement No. 72 addresses accounting and reporting issues related to fair value measurements. The Statement requires disclosures to be made about fair value measurements, the level of fair value hierarchy, and valuation techniques. Comprehensive footnote disclosure regarding this Statement is presented in Note 4 - Deposits, Investments and Securities Lending Program.

### Capital Assets

The building and other capital assets are owned by PSRS and are stated at cost less depreciation accumulated since acquisition. The stated value does not purport to represent replacement or realized value. Costs of major additions and improvements are capitalized. Expenditures for maintenance and repairs are charged to operations as incurred. Depreciation is calculated using the straight-line method, with estimated lives ranging from three to 40 years in the following major classes: computers and software, three years; vehicles, five years; equipment, five years; building and land improvements, 15 years; pension administration system, 20 years; building, 40 years.

PSRS allocates depreciation expense to PEERS for the use of capital assets.

#### **Estimates**

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of net position restricted for pension benefits at June 30, 2019. Actual results could differ from those estimates.

### **Total Columns**

The financial statements include total column information for the prior year. Such information does not include sufficient detail to constitute a presentation in conformity with U.S. generally accepted accounting principles. Accordingly, such information should be read

in conjunction with both Systems' financial statements for the year ended June 30, 2018, from which the information was derived. Certain reclassifications have been made to the 2018 totals to conform with the classifications for 2019.

### Note 3 - Designations of Net Position - Restricted for Pensions

The Systems designate the net position – restricted for pensions for the following specific purposes:

Public School Retirement System of Missouri

	2019
Designated for Members' Contributions (Member Reserves) – Accumulation of active and terminated member contributions plus interest.	\$ 8,355,003,509
Designated for the Payment of Benefits to Present Retirees – Transfers from Member Reserves at retirement and an actuarially determined transfer from Operating Reserves to fund the System's obligation for benefit payments and cost-of-living adjustments to current retirees and beneficiary recipients.	29,429,992,827
Designated for Operating Expenses/Benefits to Future Retirees (Operating Reserves) – Accumulation of employer contributions and investment income used to fund future benefit payments, interest on member accounts and, administration and maintenance expenses of the System.	2,808,762,529
Net Position – Restricted For Pensions	\$ 40,593,758,865

### Public Education Employee Retirement System of Missouri

	2019
<b>Designated for Members' Contributions (Member Reserves)</b> – Accumulation of active and terminated member contributions plus interest.	\$ 1,092,643,691
Designated for the Payment of Benefits to Present Retirees – Transfers from Member Reserves at retirement and an actuarially determined transfer from Operating Reserves to fund the System's obligation for benefit payments and cost-of-living adjustments to current retirees and beneficiary recipients.	2,861,160,127
Designated for Operating Expenses/Benefits to Future Retirees (Operating Reserves) – Accumulation of employer contributions and investment income used to fund future benefit payments, interest on member accounts and, administration and maintenance expenses of the System.	1,064,719,797
Net Position – Restricted For Pensions	\$ 5,018,523,615

### Note 4 – Deposits, Investments and Securities Lending Program

### Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the Systems will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the Systems would not be able to recover the value of investment or collateral securities that are in the possession of an outside party. To mitigate custodial credit risk, the Systems require that all deposits be 100% collateralized with securities held in the Systems' name and held by a third party agent.

### **Deposits**

Cash balances include short-term securities held by the custodial bank in a pooled short-term investment fund and operating balances held by the depository banks.

At June 30, 2019, the PSRS carrying amount of deposits at the depository bank was \$4,647,411 and the bank balance was \$2,781,533. Of the bank balance, \$250,000 was covered by federal depository insurance. In addition, the deposits were collateralized with U.S. agency securities held by a third-party institution in the System's name, totaling \$2,962,083. An additional \$8,206,122 was held in overnight repurchase agreements with a book value of \$8,206,122. The overnight repurchase agreements were collateralized with U.S. agency securities held by a third-party institution in the System's name totaling \$8,206,122.

At June 30, 2019, the PEERS carrying amount of deposits at the depository bank was \$784,796 and the bank balance was \$204,758. Of the bank balance, \$204,758 was covered by federal depository insurance. In addition, the deposits were collateralized with U.S. agency securities held by a third-party institution in the System's name, totaling \$3,864,653. An additional \$633,960 was held in overnight repurchase agreements with a book value of \$633,960. The overnight repurchase agreements were collateralized with U.S. agency securities held by a third-party institution in the System's name totaling \$633,960.

Investment Policy and Asset Allocation Funds for both Systems that are in excess of a safe operating balance are invested under policies and procedures established by the Board of Trustees. Chapter 169.040 RSMo as amended effective August 13, 1984, authorizes any investment which a prudent person acting in a like capacity and familiar with similar matters would use in the conduct of an enterprise of a like character and with like aims. Any person with fiduciary responsibility with respect to the Systems is covered by this "prudent person" rule.

The Board of Trustees of PSRS and PEERS approved the commingling of assets for purposes of investment as allowed by state statute. In order to implement this change, PSRS and PEERS adopted the Missouri Education Pension Trust Agreement. The Missouri Education Pension Trust (MEPT) is managed by the PSRS and PEERS Board of Trustees and Investment Staff. Effective July 1, 2013, the invested assets of the Systems were pooled and invested in MEPT. All assets held by MEPT are for the exclusive benefit of PSRS and PEERS. Each of the Systems has equity in MEPT based on funds contributed and earnings allocated. Earnings of MEPT are allocated based on the average daily balances of each of the respective Systems. Individual investments in MEPT are not specifically identified to the respective Systems. For financial statement presentation, MEPT assets, liabilities, revenues, and expenses have been allocated to and presented in each respective system in the basic financial statements as required by investment pools. Due to the fact all invested assets are invested in MEPT, the rate of return for each of the Systems is approximately the same.

The Systems' policy in regard to the allocation of invested assets is established and may be amended by the Board of Trustees. System assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided by the Systems. The Board of Trustees amended the long term asset allocation at their June 2016 Trustees' meeting. The long-term target for Public Credit was decreased from 12.0% to 7.0%, which resulted in Public Risk Assets decreasing from 60.0% to 55.0%. Private Equity increased from 10.5% to 12.0%, Private Real Estate increased from 7.5% to 9.0% and Private Credit increased from 2.0% to 4.0%, resulting in Private Risk Assets increasing from 20.0% to 25.0%. Implementation of the amended long-term targets will be achieved over a number of years through a disciplined investment approach. The policy benchmarks will change over time as the Systems make meaningful progress towards the new long-term targets. The following table illustrates the Systems' Board of Trustees approved asset allocation as of June 30, 2019.

Investment Type	Long-term Target	Policy Ranges
Public Risk Asset Programs		
U.S. Public Equity	27.0%	16% - 48%
Public Credit	7.0%	0% - 20%
Hedged Assets	6.0%	0% - 25%
Non-U.S. Public Equity	<u>15.0%</u>	8% - 28%
Total Public Risk Assets	55.0%	35% - 75%
Safe Assets		
U.S. Treasuries	16.0%	0% - 40%
U.S. TIPS	4.0%	0% - 40%
Cash Equivalents	0.0%	<u>0% - 10%</u>
Total Safe Assets	20.0%	10% - 40%
Private Risk Asset Programs		
Private Equity	12.00%	4% - 15%
Private Real Estate	9.00%	4% - 12%
Private Credit	4.00%	<u>0% - 8%</u>
Total Private Risk Assets	<b>25.00%</b>	10% - 30%
Total Fund	<u>100.0%</u>	

The Systems categorize their fair value measurements within the fair value hierarchy established by U.S. generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset and gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The Systems have classified the fair value measurements on the following page in accordance with the Board approved asset allocation discussed above. The classifications will not directly reconcile to total investments per the Statements of Fiduciary Net Position due to the considerations of cash holdings, other liabilities and accruals.

Level 1 - Unadjusted quoted prices for identical instruments in active markets.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable.

Level 3 - Valuations derived from valuation techniques in which significant inputs are unobservable.

Investments that are measured at fair value using the net asset value (NAV) per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Systems' assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability. The tables on the following page show the fair value leveling of the investments for the Systems.

Short-term securities generally include investments in money market-type securities reported at cost which approximates market or fair value.

Equities within all assets classes that are classified in Level 1 are valued using prices quoted in active markets for those securities. Equity and equity derivative securities classified in Level 2 are securities whose values are derived daily from associated traded securities. Equity securities classified in Level 3 are valued with last trade data having limited trading volume.

Fixed income securities and derivatives within all assets classes that are classified in Level 2 are valued using either a bid evaluation or a matrix pricing technique. Bid evaluations may include market quotations, yields, maturities, call features and ratings. Matrix pricing is used to value securities based on the securities relationship to benchmark quoted prices. Such securities include U.S. Treasuries, corporate and agency bonds, bank loans, and mortgage backed securities. Level 2 fixed income securities have non-proprietary information that was readily available to market participants, from multiple independent sources, which are known to be actively involved in the market.

<b>Total Private Risk Investments</b>	9,224,056,409	7,143,377,580		
Total investments measured at the NAV	\$ 21,163,096,281	\$ 7,143,377,580		

The fair values of investments in certain public equity, hedged assets, and private risk assets are based on the investments' net asset value (NAV) per share (or its equivalent) and are presented in the above table. Investments that are measured at fair value using the net asset value (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

#### Public Equity Investments

The public equity investments include two passive U.S. equity funds, two active U.S. equity funds, two passive non-U.S. equity funds and three active non-U.S. equity funds. The passive equity funds provide for basic market exposure with daily liquidity. The active U.S. equity funds provide active industry specific strategies within U.S. markets while the active non-U.S. equity funds provide active investment strategies in the global equity and emerging markets.

#### Hedged Assets

The hedged assets investment strategy provides diversification and reduced volatility to the total portfolio. The purpose of this program is to enhance the overall risk/return profile through the inclusion of specialized investment strategies that typically generate returns in a different fashion (i.e., absent a high correlation to equities or bonds).

Asset Allocation/Global Macro includes investments in two funds with the strategy of taking long and short positions based on top-down macroeconomic analysis (i.e., interest rates, foreign exchange rates, and commodity prices). Global strategies involve long and short positions in securities of diverse geographical regions such as developed and emerging markets.

*Distressed Debt/Credit* includes investments in two funds which seek returns by capitalizing on opportunities in financially distressed companies' debt and credit securities.

*Diversified Beta* includes investments in three funds with a risk parity approach which focuses on the allocation of risk across the portfolio.

*Equity Focused* includes investments in seven funds with the strategy of taking long positions in attractive equity securities and potentially short positions in unattractive equity securities.

Multi-Strategy includes investments in ten funds which represent a broad style of investing that seeks diverse sources of alpha generation and positive absolute returns by employing a variety of investment strategies. Strategies utilized may include, but are not limited to, convertible bond arbitrage, equity long/short, statistical arbitrage, and merger arbitrage.

#### Private Risk Assets

Private risk investments are typically very long term in nature, not publicly traded and relatively illiquid. Investments are made in limited partnerships where redemptions are restricted over the life of the partnership. During the life of the partnerships, distributions are received as underlying portfolio investments are realized.

Private Equity investments provide financing for startup companies, private middle market companies, firms in financial distress and public and non-public firms seeking buyout financing. Private equity investments can be classified into three basic sub-asset class categories: Venture Capital, Buyouts, and Debt-Related.

Private Credit investments are comprised primarily of debt-related investments that provide a current yield along with equity participation (usually warrants). Primary strategies are distressed debt, bankruptcy restructurings, mezzanine debt, bank loans, and other credit-drive or debt-related strategies.

Real Estate investments are intended to provide exposure to a diversified portfolio of institutional quality private real estate investments that will provide meaningful, consistent returns, and act as a hedge against inflation and a diversifier to the overall investment portfolio. The real estate portfolio includes closed-end funds where distributions from each investment will be received as the underlying investments are liquidated and open-end funds which offer redemption options.

#### Rate of Return

For the year ended June 30, 2019, the money-weighted rate of return, net of all investment expenses and fees, was 6.9%. The money weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested. Time weighted returns (geometric return) for the year ended June 30, 2019 net of all investment expenses and fees, was 6.9%.

#### Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of the Systems' investment in a single issue. To mitigate this risk, the Systems' investment policy prohibits investing more than 5% of the total investment portfolio into any single financial institution or issuer, excluding U.S. government securities. At June 30, 2019, the Systems did not have more than 5% of total investments in a single issue except for U.S. government securities.

#### Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The Systems' investment policy restricts duration as a means of managing its exposure to fair value losses arising from increased interest rates. In addition, each manager must follow guidelines established relative to the duration of its benchmark. The portfolios are continually monitored to ensure compliance with these guidelines. The following table includes collateral pledged for securities lending collateral. The maturities of all debt securities are presented below:

Security Type	Fair Value at June 30, 2019	< 1 year to maturity	1 to 5 years to maturity	6 to 10 years to maturity	Over 10 years to maturity
U.S. treasuries	\$ 9,341,906,527	\$ 1,860,529,720	\$ 3,905,949,049	\$ 2,586,159,712	\$ 989,268,046

#### Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The Systems do not have a single investment policy designating the minimum allowable credit rating; however, each manager must follow guidelines established specifically for its managed portfolio. The portfolios are continually monitored to ensure compliance with these guidelines. The following table includes collateral pledged for securities lending collateral. The Systems' debt investments by credit rating category as of June 30, 2019 are presented in the following table.

Security Type		Fair Value at June 30, 2019	%	FE	OIC Insured	AAA	AA	A	BBB	BB	В	CCC	Not Rated

Total	\$	12,329,706,536	100%	\$	711,073,832	\$ 9,486,237,121	\$107,514,017	\$1,036,909,600	\$ 860,353,077 \$	65,419,999 \$	42,905,698 \$	3,270,625	\$16,022,567
Percentage of Total Fixed I	Inco	me 100%			6%	77%	1%	8%	7%	1%	0%	0%	0%

Note: Commingled Funds are presented at the weighted average credit quality. These funds do not carry a rating in and of themselves; however, the underlying securities are all rated. To more accurately reflect the credit risk of the Systems, these weighted averages are displayed. Obligations of the U.S. government or obligations explicitly guaranteed by the U.S. government are not required to be disclosed; however, we feel it shows a more true picture of our fixed income holdings.

All collateral pledged in support of the Systems' deposits and repurchase agreements was held in agency securities with a quality rating of AAA.

#### Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The Systems do not have a single investment policy designating the allowable exposure to foreign currency; however, each manager must follow guidelines established specifically for its managed portfolio. The portfolios are continually monitored to ensure compliance with these guidelines. The Systems' exposure to foreign currency risk as of June 30, 2019 is presented in the following table.

Currency	Debt	Equity	Currency/Short Term	Total
Argentine Peso	\$ -	\$ -	\$ 431,487	\$ 431,487
Australian Dollar	-	139,884,196	1,015,881	140,900,077

#### **Derivatives**

Derivatives are generally defined as investment instruments whose cash flows or fair values are derived from the value of some other asset or index. The Systems are parties to derivatives which have off-balance sheet risk. These derivative instruments are used in the normal course of business to generate earnings and reduce exposure to fluctuations in market conditions. The Systems are exposed to various types of credit, market, and legal risk related to these investments. Investment staff monitors these types of investments with extreme care and is not aware of any undue risks at this time. All derivatives are considered investments. Derivatives are reported at fair value on the Statements of Fiduciary Net Position based on quoted market prices when available. In the instances that quoted market prices are unavailable, pricing is obtained via independent pricing sources.

The fair value balances and notional amounts of derivative instruments outstanding as of June 30, 2019, classified by type are as follows:

	Fair Value at June	30, 201	9		
Investment Derivatives	Classification		Amount		Notional
Swaps					
Currency swaps	Investments, at fair value	\$	(792,560)	\$	15,036,198

Total Investment Derivatives		\$	16,691,613	\$	2,264,918,434

**Swaps** - The Systems' investment managers may enter into various swaps including interest rate swaps, credit default swaps, currency swaps and equity and total return swaps. Swaps represent an agreement between two parties to exchange sequences of cash flows over a period in the future. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counterparty who, in turn, agrees to make return interest payments that float with some reference rate. A credit default swap is a contract whereby the credit risk associated with an investment is transferred by entering into an agreement with another party, who in exchange for periodic fees, agrees to make payments in the event of a default or other predetermined credit event. A currency swap is a foreign exchange transaction that trades principal and interest in one currency for the same in another currency. A total return swap is a contract in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of the underlying asset. The underlying asset is typically an index, bond, etc. Gains and losses on swaps are determined based on market values and are recorded in net appreciation (depreciation) in fair value of investments on the Systems' Statements of Changes in Fiduciary Net Position. Net gains on swaps of \$152.3 million were recognized for the fiscal year ended June 30, 2019.

**Futures** - Futures represent commitments to purchase (asset) or sell (liability) securities at a future date and at a specified price. Futures contracts are traded on organized exchanges (exchange traded) thereby minimizing the Systems' credit risk. The net change in the value of futures contracts is settled daily in cash with the exchanges. Net gains or losses resulting from the daily settlements are included in net appreciation (depreciation) in fair value of investments on the Systems' Statements of Changes in Fiduciary Net Position. The Systems recognized net losses on

futures contracts of \$5.3 million during the fiscal year ended June 30, 2019.

**Options** - Options represent or give buyers the right, but not the obligation, to buy (call) or sell (put) an asset at a preset price over a specified period. The option's price is usually a small percentage of the underlying asset's value. As a writer of financial options, the Systems' investment managers receive a premium at the outset of the agreement and bear the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial options, the Systems' investment managers pay a premium at the outset of the agreement and the counterparty bears the risk of an unfavorable change in the price of the financial instrument underlying the option. Net gains or losses resulting from such obligations are included in net appreciation (depreciation) in fair value of investments on the Systems' Statements of Changes in Fiduciary Net Position. The Systems had no option activity during the fiscal year ended June 30, 2019.

Currency forwards - Currency forwards represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency rate on the foreign currency dominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in net appreciation (depreciation) in fair value of investments on the Systems' Statements of Changes in Fiduciary Net Position. The Systems recognized net gains on such contracts of \$45.3 million during the fiscal year ended June 30, 2019.

**Derivative Risk** - Derivatives that are exchange traded are not subject to credit risk. No derivatives held are subject to custodial credit risk.

At June 30, 2019 the counterparties' credit ratings for currency forwards, options and swaps are subject to credit risk as shown below: The Systems are exposed to interest rate risk on their interest rate swaps. As the variable portion of the swaps move in the market, the Systems' exposure increases and decreases. The Systems are exposed to termination risk. The Systems' investment managers or their counterparties may terminate a derivative if either party fails to perform under the terms of the contract.

The Systems' derivatives are governed by ISDA Master Agreements between the Systems and the Counterparties. These agreements set forth collateral requirements and applicable netting arrangements. Foreign currency risks are reflected on page 37.

The Systems could be exposed to risk if the counterparties to the contracts are unable to meet the terms of the contracts. The Systems' investment managers seek to control this risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring procedures. The Systems anticipate that the counterparties will be able to satisfy their obligations under the contracts.

The derivative financial instruments discussed involve, to varying degrees, elements of market risk to the extent of future market movements in excess of the amounts recognized in the Statements of Fiduciary Net Position. Market risk arises from the potential unfavorable change in the value of the underlying instruments. The contract or notional amounts of these instruments reflect the extent of the Systems' involvement in each class of financial instrument; however, these amounts do not represent the exposure to market loss. Additional derivatives may be held in limited partnerships and commingled funds that are not reflected below.

Derivative Counterparty Credit Ratings								
Quality Rating	Swaps	Total						
AA	\$ -	\$ (361,936)	\$ (361,936)					
A	23,079,598	(8,129,033)	14,950,565					
BBB		(20,232)	(20,232)					
Total subject to credit risk	\$ 23,079,598	\$(8,511,201)	\$ 14,568,397					

#### Security Lending Activity

Under the "prudent person" authority of the governing statutes and in accordance with the policies set by the Board of Trustees, the Systems lend securities to broker-dealers and banks pursuant to a form of loan agreement. The Systems' custodial bank is authorized to act as the Systems' agent to lend available securities to approved broker-dealers and banks subject to the receipt of acceptable collateral.

During the fiscal year, the Systems' custodial bank lent, on behalf of the Systems, securities to participating broker-dealers. The broker-dealers must provide collateral in the form of cash. The Systems did not impose restrictions during the fiscal year on the amount of loans that the custodial bank made on their behalf. Borrowers were required to deliver collateral for each loan equal to: (1) in the case of loaned securities denominated in U.S. dollars or whose primary trading market was located in the United States, or sovereign debt issued by foreign governments, 102% of the fair value of the loaned securities and (2) in the case of loaned securities not denominated in U.S. dollars or whose primary trading market was not located in the United States, 105% of the fair value of the loaned securities.

Pursuant to the lending agreement, the custodial bank has an obligation to provide a form of indemnification to the Systems in the event of default by a borrower. There were no violations of the contractual provisions nor were there any borrower or lending agent default losses during the fiscal year.

The fair value of securities on loan as of June 30, 2019 was \$251,598,362. On June 30, 2019 the Systems had no credit risk exposure to borrowers as the cash and securities collateral amounts received exceeded amounts on loan. Loans are generally terminable on demand. However, with the prior approval of the Systems, loans may be made on the basis of a specified termination date, with or without providing for the right of the Systems to terminate or substitute equivalent securities. As of June 30, 2019, there were no term loans.

Cash collateral is invested in separately managed accounts in accordance with the investment guidelines approved by the Systems. The primary investment objective is the preservation of principal. As of June 30, 2019, the cost basis of the invested cash collateral totaled \$258,074,683 and the estimated fair value totaled \$258,087,676.

The Systems' recognized net depreciation of \$2,541 for the year ended June 30, 2019 on the invested collateral account. Such is reported as net (depreciation) appreciation in fair value of security lending collateral on the Statements of Changes in Fiduciary Net Position.

The weighted average duration of invested collateral as of June 30, 2019 was 13 days and an average final maturity of approximately 34 days. Because the loans were terminable at will, their duration did not match the duration of the investments made with cash collateral.

#### Note 5 – Net Pension Liability of Employers

The components of the net pension liability of the Systems' employers at June 30, 2019 are as follows:

	Total Pension Liability (TPL) (a)	Plan Fiduciary Net Position-Restricted for Pensions (b)	Net Pension Liability (NPL) (a - b)	Plan Fiduciary Net Position as a % of TPL (b/a)	Covered Payroll (c)	Employers' NPL as a % of Covered Payroll ((b-a)/c)
PSRS	\$ 47,973,829,236	\$ 40,593,758,865	\$ 7,380,070,371	84.6%	\$ 4,844,248,703	152.3%
PEERS	\$ 5,809,484,699	\$ 5,018,523,615	\$ 790,961,084	86.4%	\$ 1,665,654,047	47.5%

Actuarial Assumptions - Actuarial valuations of the Systems involve estimates of the reported amount and assumptions about probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality and future salary increases. Amounts determined regarding the net pension liability are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The Board of Trustees adopts actuarial assumptions, each of which individually represents a reasonable long-term estimate of anticipated experience for the Systems, derived from experience studies conducted every fifth year. The most recent comprehensive experience studies were completed in June 2016. All economic and demographic assumptions were reviewed and updated, where appropriate, based on the results of the study and effective with the June 30, 2016 valuation. The next experience studies are scheduled for 2021. For the June 30, 2018 valuations, the investment rate of return was reduced from 7.6% to 7.5% and was updated in accordance with the funding policies amended by the Board of Trustees at their October 2018 meeting. No additional assumption changes have occurred.

The Schedules of Employer's Net Pension Liability presents multi-year trend information about whether the plan net positions are increasing or decreasing over time relative to the total pension liability. These schedules are presented in the required supplementary information following the notes to the financial statements. The total pension liability was determined by an actuarial valuation as of June 30, 2019. A summary of the significant actuarial assumptions as of June 30, 2019 are shown on the following page.

Measurement Date	June 30, 2019			
Valuation Date	June 30, 2019			
Actuarial Cost Method	Entry Age Normal			
Investment Rate of Return	7.50%			
Inflation	2.25%			
Total Payroll Growth				
PSRS		onsisting of 2.25% in ings, and 0.25% of re		onal inflation due to the inclusion of health care
PEERS		onsisting of 2.25% in ings, and 0.50% of re		onal inflation due to the inclusion of health care
<b>Individual Salary Growth</b>				
PSRS	inclusion of health ca		rnings, 0.25% of real	ation, 0.25% additional inflation due to the wage growth for productivity, and real wage
PEERS	inclusion of health ca		rnings, 0.50% of real	flation, 0.50% additional inflation due to the wage growth for productivity, and real wage
Cost-of-Living Increases

## Sensitivity of Net Pension Liability

The sensitivity of the net pension liability of employers to changes in the discount rate is presented below. The net pension liability of employers calculated using the discount rate of 7.5% is presented as well as what the employers' net pension liability would be using a discount rate that is 1.0% lower (6.5%) or 1.0% higher (8.5%) than the current rate.

		1% Decrease	Current	1% Increase
		(6.5%)	Rate (7.5%)	(8.5%)
PSRS	Net Pension Liability (Asset)	\$ 13,425,639,223	\$ 7,380,070,371	\$ 2,354,968,836
PEERS	Net Pension Liability (Asset)	\$ 1,502,009,544	\$ 790,961,084	\$ 194,568,000

#### Long-Term Expected Rate of Return

The long-term expected rate of return on investments was determined in accordance with Actuarial Standard of Practice (ASOP) No. 27, Selection of Economic Assumptions for Measuring Pension Obligations. ASOP No. 27 provides guidance on the selection of an appropriate assumed rate of return. The long-term expected rate of return on the Systems' investments was determined using a building-block method in which best-estimate ranges of expected future real rates of returns (expected returns, net of investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Systems' target allocation as of June 30, 2019 are summarized below along with the long term geometric return. Geometric return (also referred to as the time weighted return) is considered standard practice within the investment management industry. Geometric returns represent the compounded rate of growth of a portfolio. The method eliminates the effects created by cashflows.

Asset Class	Target Asset Allocation	Long-Term Expected Real Return Arithmetic Basis	Weighted Long-Term Expected Real Return Arithmetic Basis
U.S. Public Equity	27.0 %	5.16 %	1.39 %
Public Credit	7.0 %	2.17 %	0.15 %
Hedged Assets	6.0 %	4.42 %	0.27 %
Non-U.S. Public Equity	15.0 %	6.01 %	0.90 %
U.S. Treasuries	16.0 %	0.96 %	0.15 %
U.S. TIPS	4.0 %	0.80 %	0.03 %
Private Credit	4.0 %	5.60 %	0.22 %
Private Equity	12.0 %	9.86 %	1.18 %
Private Real Estate	9.0 %	3.56 %	0.32 %
Total	100.0 %		4.61 %
		Inflation	2.25 %
	Long-term ar	ithmetical nominal return	6.86 %
		Effect of covariance matrix expected geometric return	0.64 % 7.50 %

The long-term expected rate of return used to measure the total pension liability was 7.5% as of June 30, 2019 and is consistent with the long-term expected geometric return on plan investments. The actuarial assumed rate of return was 8.0% from 1980 through fiscal year 2016. The Board of Trustees adopted a new actuarial assumed rate of return of 7.75% effective with the June 30, 2016 valuation based on the actuarial experience studies and asset-liability study conducted during the 2016 fiscal year. The Board of Trustees further reduced the assumed rate of return to 7.6% effective with the June 30, 2017 valuation and then again with the June 30, 2018 valuation to 7.5%. The projection of cash flows used to determine the discount rate assumed that employer contributions would be made at the actuarially calculated rate computed in accordance with assumptions and methods stated in the funding policy adopted by the Board of Trustees, which requires payment of the normal cost and amortization of the unfunded actuarially accrued liability in level percent of employee payroll installments over 30 years utilizing a closed period, layered approach. Based on this assumption, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members.

#### Note 6 - Retirement Plans

#### Section 401(a) Defined Benefit Plan

All full-time System employees holding valid Missouri educator certificates are covered by PSRS. All other eligible employees are members of PEERS. Both Systems provide retirement and disability benefits, annual cost-of-living adjustments and death benefits to plan members and beneficiaries. Chapter 169 RSMo contains the statutory provisions of both Systems.

PSRS members were required to contribute 14.5% of their annual covered salary during fiscal years 2019, 2018 and 2017. PSRS, as the employer, was required to match that amount. The contribution rate is set each year by the Board of Trustees upon the recommendation of the independent actuary within the contribution restrictions set in Section 169.030 RSMo. Employer contributions to PSRS totaled \$84,515 for the 2019 fiscal year, \$67,424 for the 2018 fiscal year and \$47,196 for the 2017 fiscal year. The amounts for these years are equal to the required contributions. PEERS members were required to contribute 6.86% of their annual covered salary during fiscal years 2019, 2018 and 2017. PSRS, as the employer, was required to match that amount. The contribution rate is set each year by the Board of Trustees upon the recommendation of the independent actuary within the contribution restrictions in Section 169.620 RSMo. Employer contributions to PEERS totaled \$794,871 for the 2019 fiscal year, \$756,101 for the 2018 fiscal year and \$734,395 for the 2017 fiscal year. The amounts for these years are equal to the required contributions.

PSRS and PEERS, as the administrators for the defined pension plans, are also participating employers of the Systems. The administrative expenses of the Systems are included in the deductions to the Systems' fiduciary net position. While the employer contributions of the other participating employers are funded from outside revenue sources, the employer contributions of PSRS and PEERS are funded from sources already recognized as revenues – earnings on plan investments. Attempting to allocate a portion of the net pension liability to PSRS and PEERS would result in an allocation of the net pension liability to the other participating employers.

Accordingly, PSRS and PEERS will exclude its contributions from the employer proportionate share calculation for the reporting of a net pension liability, by assigning itself a proportionate share of 0%.

#### Section 457 Deferred Compensation Plan

A voluntary Section 457 deferred compensation plan is administered to provide additional retirement benefits for employees. The plan provides for employer-matching contributions up to a set maximum. The total contributions are subject to the limitations established in IRC Section 457. The Board of Trustees has authority to establish the employer contribution levels. For most employees, the System will match \$50 plus 0.52% of salary per month. For certain employees, the System will make employer-paid contributions of \$18,500 per year plus \$6,000 in catch up contributions, if eligible. This is governed by individual employment contracts as approved by the Board of Trustees.

All employees immediately vest in the employer-matching and employer-paid contributions. Employer-matching contributions totaled \$118,410 and employer-paid contributions totaled \$68,250 for the 2019 fiscal year. Employee contributions totaled \$462,727 for the 2019 fiscal year.

Maintenance of individual member accounts and custody of assets have been contracted to a third-party administrator and investment custodian. Total contributions are sent directly to the third-party administrator by the employer. Employees can self-direct investments of their contributions and their respective share of matching contributions in a number of investment options. Because the System does not hold the plan's assets and does not have significant administrative responsibilities, the plan's assets and changes in net assets are not reported in the Systems' financial statements.

The Systems established an unfunded Section 457(f) non-qualified deferred compensation plan for certain employees. The plan is subject to Internal Revenue Code section 457(f), and to the extent applicable, Internal Revenue Code section 409A. Employees approved for participation in the plan by the Systems' Board of Trustees may acquire a vested interest in a deferred compensation award which is credited to the account of the member under terms approved by the Board of Trustees. The value of the member's account shall be subject to a risk of forfeiture based on the applicable vesting schedule determined for the member. As of June 30, 2019, employees had a vested interest under the plan of \$71,223 and disbursements of \$27,981 were made from the plan for the year then ended.

#### Section 401(a) Defined Contribution Plan

The Systems established a 401(a) defined contribution plan for certain employees. The employees are approved for participation in the plan by the Systems' Board of Trustees. The plan is a tax qualified plan under Section 401(a) of the Internal Revenue Code and all contributions by or on behalf of employees are tax deferred until time of withdrawal. All employees immediately vest in employer-paid contributions. Employer-paid contributions totaled \$55,000 for the 2019 fiscal year.

Maintenance of individual member accounts and custody of assets have been contracted to a third-party administrator and investment custodian. Total contributions are sent directly to the third-party administrator by the employer. Employees can self-direct investments of their contributions in a number of investment options. Because the System does not hold the plan's assets and does not have significant administrative responsibilities, the plan's assets and changes in net assets are not reported in the Systems' financial statements.

# Note 7 – Other Post-Employment Benefit Plans

Post-Employment Staff Retiree Healthcare Plan

Plan Description, Funding Policy and Benefits **Provided** – The Public School Retirement System of Missouri Staff Retiree Healthcare Program (SRHP) is a single-employer defined benefit other post-employment benefit (OPEB) plan administered by PSRS. SRHP is administered as required by RSMo 169.590. SRHP provides a healthcare premium implicit rate subsidy to eligible staff retirees and their dependents provided they pay 100% of the blended healthcare premium. The blended healthcare premium is based on all active and retired employees. Retiree healthcare benefits are funded on a pay-as-you-go basis, with premiums determined annually. Therefore, no formal trust has been established for the SRHP. The PSRS/PEERS Board of Trustees determines the funding of benefits and any benefit amendments. There is no continuing obligation to provide benefits beyond each calendar year. SRHP does not issue a stand-alone public financial report.

Employees covered by benefit terms:

Retirees and spouses of retirees receiving benefits	16
Active employees	134
Total	150

*OPEB Liability* – The components of the net OPEB Liability of the SRHP as of June 30, 2019 are as follows:

T LODED IN 1811 D C.1	¢ 2.700.062
Total OPEB Liability - Beginning of the year	\$ 3,788,863
Service cost	151,794
Interest Costs	132,375
Experience (gains) losses	74,147
Assumption changes	(259,345)
Plan amendments	-
Benefit payments	(1,850)
Total OPEB Liability - End of year	\$ 3,885,984
OPEB Plan Fiduciary Net Position	\$ -
Net OPEB Liability	\$ 3,885,984

*OPEB Expense* – The components of the OPEB expense for the year ended June 30, 2019 are as follows:

Service Cost	\$	151,794
000,000	Ф	131,/94
Plan Amendments		-
Interest Costs		132,375
Recognition of deferred (inflows) outflows of		
resources related to:		
Liability experiences (gains) losses		20,453
Assumption changes (gains) losses		(41,755)
Total Recognition of deferred (inflows)		
outflows of resources		(21,302)
Total collective OPEB expense recognized	\$	262,867
	=	

Actuarial Method and Assumptions - The total OPEB liability was determined by an actuarial valuation as of June 30, 2019. Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial assumptions and methods used in the valuation are based on prior plan experience and industry trends. The nature of the plan design and overall plan size does not allow for full scale periodic experience studies; therefore such a study has not been conducted. Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality and healthcare cost trends. Amounts determined regarding the total OPEB liability and expense are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

In the June 30, 2019 actuarial valuation, the following actuarial assumptions and methods were used:

Measurement date	June 30, 2019
Valuation date	June 30, 2019
Actuarial cost method	Entry Age Normal
Actuarial value of assets	No Assets (pay-as-you-go)
Amortization method	Level Percent Open
Discount rate	3.36% per year for June 30, 2018 2.46% per year effective June 30, 2019
Wage inflation	3.5% per year for June 30, 2015 and prior years 3.25% per year effective June 30, 2016
Healthcare trend rate	7.0% in fiscal year 2019, decreasing by one-half percentage point per year to an ultimate of 4.5% in fiscal year 2024 and after
Mortality	
Active members	Based on 75% of the RP-2006 Mortality Tables with static projecting to 2028 using the 2014 Improvement Scale.
Non-disabled retirees and beneficiaries	Based on the RP-2006 Mortality Tables with plan-specific experience adjustments and static projection to 2028 using the 2014 SSA Improvement Scale
Disabled retirees	Based on the RP-2014 Disabled Retiree Mortality Table, adjusted to 2006, with static projection to 2018 using the 2014 SSA Improvement Scale

*Discount Rate* - GASB Statement No. 75 requires plans not administered through a trust to utilize the yield or index rate for 20-year, tax-exempt general obligation municipal bonds with and average rating of AA/Aa or higher. The Systems utilized the US. General Obligation AA Municipal Bond Yield Curve for 20 years for the June 30, 2019 and 2018 valuations. The June 30, 2019 rate was 2.46% and the June 30, 2018 rate utilized for remeasurement was 3.36%. The movement in the yield on the 20 Year US. General Obligation AA Municipal Bond is considered an assumption change for reporting purposes.

**Deferred Inflows and Outflows of Resources** - As of June 30, 2019, the Systems reported deferred outflows of resources and deferred inflows of resources from the following sources related to the SRHP:

	red Outflows Resources	erred Inflows Resources
Balance of Deferred Outflows and Inflows Due to:		
Differences between expected and actual experience	\$ 152,492	\$ -
Changes of assumptions	 	 311,180
Total	\$ 152,492	\$ 311,180

Amounts reported as collective deferred (inflows) / outflows of resources are to be recognized in pension expense as follows:

ear Ending June 30:		
2020	\$ (21,302)	
2021	(21,302)	
2022	(21,302)	
2023	(21,302)	
2024	(21,302)	
Thereafter	(52,178)	
	\$ (158,688)	

Sensitivity of the net OPEB liability to changes in the discount rate and health care cost trend rate. – The following table presents the sensitivity of the net OPEB liability to changes in the discount rate. The net OPEB liability calculated using the discount rate of 2.46% is presented as well as what the net OPEB liability would be using a discount rate that is 1.0% lower (1.46%) or 1.0% higher (3.46%) than the current rate.

	Discount Ra	te Sensitivity	
	1% Decrease	Current	1% Increase
	(1.46%)	Rate (2.46%)	(3.46%)
Net OPEB Liability	\$ 4,328,949	\$ 3,885,983	\$ 3,484,975

The following table presents the sensitivity of the net OPEB liability to changes in the healthcare trend rate. The net OPEB liability calculated using the healthcare trend rate of 7.0% is presented as well as what the net OPEB liability would be using a healthcare trend rate that is 1.0% lower (6.0%) or 1.0% higher (8.0%) than the current rate.

	Trend Rate	Sensitivity	
	1% Decrease	Current	1% Increase
	(6.0%)	Rate (7.0%)	(8.0%)
Net OPEB Liability	\$ 3,369,938	\$ 3,885,983	\$ 4,502,505

#### Post-Employment Health Plan

PSRS maintains a Post-Employment Health Plan ("PEHP") for employees. Upon termination, an employee will receive payment at the rate of one day of pay for each two days of accrued sick leave up to 100 days of accrued sick leave (50 days paid). Any days above 100 will be forfeited. All payments under the PEHP in excess of \$1,000 will be transferred into a PEHP account which can be used to pay health insurance premiums for the employee or dependent at any time in the future. If an employee is retiring, the payments can be transferred back to PSRS on a monthly basis to cover the cost of health insurance for the retiree. The amount paid into the PEHP was \$50,132 for four employees during 2019.

## Note 8 - Risk Management

The Systems are exposed to various risks of loss related to natural disasters, errors and omissions, loss of assets, torts, etc. The Systems have chosen to cover such losses through the purchase of commercial insurance. There have been no material insurance claims filed or paid during the past three years.

The Systems have a disaster recovery plan that provides for continued computer operations at a remote location should the retirement office be unavailable for normal operations.

## Note 9 – Commitments and Contingencies

Commitments to the future purchase of investments at June 30, 2019 totaled \$2,686,685,281.

Total unfunded capital commitments to private real estate, private equity and other alternative investments totaled approximately \$7.1 billion as of June 30, 2019. The unfunded commitments are not recorded in the Statements of Fiduciary Net Position.

Certain legal proceedings are pending with PSRS and PEERS arising from normal activities. Although unable to predict the outcome of these matters, the Systems believe the final outcome of these actions will not have a material adverse effect on the Systems' financial statements.

Schedules of Investment Returns

Year ended June 30:	2019	2018	2017	2016	2015	2014
Annual money-weighted rate of return, net of all investment expenses	6.9%	8.7%	12.3%	1.6%	4.3%	16.7%
Time-weighted rate of return, net of all investment expenses	6.9%	8.7%	12.3%	1.6%	4.3%	16.7%

Note: This schedule is intended to show information for ten years. Additional years will be displayed as they become available.

#### Notes to the Schedules of Required Supplementary Information

The information presented in the required supplementary schedule was determined as part of the actuarial valuation at the date indicated. Additional information as of the latest actuarial valuation follows.

Changes in benefit terms:

PSRS: The 25-and-Out and 2.55% provisions were extended in 2007 through 2013. In 2013 the state legislature provided a

permanent extension of the 25-and Out provision and extended the 2.55% provision to 2014.

PEERS: The 25-and-Out provision was extended in 2007 through 2013. In 2013 the State legislature provided a permanent

extension of the 25-and Out provision.

Changes of assumptions: In 2011 and 2016 payroll growth, salary increases, assumed life expectancies and mortality were adjusted to

more closely reflect actual experience. In 2016, the inflation rate was adjusted to 2.25% from 2.5%, the investment rate of return from 8.00% to 7.75% and annual cost-of-loving adjustments were calculated in accordance with the funding policy as amended in June 2016. During 2016, minor revisions were made to other actuarially assumptions including but not limited to, retirement rates, withdraw rates, etc. The 2016 assumption changes were a result of an actuarial experience study conducted during the 2016 fiscal year. For fiscal year 2017, the investment rate of return was further reduced from 7.75% to 7.6% and the assumption for annual cost-of-living adjustments. For fiscal year 2018, the investment rate of return was further reduced to 7.5%. There were no assumption changes made during fiscal year 2019.

Actuarially Methods

and Assumptions: The actuarially determined contribution rates in the schedule of employers' contributions are calculated as of June 30,

two years prior to the end of the fiscal year in which contributions are reported. The following actuarial methods and

assumptions were used to determine contribution rates reported in the schedule.

Actuarial Cost Method Entry Age Normal Level Percent of Payroll

**Amortization Method** Closed, level percent for 30 years

Remaining amortization period

PSRS 22.4 years
PEERS 22.7 years

**Asset valuation method** 5-year smoothing of actual returns above or below expected returns

Measurement Date June 30, 2019
Valuation Date June 30, 2019

Investment Rate of Return7.50%Inflation2.25%

**Total Payroll Growth** 

PSRS 2.75% per annum, consisting of 2.25% inflation, 0.25% additional inflation due to the inclusion of health care costs in

pension earnings, and 0.25% of real wage growth.

PEERS 3.25% per annum, consisting of 2.25% inflation, 0.50% additional inflation due to the inclusion of health care costs in

pension earnings, and 0.50% of real wage growth.

**Individual Salary Growth** 

PSRS 3.00% - 9.50%, depending on service and including 2.25% inflation, 0.25% additional inflation due to the inclusion

of health care costs in pension earnings, 0.25% of real wage growth for productivity, and real wage growth for merit,

promotion and seniority of 0.25% to 6.75%.

PEERS 4.00% - 11.00%, depending on service and including 2.25% inflation, 0.50% additional inflation due to the inclusion

of health care costs in pension earnings, 0.50% of real wage growth for productivity, and real wage growth for merit,

promotion and seniority of 0.75% to 7.75%.

**Cost-of-Living Increases** 

PSRS 1.65% compounded annually, beginning on the second January after retirement and capped at 80% lifetime increase.

The assumption increases from 1.30% to 1.65% over seven years.

PEERS 1.65% compounded annually, beginning on the fourth January after retirement and capped at 80% lifetime increase.

The assumption increases from 1.30% to 1.65% over seven years.

Notes to the Schedules of Required Supplementary Information - Continued

Measurement Date June 30, 2019 Valuation Date June 30, 2019

**Mortality Assumption** 

Actives:

PSRS RP 2006 White Collar Employee Mortality Table, multiplied by an adjustment factor of 0.75 at all ages for

both males and females, with static projection using the 2014 SSA Improvement Scale to 2028.

PEERS RP 2006 Total Dataset Employee Mortality Table, multiplied by an adjustment factor of 0.75 at all ages for

both males and females, with static projection using the 2014 SSA Improvement Scale to 2028.

Non-Disabled Retirees, Beneficiaries and

Survivors:

PSRS RP 2006 White Collar Mortality Table multiplied by the adjustment factors shown in the table below, with

static projections using the 2014 SSA Improvement Scale to 2028.

Age	Males	Females
<60	1.00	1.00
60-74	0.89	0.67
75-89	1.05	0.91
>=90	1.05	1.16

PEERS RP 2006 Total Dataset Mortality Table multiplied by the adjustment factors shown in the table below, with

static projections using the 2014 SSA Improvement Scale to 2028.

Age	Males	Females
<60	1.00	1.00
60-74	1.49	0.77
75-89	1.27	1.03
>=90	1.16	1.04

Disabled Retirees: RP 2006 Disabled Retiree Mortality Table, with static projections using the 2014 SSA Improvement Scale

to 2028.

## Letter from Verus

October 4, 2019

To the Members of the Board,

Financial markets in fiscal 2019 paid strict attention to global trade issues, the U.K.'s potential exit from the European Union, the stalling of earnings growth relative to the prior year and continued unrest in the Middle East. The one-year S&P 500 return of 10.4% tends to mask the volatility that occurred in the fall of 2018 when the index fell 9.0%. Smaller capitalization stocks in the U.S. returned -3.3% despite the strong performance from larger companies.

International Equity Markets continued to trail the U.S. as the Developed Non-U.S. Markets returned only 1.3% and Emerging Markets 1.2%, with continued U.S. Dollar strength particularly versus the Euro and the Pound Sterling. Despite negative interest rates in many of the largest countries, economic activity remains low (growth of approximately 1% in the fiscal year) and below that of the U.S. (3.2%).

In the U.S. Fixed Income Market, 10-year yields fell from 2.9% to 2.0%, propelling the U.S. Treasury Index to a 7.2% return. Also, at 6/30/19, the U.S. T-Bill Index had a yield of 2.3%, signaling an inverted yield curve, often a harbinger of slowing economic activity.

The combined PSRS/PEERS plans, known collectively as the Missouri Education Pension Trust (MEPT), had a total (net of all fees) return of 6.9%, slightly trailing its Policy Index Return (7.3%), but ahead of its Peer Median Return of 6.8%. MEPT's peers are other U.S. Public Funds with assets of great than \$1 billion. Much like its peers, MEPT underperformed in U.S. Equity markets. This was somewhat offset by strong returns in Private Equity and Non-U.S. Equity.

PSRS/PEERS and Verus are embarking on a comprehensive Asset/Liability Study to help the Board determine its preferred risk allocations going forward. While it is premature to suggest any changes to the current Policy Target Portfolio, we anticipate a market environment that will produce returns that are below long-term averages, placing a premium on continuing to produce value-added above what the broad markets provide.

We at Verus appreciate our relationship with PSRS/PEERS and look forward to assisting the Board in the important Investment Policy decisions in fiscal 2020.

Sincerely,

**Barry W. Dennis**Managing Director

## Letter from the Chief Investment Officer

December 2, 2019

To the Members of the Systems:

Throughout this year's Financial Report, you will see the phrase: "*Providing Opportunities for Tomorrow*". The investment staff, under the direction of the Board of Trustees, is solely focused on providing consistent long-term investment returns that can support retirement benefits and provide financial security to the members of PSRS and PEERS as they prepare for tomorrow.

With that in mind, I present the following report on the Systems' investments for the fiscal year ended June 30, 2019 on behalf of the PSRS and PEERS' Board of Trustees and the internal investment staff.

Fiscal year 2019 (July 1, 2018 through June 30, 2019) was marked by global trade issues and a Federal Reserve that increased interest rates in December, only to change the posture to one of easing (lowering rates) shortly thereafter. This fluctuation in both trade and monetary policy led to tremendous volatility in both the bond and stock markets. U.S. stocks were down 8.2% in the first six months of the fiscal year, only to rally 18.7% in the last half of the year. Bond yields remained relatively stable early in the fiscal year before declining significantly in the last half as the yield on the 10-year Treasury bond moved from 2.7% on December 31, 2018 to 2.0% on June 30, 2019. In total, PSRS and PEERS benefited from the overall investment environment as the Systems' assets increased through investment earnings by over \$2.9 billion from the previous year with a total fund performance of 7.0% (or 6.9% net of all fees and expenses).

## Key Points within this year's Financial Report

As you review the financial information in this report for the fiscal year ended June 30, 2019, it is important to be aware of the following points:

- The Systems generated the 7.0% investment return while taking less risk than the policy benchmark (as measured by standard deviation) and less risk than most comparable public funds over all time periods,
- Several of the Systems' primary asset categories (Non-U.S. Public Equity, Private Real Estate and Private Equity) generated returns in excess of established policy benchmarks for the year,
- The PSRS/PEERS investment expenses (including accrued performance-based fees and all internal investment staff expenses) for fiscal year 2019 were 1.13%, or \$1.13 for every \$100 managed. The investment returns reported throughout this publication are mostly net of these fees. The investment return net of all fees and expenses was 6.9% for PSRS and PEERS,
- Total Systems' assets have increased through investment earnings by approximately \$13 billion over the last five years,

Location 3210 W. Truman Blvd. / Jefferson City, M0 65109 Mail P.O. Box 268 / Jefferson City, M0 65102 Phone (573) 634-5290
Toll Free (800) 392-6848 Email psrspeers@psrspeers.org Member Services FAX (573) 634-7934 Employer Services FAX (573) 634-7911

- The PSRS/PEERS internal investment staff and external investment managers added value above the policy benchmark of over \$1.3 billion, net of all fees and expenses, over the last five years. The outperformance was due to portfolio construction and tactical asset allocation decisions by internal investment staff (overweighting and underweighting asset classes around targets) as well as active management on the part of external managers,
- The PSRS and PEERS investment returns for the last five-year time period exceeded 70% of the peer group as defined by the Wilshire TUCS universe of public pension plans with assets in excess of \$1 billion,
- Investment performance throughout this report is calculated using a time-weighted rate of return based on market values, and
- The total invested assets of both PSRS and PEERS were approximately \$45.3 billion on June 30, 2019, making the combined entity larger than all other public retirement plans in the state combined, and the 44th largest defined benefit plan in the United States.

#### Fiscal Year 2019 Year in Review

The internal investment staff, under the direction of the PSRS/PEERS' Board of Trustees, has adopted a disciplined and diversified investment portfolio that includes allocations to multiple asset classes. Over time, every specific asset class within the PSRS/PEERS' investment portfolio performs a valuable function.

In fiscal year 2019, the combined asset allocation provided the Systems with solid absolute returns, led by above average returns from bonds (both Treasury and corporate) and reasonable returns from U.S. stocks. The yield on the 10-year Treasury bond declined from 2.9% at the beginning of the fiscal year to 2.0% on June 30, 2019. This sharp drop in yield contributed to a positive absolute return for all bonds. U.S. Treasury bonds (as measured by the Bloomberg Barclays Treasury Index) increased 7.2% for the fiscal year while corporate bonds (as measured by the Bloomberg Barclays Intermediate Credit Index) increased 8.2%. U.S. stocks returned 9.0% for the fiscal year ended June 30, 2019 (as measured by the Russell 3000 Index). In contrast, non-U.S. stocks produced positive (but much lower) returns for the fiscal year. Non-U.S. developed stocks moved 1.1% higher (as measured by the MSCI EAFE Index), and emerging market stocks increased 1.2% (as measured by the MSCI Emerging Markets Index). The PSRS/PEERS non-traditional asset classes provided strong returns in fiscal year 2019. Specifically, the Private Equity program represented 11.4% of total fund assets at fiscal year-end and generated a 15.4% return. Diversification into private real estate, private credit and hedged assets provided meaningful benefits from a risk and return perspective in fiscal year 2019. The Real Estate composite increased 6.5%, the Private Credit composite increased 5.7% and the Hedged Asset composite returned 3.9%.

As noted above, meaningful absolute returns in most of the major asset classes contributed to the 7.0% return for PSRS and PEERS. The investment returns were supported by solid implementation (security selection) decisions while tactical asset allocation moves detracted from performance. For example, the PSRS/PEERS' Non-U.S. Equity portfolio outperformed its benchmark (MSCI All Country World ex U.S. net Index) by 3.3% in fiscal year 2019, while the PSRS/PEERS' Private Equity portfolio outperformed its benchmark (Russell 3000 Index) by 6.4%. From a portfolio construction and tactical standpoint, the internal investment staff maintained an underweight to bonds (both credit and Treasury) throughout the year (due to historically low interest rates and tight credit spreads) and an overweight to hedged assets. This underweight to bonds diminished total fund performance as both

## Letter from the Chief Investment Officer, continued

Treasury bonds and credit bonds significantly outperformed hedged assets for the year. As you may recall, this is a reversal of fiscal year 2018 when the Hedged Asset portfolio increased 6.3% while the Safe Assets portfolio (primarily Treasury bonds) earned mildly negative returns.

# Fiscal Year 2020: The economy and fundamental PSRS/PEERS principles

As I write this annual letter on December 2, 2019, we are five months into fiscal year 2020 and there are numerous data points that are cause for concern for an investor. We are in the very late stages of an economic cycle (the longest expansion in history), there is angst around the trade war, political turmoil in the U.S., geopolitical challenges abroad and growing concerns of a recession. Additionally, a significant portion of the PSRS/PEERS portfolio is invested in bonds that continue to offer yields at historic low levels.

Despite all the potential negatives, there are continued signs of economic strength around the world, particularly if the U.S. and China reach any sort of meaningful agreement. Therefore, as an institutional investor in an uncertain environment, PSRS/PEERS continue to maintain a highly diversified asset allocation with a long-term focus. The asset allocation is balanced with a significant distribution to return-seeking assets such as stocks and private equity but also a healthy allocation to more defensive investments such as Treasury securities, cash and hedged assets. As the U.S. stock market continues to reach new highs, we believe it is prudent to maintain a structured portfolio that has an opportunity to participate if the markets continue to move higher, but also has substantial downside protection in the event of a market correction.

#### Fiscal Year 2019: Portfolio structure

The PSRS/PEERS investment portfolio remains grounded in three primary categories: Safe Assets, Public Risk Assets and Private Risk Assets. The Board has adopted an Investment Policy that provides the PSRS/PEERS' internal investment staff and external advisors with the flexibility to deviate from the broad categories, and make changes in each category, within appropriate bands. At times the investment staff has deviated significantly from the target allocation as valuations in specific asset classes were attractive relative to historical pricing. However, as we move into fiscal year 2020, the Systems are relatively close to the long-term target asset allocation. Specifically, staff anticipates very few changes to the Safe Asset and Public Risk categories in fiscal year 2020. The Safe Assets composite is critical (despite very low yields) as the economic cycle gets extended because it ensures that adequate liquidity is available to meet all PSRS and PEERS benefit payments and cash needs for an extended period. Alternatively, a strong allocation to the Public Risk category is necessary to provide PSRS/PEERS exposure to potential market growth.

The Systems Private Risk Assets composite will remain a focus for the investment staff in fiscal year 2020 with the belief that private equity and private credit can produce returns in excess of the expected public market returns over long periods of time. Furthermore, the PSRS and PEERS allocation to private real estate is expected to provide consistent income that offers a premium over traditional fixed income investments. The nature of private investing requires a process of portfolio construction that takes years to develop. This is particularly true for a plan with the substantial assets of PSRS/PEERS.

Over the years, the Systems have continued to build on this successful investment platform that serves as an alternative to traditional public markets. At the close of fiscal year 2019, the Systems had over \$9.2 billion invested in Private Risk Assets representing 20.3% of total PSRS/PEERS' assets.

The internal investment staff initiated a private equity co-investment program in 2014 to allow the Systems to make direct investments in private companies alongside private equity managers where PSRS/PEERS has an existing relationship. The investments are compelling because they are executed with no direct investment fees and no performance-based fees. As of June 30, 2019, the Systems had committed \$647 million to 56 private co-investment portfolio companies. The portfolio has generated an annualized since inception return of 17.5% through June 30, 2019. As importantly, the program generated total fee savings of approximately \$70 million over that time period relative to traditional private equity investments. The internal investment staff will continue the program of private equity co-investing in fiscal year 2020. Additionally, at the October 28, 2019 Board meeting, the Board of Trustees approved a similar direct investment program in the private credit space. That program will be initiated prior to the end of calendar year 2019.

Under the support and guidance of the Board of Trustees, I am confident that the investment program at PSRS/PEERS will continue to provide the Systems with an excellent opportunity to achieve solid investment returns over future economic and capital market environments. Most importantly, I believe the portfolio is well-positioned to *provide retirement opportunities for tomorrow* for all PSRS/PEERS' members.

Respectfully,

Craig A. Husting, CFA Chief Investment Officer

(ran a. Mty

## Investment Policy Summary

The Board of Trustees of the Public School Retirement System of Missouri and Public Education Employee Retirement System of Missouri (PSRS and PEERS, also referred to as the Systems) is charged with the responsibility for investing the assets of the Systems in a manner consistent with the fiduciary standards set forth in the 'prudent person' rule. To that end, the Board has adopted the following principles to guide all investment-related decisions:

- 1. Act in the exclusive interest of the members of the Systems,
- 2. Maximize total return within prudent risk parameters, and
- 3. Preserve the long-term purchasing power of the Systems.

The investment portfolios of PSRS and PEERS represent all contributions to the plans, from members and their employers, as well as all net earnings on these assets. These funds are held in support of both current and future liabilities. In total, approximately 60% of every dollar used to pay retirees is generated from investment earnings<sup>1</sup>.

The Board of Trustees of PSRS and PEERS approved the commingling of assets for purposes of investment as allowed by state statute in January 2013. In order to implement this change, PSRS and PEERS adopted the Missouri Education Pension Trust Agreement (MEPT), which is managed by the PSRS and PEERS Board of Trustees and Investment Staff. Effective July 1, 2013, the invested assets of the Systems were pooled and invested in MEPT. All assets held by MEPT are for the exclusive benefit of PSRS and PEERS. Each of the Systems has equity in MEPT based on funds contributed and earnings allocated. Earnings of MEPT are allocated based on the average daily balances of each of the respective Systems. Individual investments in MEPT are not specifically identified to the respective Systems. Due to the fact all invested assets are invested in MEPT, the rate of return for each of the Systems is approximately the same. Therefore, the following discussions focus on MEPT in total and not the individual Systems.

### Roles and Responsibilities

#### **Board of Trustees**

It is the responsibility of the Board of Trustees (Board) to establish and maintain policies and objectives for all

aspects of the Systems' investment program including the determination of long-term policies for risk tolerance and asset allocation.

In keeping with its obligation to serve as the governing fiduciary, any changes to the investment policy or investment implementation manuals require the Board's approval.

As one of the largest public pension funds in the United States, the Systems' operational requirements are complex. In order to properly administer the Systems and carry out investment strategies, the Board relies heavily on both internal staff and external service providers. Due to the number of parties involved, their roles as fiduciaries are clearly identified to ensure distinct lines of responsibility and proper controls exist, while providing increased operational efficiency and elimination of duplication of effort.

#### **Executive Director**

The Executive Director (Director) is appointed by, and serves at the pleasure of the Board. The Director is responsible for planning, organizing and administering all operations of the Systems under the broad policy guidance and direction of the Board. The Director, with the assistance of the investment staff, monitors the performance of the investment portfolio; ensures that funds are invested in accordance with Board policies; and, ensures that proper internal controls are developed to safeguard the assets of the Systems. In fulfilling these responsibilities, the Director relies heavily on the Chief Investment Officer and external asset consultants.

#### Chief Investment Officer

The Chief Investment Officer (CIO) serves at the pleasure of the Director yet has a direct, but limited, link to the Board on investment-related issues. The CIO's sole access to the Board is for submission of investment reports, information, or communications required by the investment policy and any other information or opinions specifically requested by the Board with regard to the investment program. The CIO is the individual primarily responsible for providing direction for the investment program. It is the CIO's responsibility to work with the Director, the general consultant, specialty consultants, and other external service providers, with the assistance of the internal staff, in advising the Board on policies related to the investment program. The CIO has responsibilities related to hiring and terminating service providers.

<sup>&</sup>lt;sup>1</sup> Based on a twenty-year average for fiscal years 1999-2019.

Critical functions of the CIO include recommendations for implementation decisions related to the investment plan and for the strategic allocation of the portfolio within broad ranges approved by the Board.

#### External Asset Consultants

The Systems employ Verus Advisory, Inc. (Verus) as a general consultant and Albourne America, LLC (Albourne), Pathway Capital Management (Pathway) and The Townsend Group (Townsend) as specialty consultants. Verus is an independent resource available to collaborate with the Board and staff on the investment process. This typically includes regular meetings with the Board to provide an independent perspective on the Systems' goals, structure, performance and external service providers. Additionally, Verus may be involved with the strategic allocation shifts for the portfolio.

The specialty consultants work on specific programs within the overall investment program. Albourne is utilized for the Private Credit, Private Equity, Hedged Assets and Alpha Overlay programs. Pathway is a consultant for the Private Equity and Private Credit programs and Townsend consults on the Real Estate program.

#### **External Investment Managers**

The Systems employ external investment managers that include external money managers which may be structured as public or private entities in the form of a partnership, limited liability company, trust, separately managed account, commingled account, or some other form of operational structure in which assets may be held by an external custodian selected and monitored by the external manager.

Managers are given explicit written directions detailing their particular assignments or they follow the investment program outlined in their offering documents or Limited Partnership Agreements, and will construct and manage investment portfolios that are consistent with the investment philosophy and disciplines for which they were hired. Discretion is delegated to the managers to carry out investment actions as directed by the Systems.

#### Master Custodian

JP Morgan Chase Bank, NA (JP Morgan) serves as the master custodian for the Systems. The master custodian holds most cash and securities for the Systems, except in cases where investment in a partnership, commingled account, or unique asset class makes it impossible to do so. The Systems thoroughly evaluate the structure of all investments and their custody arrangements. JP Morgan

is responsible for providing the official book of record for investment performance reporting and accounting, and serves as an additional layer of risk control in safekeeping the Systems' assets.

### **Investment Objective**

Based on the long-term investment returns available from a well-diversified, prudently invested portfolio, the Board has adopted an objective to achieve a **total nominal investment return of 7.5% with a real rate of return of at least 5.25% per annum over time.**<sup>2</sup>

The Board of Trustees revised the long-term investment return objective to 7.5% effective for fiscal year 2019 investment performance. The investment objective was previously 8.0% effective from 1980 through fiscal year 2016, 7.75% effective for fiscal year 2017, and 7.60% effective for fiscal year 2018.

In order to achieve the investment objective, the Systems have developed a portfolio that is prudently invested across a broad array of assets that reflects the long-term nature of the Systems' pension obligations. The principles of diversification, risk control and competitive rates of return provide the framework for selecting an asset allocation that is expected, over longer periods of time and in the aggregate, to give the Systems the most competitive long-term return within a prudent level of risk.

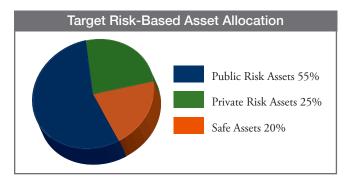

### **Understanding Risk**

Selection of an appropriate asset allocation is one of the most important decisions made by a retirement plan. Within that asset allocation, it is important to not only consider the expected investment return, but also to understand the risks. The importance of risk consideration for institutional investors is critical to long-term success. To that end, the Systems employ an effective and intuitive risk-based approach to setting and reporting the asset allocation decision. The Systems developed a risk-based asset allocation to clearly define the prudent risks taken within its investment portfolios. The Systems consider a variety of risks including, but not limited to, liquidity risk, volatility, tail risk (the possibility that an investment will move much more than expected) and the ability to meet the Systems' assumed rate of return when structuring the portfolio.

<sup>&</sup>lt;sup>2</sup> The real rate of return is the rate by which the long-term total return exceeds the long-term inflation rate. The Board of Trustees shall employ an actuarial consultant for purposes of determining the inflation rate to be used in calculating the pension obligations. The assumed inflation rate as of June 30, 2019 was 2.25% per annum.

#### **INVESTMENT SECTION**

This analysis results in an asset allocation to Public Risk Assets, Safe Assets and Private Risk Assets. Within each risk allocation, the Systems' investment portfolio includes long-term commitments to specific asset programs. The target risk-based asset allocation is illustrated in the pie chart below. The Board of Trustees increased the Private Risk Assets target in 2016 by 5% and proportionately decreased the Public Risk Assets target. These changes are discussed further in the following Asset Allocation section.

#### **Asset Allocation**

The asset allocation decision is generally regarded as the most important decision in the investment management process since it is crucial to achieving the long-term objectives established by the Board. In that light, it is the Board's responsibility to determine the appropriate policy asset allocation based upon several criteria with input and guidance from internal staff and Verus. These criteria are as follows:

- 1. The expected rate of return for each asset classification;
- The expected risk of each asset classification (expressed as the standard deviation of the rate of return);
- 3. The correlation of returns between asset types;
- The investment objectives and risk constraints of the Systems (including, but not limited to, liquidity needs and the expected time horizon);
- The funded ratio and cash flow requirements for PSRS and PEERS; and
- 6. The impact of the Systems' return volatility on the contribution rate.

The Board of Trustees amended the long-term target asset allocation at the June 2016 Board of Trustees meeting. The allocation to each investment program considers both the risk tolerance of the Systems and the long-term return objective. The new long-term target asset allocation is expected to maintain similar levels of total portfolio risk while allowing for more efficient investment returns. However, given the nature of investing in Private Risk assets, it is expected to take several years to implement. Implementation will be achieved over a number of years through a disciplined investment approach. The policy benchmarks will change over time as the Systems make meaningful progress to the new long-term targets. The changes to the asset allocation are as follows: Public Risk Assets decreased 5% and Private Risk Assets increased 5%. Within Public Risk Assets, Public Credit decreased from 12% to 7%. Within Private Risk Assets, Private Equity increased from 10.5% to 12%, Real Estate increased from 7.5% to 9% and Private Credit increased from 2% to 4%.

The following chart details the long-term target and interim target asset allocations for fiscal year 2019. The interim policy allocations have been established to reflect the continued funding of Private Risk Assets and progress towards the Systems' long-term asset allocation objective. For performance measurement purposes, the interim policy will serve as the basis for establishing the Total Fund policy benchmark until the on-going process of funding Private Risk investments is meaningfully complete.

Target Asset Allocation and Policy Ranges					
	Fiscal Year 2	2019 Interim	As Amend	ed in 2016	
Investment Type	Long-Term Target	Policy Ranges	Long-Term Target	Policy Ranges	
Public Risk Asset Programs					
U.S. Public Equity	27.00%	16% - 48%	27.00%	16% - 48%	
Public Credit	12.00%	0% - 20%	7.00%	0% - 20%	
Hedged Assets	6.00%	0% - 25%	6.00%	0% - 25%	
Non-U.S. Public Equity	15.00%	8% - 28%	15.00%	8% - 28%	
Total Public Risk Assets	60.00%	35% - 75%	55.00%	35% - 75%	
Safe Assets Programs					
U.S. Treasuries	16.00%	0% - 40%	16.00%	0% - 40%	
U.S. TIPS	4.00%	0% - 40%	4.00%	0% - 40%	
Cash & Cash Equivalents	0.00%	0% - 10%	0.00%	0% - 10%	
Total Safe Assets	20.00%	10% - 40%	20.00%	10% - 40%	
Private Risk Asset Programs					
Private Equity	10.50%	4% - 14%	12.00%	4% - 15%	
Private Real Estate	7.50%	4% - 10%	9.00%	4% - 12%	
Private Credit	2.00%	0% - 7%	4.00%	0% - 8%	
Total Private Risk Assets	20.00%	5% - 25%	25.00%	10% - 30%	
Total Fund	100.0%		100.0%		

The Board recognizes the cyclical nature of the investment markets and it has allowed the internal staff to capitalize upon opportunities by changing the allocation of each asset class or sub-asset class within broad strategic bands or policy ranges (as indicated in the previous table). The flexibility given to the internal staff in establishing the strategic mix provides opportunities for the Systems to take advantage of changing market conditions. To ensure appropriate controls, the Director, CIO and Verus must unanimously agree upon all material strategic changes prior to implementation.

# Performance Objectives and Monitoring Process

Generating a total nominal rate of return net of expenses of at least 7.5% and a real rate of return net of expenses of at least 5.25% per annum is an important consideration in the asset allocation decision and the primary performance objective for the Systems over long periods of time. The need for a long-term focus is necessary to preclude the temptation to overreact to events in the financial markets that have no relevance to long-term asset/liability management of the Systems. The resulting dilemma is the conflicting requirement to

evaluate investment policy implementation over shorter time periods while maintaining a long-term focus on meeting the return objectives. In order to determine if the Systems' short-term and long-term objectives are being achieved, the Board evaluates performance relative to policy and strategic benchmarks. The policy benchmarks allow the Systems to be judged by performance relative to a defined set of broad market indices (i.e., the Systems' long-term asset allocation objective). The strategic benchmarks allow the Board to consider the additional value generated from the latitude given to the internal staff to alter the asset class or sub-asset class allocations.

#### **Policy Decisions**

The value added through policy decisions is measured by the difference between the policy benchmark return and the actuarial required rate of return objective (defined as Real Return Objective + Inflation). A policy benchmark return greater than the actuarial required rate of return reflects value added. A policy benchmark return less than the actuarial required rate of return reflects losses or shortfalls in performance in funding the liabilities of the Systems. These policy decisions are measured over long periods of time.

#### Strategy Decisions

Strategy decisions are asset class or sub-asset class asset allocation choices made by the internal staff to deviate from the policy benchmark weights, with approval from Verus and the Director that the proposed material deviation is in compliance with the Board's investment policy. The value added through these decisions to overweight and/or underweight these sub-asset classes is measured by the difference between the strategic benchmark return and the policy benchmark return. This difference captures the value added by internal staff through asset class or sub-asset class strategic decisions relative to the Board's broad policy allocation decisions. A strategic benchmark return greater than the policy benchmark return reflects value added through the allocation decisions. A strategic benchmark return less than the policy benchmark return reflects losses to the fund's performance based upon strategy decisions.

#### Implementation Decisions

Implementation decisions are manager selection choices made by the internal staff with the approval of a consultant(s) and the Director. The value added through these manager selection decisions is measured by the difference between the actual portfolio return and the strategic benchmark return. An actual portfolio return greater than the strategic benchmark return reflects value added through these manager selection decisions. An actual portfolio return less than the strategic benchmark return reflects losses to the fund's performance based upon implementation decisions.

#### Risk Controls

The Board recognizes that even though the Systems' investments are subject to short-term volatility, it is critical that a long-term investment focus be maintained. Given the importance of the broad asset allocation decision to the Systems' long-term investment success, internal staff is required to conduct an asset allocation/liability study at least every five years to examine the appropriate long-term investment strategies for the Systems. The most recent asset/liability study was conducted in fiscal year 2016 and the next study is scheduled for 2020. In addition, the CIO must annually evaluate the asset allocation mix and any strategic allocation of the portfolio and provide a report to the Board on the results of that evaluation. This ongoing review of the asset allocation process helps to ensure the asset allocation is being monitored and modified as needed to meet the financial obligations of the Systems.

## **Total Fund Review**

The Systems' total invested assets were \$45.3 billion as of June 30, 2019. There has been a long-term growth in assets since the inception of PSRS in 1946 and PEERS in 1965, as shown in the graph above.

#### Investment Performance<sup>3</sup>

The Systems earned an investment return of 7.0% for fiscal year 2019 (6.9% net of all investment expenses and fees) with an ending market value of invested assets at \$45.3 billion. The Systems' well-structured investment portfolio added approximately \$2.9 billion in investment earnings to the growth of assets during the year.

As illustrated in the table below, all asset classes produced positive returns for the year. Private Risk Assets produced the strongest returns for the year as Private Equity performed especially well returning 15.4%. Public Risk Assets and Safe Assets also did well overall for the year driven by positive returns from both equity markets and fixed income markets with U.S. Public Equities returning 7.4% and U.S. Treasuries returning 7.3%. Each of these asset classes strongly contributed to the Systems' investment return of 7.0% for the year.

<sup>\*</sup>Investment returns were prepared using a time-weighted rate of return based on market values.

<sup>\*\*</sup>The Board of Trustees revised the long-term investment return objective from 7.6% to 7.5% effective for fiscal year 2019 investment performance. The extended time periods reflect the blended returns of the historical actuarial required rates of return.

## Investment Performance Relative to Benchmarks

The Board has established a long-term objective (actuarial required rate of return) to achieve a total investment return of at least 7.5% per year and a real rate of return of at least 5.25% per year. As discussed in the Investment Objective section, the long-term objective was revised to 7.5% effective for fiscal year 2019. The fiscal year 2019 total plan return of 7.0% fell short of the long-term objective. However, over long periods of time, PSRS and PEERS continue to produce investment returns that meet or exceed the Systems' objective. The annualized investment return for the Systems is 8.3% (8.1% net of all investment expenses and fees) over the last 30 years. The reduction in the long-term objective are based on capital market expectations and the belief that expected investment returns going forward will be lower than historical returns.

As previously discussed, in order to determine if the Systems' short-term and long-term objectives are being achieved, the Board utilizes three benchmarks by which the Systems' progress may be judged: (1) performance relative to a **policy benchmark** (defined set of broad market indices that reflects the Systems' long-term asset allocation, or market beta), (2) performance relative to a **strategic benchmark** which indicates value added by the internal staff, and, to a lesser extent, (3) performance relative to other public pension systems and their investment managers as a reference point of oversight.

The internal staff presents to the Board a detailed attribution of the total fund performance at the end of each fiscal year. Value is added over and above expected market returns if the strategic benchmark exceeds the policy benchmark (i.e., the internal staff made positive strategic decisions) and/or if the actual total fund return exceeds the strategic benchmark. The Statistical Performance section on the following page shows that for

all extended time periods the total fund return exceeded the strategic benchmark and the strategic benchmark has either met or exceeded the policy benchmark demonstrating added value by Internal Staff through strategic asset allocation decisions and implementation decisions.

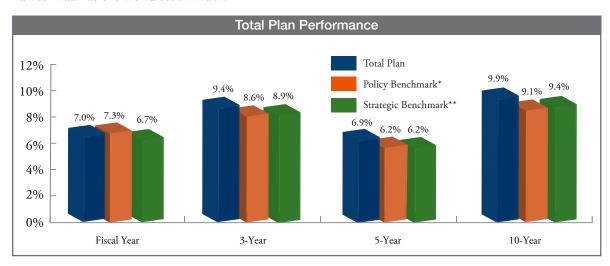

The fiscal year 2019 return of 7.0% underperformed the policy benchmark return of 7.3% by 30 basis points. However, the total fund return has exceeded the policy benchmark in seven of the last ten fiscal years, an indication that internal staff and active investment management have added value to the Systems. Over the past five years, the total fund return has exceeded the policy benchmark by 73 basis points, on an annualized basis, resulting in over \$1.3 billion in excess performance (net of all investment expenses and fees) to the Systems.

The Systems' utilize the Trust Universe Comparison Services (TUCS) to compare the total return and risk levels of the Systems relative to other public pension funds with assets in excess of \$1 billion. As the chart on page 68 indicates, the total fund return for the one-year, five-year and ten-year time periods exceeded the median return of other large public funds while the three-year return was equal to the public fund median return. The systems have taken substantially less risk than comparable funds during all time periods yet have consistently provided higher investment returns.

#### Statistical Performance

One of the primary investment objectives of the Systems is to achieve returns similar to the market but at lower risk or volatility levels. To that end, internal staff monitors a number of quantitative risk statistics related to the total investment portfolio as well as individual composites. The following table indicates that the Systems have taken less risk than the policy benchmark (as measured by standard deviation) over all time periods while achieving higher returns, thereby indicating strong risk-adjusted performance.

**Beta** measures the volatility, or systematic risk, of a security or portfolio in comparison to the market as a whole. If a portfolio has a beta of 1.0, it indicates that the portfolio moves in unison with the market. The Systems' portfolios have a beta of less than 1.0 relative to the policy benchmark, indicating less market volatility. The Systems' beta relative to the all country world stock index (MSCI ACWI net Index) is approximately 0.50. This signifies that the Systems' portfolio moves up or down approximately half as much as the world stock index.

The Total Plan Strategic Benchmark changes monthly based on the actual asset allocation at the end of the previous month.

The following chart shows the relationship between market value returns, the actuarially assumed rate of return and the utilization of an actuarial asset valuation method of smoothed assets. To reduce volatility in employer and employee contribution rates, a common actuarial practice of "asset smoothing" is utilized. The application of this practice results in full recognition of returns at the actuarial assumed rate and recognizes any annual excess or deficiency relative to the assumed rate over a period of five years.

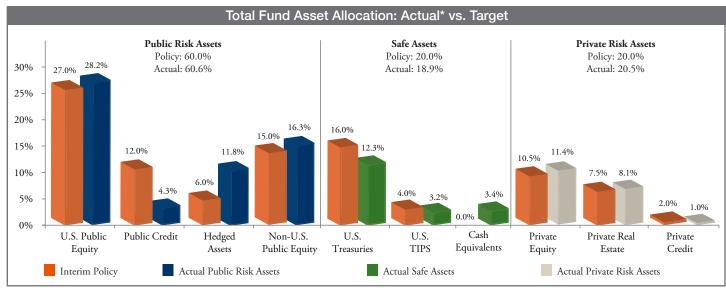

- \*The Actual Rate of Return (market return) consists of all investment gains and losses (net of investment expenses) on the fair market value of assets each year.
- \*\*The Actuarial Assumed Rate of Return is the assumed rate of return on the actuarial value of assets and is used in establishing contribution rates and pension obligations, including the net pension liability.
- \*\*\*Investment earnings in excess or deficient of the assumed rate of return are smoothed over a 5-year period for actuarial funding purposes. Twenty percent of the excess or deficiency is recognized annually for a 5-year period. This calculation results in the Smoothed Rate of Return.

#### Asset Allocation: Actual Versus Target

The interim policy allocations have been established to reflect meaningful progress towards the new long-term targets and for policy benchmark weights, as discussed in the Investment Policy Summary: Asset Allocation section. Until meaningful progress is made, the interim target will reflect the prior long-term policy allocations.

For fiscal year 2019 the interim policy allocation was 60% Public Risk Assets, 20% Safe Assets and 20% Private Risk Assets. Within each broad policy target, the Board has established sub-asset class targets. For example, as the chart below indicates, the target allocation to U.S. Public Equity was 27% as of June 30, 2019.

As illustrated in the chart, internal staff utilized the flexibility built into the investment policy to strategically overweight or underweight certain asset classes throughout the year. Strategic decisions within the Public Risk Assets program included an overweight to U.S. equities and Non-U.S. equities which provided meaningful returns to the Systems in fiscal year 2019.

\*Total Plan assets include 0.2% invested in an operating cash account that is not reflected in the chart above.

### Public Risk Assets Summary

As of June 30, 2019, Public Risk assets had a fair value of approximately \$27.5 billion, representing 60.6% of total plan assets.

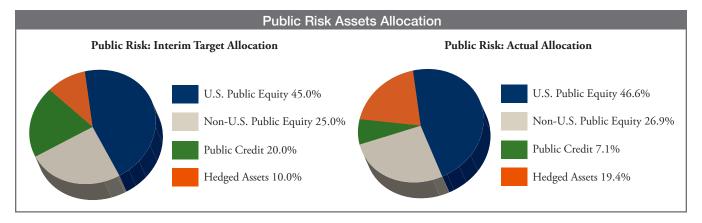

#### **Investment Program Description**

The Board of Trustees has adopted an asset allocation policy that includes a significant allocation to Public Risk Assets. The four programs within the Public Risk Asset composite are U.S. Public Equity, Public Credit, Hedged Assets and Non-U.S. Public Equity. Each program within the Public Risk allocation is a separate multi-manager composite that is treated generally as a single portfolio. Each program serves a specific and distinct role within the overall Public Risk composite and also within the overall total plan allocation. Over time, the Public Risk composite and its sub-components serve as an effective and efficient vehicle to supply the underlying beta exposure to a portfolio of global risk assets required by the Systems' asset allocation policy, while providing the opportunity to achieve excess returns above that of a passive benchmark through the prudent combination of passive investment vehicles and a wide range of active investment strategies.

#### Structure

As of June 30, 2019, 46.6% of the Systems' Public Risk assets were invested in the U.S. Public Equity program, 26.9% in the Non-U.S. Public Equity program, 7.1% in the Public Credit program and 19.4% in the Hedged Assets program. Each of these programs is discussed in more detail on the following pages.

The internal staff decreased the total plan's overweight to Public Risk assets during the year. The interim target allocation for Public Risk assets during fiscal year 2019 was 60.0% and the Systems' allocation at the end of the fiscal year was 60.6%, down from the prior year overweight of 63.4%. Internal staff strategically rebalanced from Public Risk assets during fiscal year 2019. Within the Public Risk assets composite, internal staff continued to overweight U.S. Public Equity, Non-U.S. Public Equity, and Hedged Assets while increasing an underweight to Public Credit throughout the fiscal year.

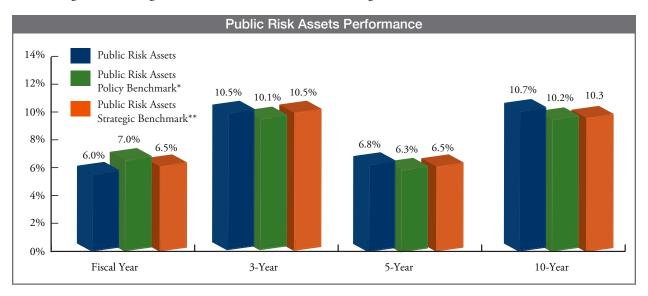

#### Market Overview

Financial markets performed well overall for fiscal year 2019 however there was significant volatility from economic and geopolitical uncertainty throughout the year. The Russell 3000 Index (broad measure of the U.S. stock market) was up 9.0% for the year and the MSCI ACWI ex-USA Index (broad measure of the international stock markets) increased 1.3%. Bond markets performed very well from declining interest rates resulting in an 8.2% return for the Public Credit benchmark (Bloomberg Barclays U.S. Intermediate Credit Index).

#### Performance

The total return for the Systems' Public Risk portfolio was 6.0% which underperformed the policy benchmark by 100 basis points. However, as shown in the table and graph below, the Systems' Public Risk composite returns have outperformed the benchmark over the extended time periods. The positive performance of the portfolio relative to the policy benchmark indicates substantial value added by the internal staff through both strategic asset allocation decisions and manager selection decisions.

Public Risk Assets Statistical Performance					
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year	
Annualized Return	6.0%	10.5%	6.8%	10.7%	
Annualized Policy Benchmark Return*	7.0%	10.1%	6.3%	10.2%	
Annualized Strategic Benchmark Return**	6.5%	10.5%	6.5%	10.3%	
Excess Return	-1.0%	0.4%	0.5%	0.5%	
Annualized Standard Deviation of Composite	13.3%	8.6%	8.7%	10.0%	
Annualized Standard Deviation of Policy Benchmark*	13.7%	8.8%	9.0%	10.2%	
Beta to Policy Benchmark*	0.98	0.97	0.96	0.98	
Beta to MSCI ACWI net Index	0.77	0.75	0.73	0.73	

<sup>\*</sup>The Public Risk Assets Policy Benchmark is composed as follows: 47.5% Russell 3000 Index, 27.5% MSCI ACWI ex-USA net Index, 25.0% Bloomberg Barclays U.S. Intermediate Credit Index.

The table indicates that the Systems have taken less risk relative to the policy benchmark (as measured by standard deviation) while achieving higher returns over the longer-term time periods, thereby indicating strong risk-adjusted performance. Additionally, the Systems' portfolios have a beta of less than 1.0 relative to the policy benchmark, indicating less market risk.

<sup>\*\*</sup> The Public Risk Assets Strategic Benchmark changes monthly based on the actual asset allocation at the end of the previous month.

## U.S. Public Equity Program Summary

As of June 30, 2019, the U.S. Public Equity assets had a fair value of approximately \$12.8 billion, representing 28.2% of total plan assets.

#### **Investment Program Description**

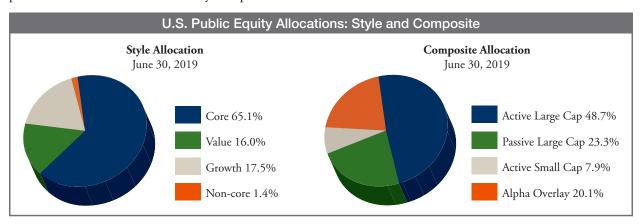

U.S. Public Equity is comprised of the Large-Cap, Small-Cap and Alpha Overlay programs which seek to provide long-term capital appreciation and dividend income in excess of inflation through the investment in domestic equity securities. Returns above a purely passive investment benchmark are targeted through the use of a wide variety of active investment strategies that may employ exposure to both equity securities and other types of investments. The primary *beta* exposure is achieved through investments in passive investment vehicles (including derivatives), traditional long-only active domestic equity management, and active long/ short approaches. *Alpha* (or, excess returns above a passive alternative) is expected to be achieved through traditional long-only active domestic equity management, active long/short approaches and alpha overlay strategies (described in greater detail at the end of this section).

#### Structure

As of June 30, 2019, 23.3% of the U.S. Public Equity composite was passively managed. The remainder of the portfolio was actively managed and diversified across a broad array of capitalization ranges and investment styles, including the Small-Cap and the Alpha Overlay program. Both programs represent multi-manager pools of assets managed within the overall U.S. Public Equity structure. The Small-Cap program encompasses small capitalization assets. The Alpha Overlay composite focuses on the separation of returns into alpha and beta, and encompasses alternative equity mandates including hedge fund portfolios.

Exposure to the various segments of the domestic equity market (i.e., growth-oriented, value-oriented, and core) and to the approved investment strategy types are achieved through the identification, selection and ongoing management of SEC-registered investment advisors qualified to serve as fiduciaries to the Systems.

The pie charts below depict the U.S. Public Equity portfolio by presenting the current style structure of the portfolio as well as the allocation by composite and market sector.

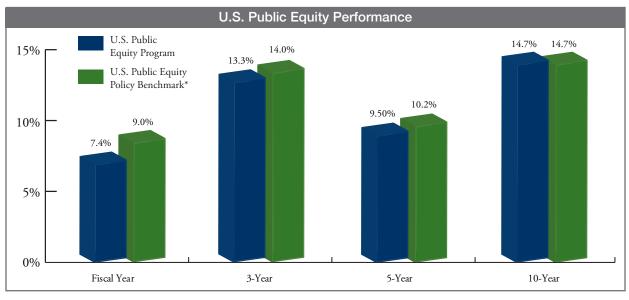

#### Market Overview

The U.S. equity markets performed well overall for fiscal year 2019 despite significant volatility throughout the year. For the year, large cap stocks performed especially well in comparison to small cap stocks while growth styles outperformed value styles. The comprehensive measure of the U.S. stock market (Russell 3000 Index) increased 9.0% while large-cap stocks (Russell 1000) increased 10.0% and small-cap stocks (Russell 2000 Index) decreased 3.3% for the year. Large-cap growth stocks (Russell 1000 Growth Index) outperformed large-cap value stocks (Russell 1000 Value Index) with a return of 11.6% compared to 8.5% while small-cap growth stocks (Russell 2000 Growth Index) outperformed small cap value stocks (Russell 2000 Value Index) with a return of -0.5% compared to -6.2%.

#### Performance

The total return for the U.S. Public Equity program was 7.4% compared to the benchmark return of 9.0% for the fiscal year ended June 30, 2019. Within the U.S. Public Equity program, the Large-Cap program returned 8.3%, Alpha Overlay returned 9.5% and the Small-Cap program returned -4.0% for the year.

As indicated in the table and graph, the U.S. Public Equity portfolio has produced strong absolute returns for all reported time periods. Over longer periods of time, the Systems' U.S. Public Equity portfolio is designed to deliver approximately 50-100 basis points of excess return through a combination of active and passive investment strategies.

U.S. Public Equity Statistical Performance				
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year
U.S. Public Equity Return	7.4%	13.3%	9.5%	14.7%
Annualized Policy Benchmark Return*	9.0%	14.0%	10.2%	14.7%

#### **Investment Advisors**

As of June 30, 2019, the Systems had contracts with 18 external investment advisors who managed 27 portfolios that comprised 79.9% of the U.S. Public Equity portfolio. The remaining 20.1% of the portfolio was in the Alpha Overlay program described in the next section. The Systems repositioned the Large-Cap program during the year by terminating two mandates and adding new mandates with Coatue Long Only Partners, Davis Advisors, Grantham, Mayo, Van Otterloo & Co., Rock Springs Capital, Russell Investments, and Select Equity Group. The Systems repositioned the Small-Cap program during the year by terminating two mandates and adding new mandates with Martingale Asset Management, NISA Investment Advisors, Russell Investments, and Systematic Financial Management.

## Alpha Overlay Program Summary

As of June 30, 2019, the Alpha Overlay allocation had a fair value of approximately \$2.6 billion, representing 5.6% of total plan assets.

#### **Investment Program Description**

The Alpha Overlay portfolio resides within the U.S. Large-Cap Equity program. The Alpha Overlay portfolio has been constructed to assist in meeting the long-term goals established for the overall U.S. Large-Cap Equity allocation. Specifically, Alpha Overlay provides broad exposure to large-cap U.S. stocks using S&P 500 total return swaps, while the returns of a select portfolio of hedge fund strategies provides the opportunity to earn excess returns above the passive S&P 500 Index. By combining the market exposure obtained through the S&P 500 total return swaps with the diversified exposures to investment strategies focused on alpha generation, the combined portfolio is constructed and managed to produce a return stream with volatility and beta characteristics similar to the passive S&P 500 Index, while generating excess returns (or alpha) of approximately 200-250 basis points over longer periods of time.

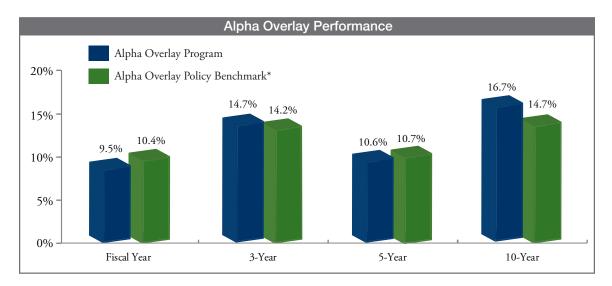

#### Structure

As of June 30, 2019, 20.0% of the Alpha Overlay composite assets were passively managed by NISA Investment Advisors using S&P 500 total return swaps to attain equitization. An additional 73.3% of the portfolio was actively managed across a diversified range of multi-strategy and market neutral hedge fund mandates. The remaining 6.7% of the portfolio was actively managed by Zevenbergen Capital in a long-only mandate. The chart below displays the specific investment advisor exposure within the composite as of June 30, 2019.

Total		\$ 2,572,603,136	5.6%		

#### Performance

The fiscal year 2019 return for the Alpha Overlay program was 9.5% underperforming the benchmark return of 10.4% by 90 basis points. As shown in the table and graph below, the Alpha Overlay composite has produced significant long-term absolute and relative returns while maintaining a risk profile (standard deviation and beta) lower than the benchmark.

Alpha Overlay Statistical Performance

## Non-U.S. Public Equity Program Summary

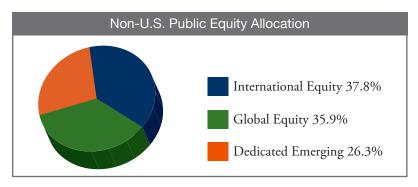

As of June 30, 2019, the Non-U.S. Public Equity assets had a fair value of approximately \$7.4 billion, representing 16.3% of total plan assets.

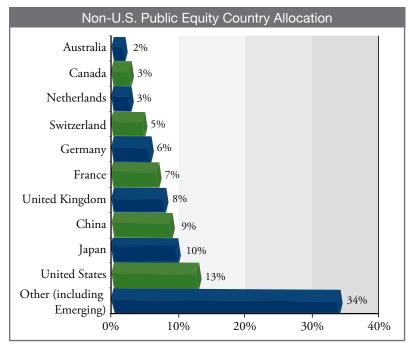

#### **Investment Program Description**

The Non-U.S. Public Equity program provides long-term capital appreciation and dividend income in excess of inflation through exposure to public equity securities on a global basis. Specific investment strategies approved for the Non-U.S. Public Equity program include passive investment vehicles, traditional long-only active equity management and active long/short approaches. Exposure to the various segments of the global equity market (i.e., U.S., developed non-U.S., emerging, growth-oriented, value-oriented, and core) and to the approved investment strategy types are achieved through the identification, selection and on-going management of SEC-registered investment advisors qualified to serve as fiduciaries to the Systems. The Non-U.S. Public Equity portfolios provide an element of diversification relative to the domestic equity portfolios. Currency is an aspect of international investing that can impact the performance and volatility of the asset class over the short-term. However, over the long-term, the effect from currency is expected to be neutral.

#### Structure

As of June 30, 2019, 6.0% of the Non-U.S. Public Equity composite was passively managed. The remainder of the portfolio was actively managed and diversified across capitalization ranges, styles and a number of developed and emerging market countries. The bar graph displays the specific country exposure within the composite while the pie chart indicates broader exposure by investment mandate.

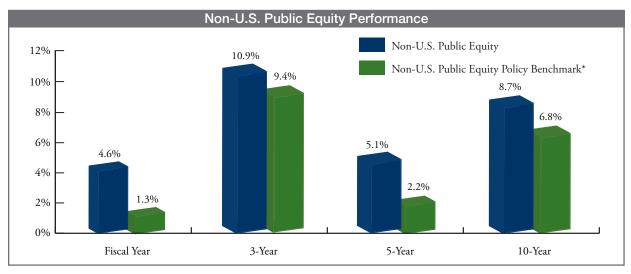

#### Market Overview

Stock markets throughout the world experienced significant volatility in fiscal year 2019 including a sharp sell-off in the 4th quarter of calendar year 2018 followed by a strong rebound in the 1st quarter of calendar year 2019. For example, the MSCI World net Index dropped by 13.4% in the 4th quarter of calendar year 2018 followed by an increase of 12.5% for the 1st quarter of calendar year 2019. Overall for the fiscal year ended June 30, 2019 equity markets were positive. Global stocks (MSCI World net Index) increased 6.3% outperforming international markets (MSCI EAFE net Index) increasing 1.1% and emerging markets (MSCI EM net Index) increasing 1.2%.

#### Performance

The total return for the Non-U.S. Public Equity program was 4.6% compared to the benchmark return of 1.3% for the fiscal year ended June 30, 2019. As shown in the table and graph below, the Systems' Non-U.S. Public Equity composite returns substantially outperformed the benchmark in all time periods. Over long periods of time, the Systems' Non-U.S. Public Equity program is designed to deliver approximately 100-150 basis points of excess returns through a combination of active and passive investment strategies. The long-term excess returns have exceeded these expectations.

Non-U.S. Public Equity Statistical Performance					
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year	
Annualized Non-U.S. Public Equity Return	4.6%	10.9%	5.1%	8.7%

## Public Credit Program Summary

As of June 30, 2019, the Public Credit assets had a fair value of approximately \$2.0 billion, representing 4.3% of total plan assets.

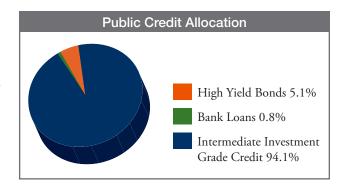

#### **Investment Program Description**

The Public Credit program is designed to provide a source of income and capital appreciation for the Systems while creating substantial diversification to the total plan with a low correlation to other asset classes. Most securities in this program exhibit high liquidity. Specific investments can include investment grade corporate securities, below investment grade debt instruments, distressed debt securities, convertible bonds, bank loans, agencies, mortgage-backed securities, asset-backed securities, and interest rate sensitive securities (including those issued or guaranteed by the United States government or its agencies). Investments in this program may include debt of both U.S. and non-U.S. issuers.

The performance objective for the Public Credit program is to exceed the returns of the investment grade credit markets through the use of a wide variety of active management approaches while incurring a level of risk that is generally consistent with the policy benchmark.

#### Structure

As of June 30, 2019, the Public Credit composite was actively managed and diversified across high quality corporate bonds and high yield bonds. The Systems' internal staff has built a diversified Public Credit portfolio with a base of high-quality corporate bonds. The following pie chart presents the strategy allocation of the Systems' Public Credit assets as of June 30, 2019.

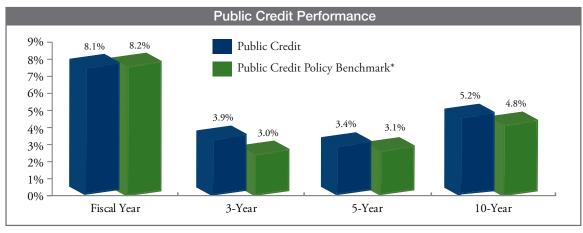

#### Market Overview

Credit markets performed very well during the year as a result of a decline in yields across the major fixed income segments. During the year, investment grade credit and high yield bonds outperformed Treasuries as the yield on the 10-year Treasury decreased to 2.0% on June 30, 2019 from 2.9% on June 30, 2018. Investment grade credit corporate bonds (Bloomberg Barclays U.S. Intermediate Credit Index) increased by 8.2% and a broader measure of the U.S. bond market (Bloomberg Barclays U.S. Aggregate Index) increased by 7.9% for the year. High yield, or lower quality bonds (ICE BofAML U.S. High Yield Master II Index) increased 7.6% for the year and global bonds (Bloomberg Barclays Global Agg. Ex-US Index) increased 4.1%.

#### Performance

The Public Credit program produced strong absolute returns for fiscal year 2019. The fiscal year return of 8.1% was below the benchmark return of 8.2% by 10 basis points as a result of the program's lower duration floating rate structure. As indicated in the table and graph, the Public Credit portfolio has produced moderate relative returns for the extended time periods. Over long periods of time, the Systems' Public Credit program is designed to deliver approximately 50-100 basis points of excess return through a combination of active and passive strategies.

Public Credit Statistical Performance							
Portfolio Characteristics Fiscal Year 3-Year 5-Year 10-Year							
Annualized Public Credit Return	8.1%	3.9%	3.4%	5.2%			
Annualized Policy Benchmark Return*	8.2%	3.0%	3.1%	4.8%			
Excess Return	-0.1%	0.9%	0.3%	0.4%

# Hedged Assets Program Summary

As of June 30, 2019, the Hedged Assets portfolio had a fair value of approximately \$5.3 billion, representing 11.8% of total plan assets.

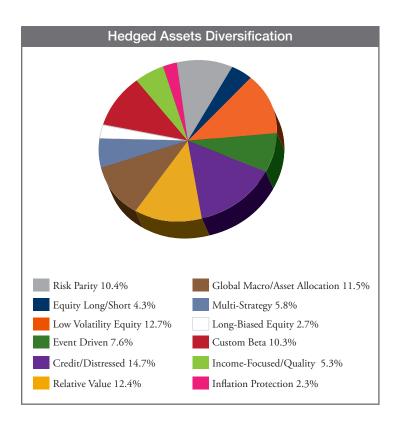

#### **Investment Program Description**

The Hedged Assets program's objective is to provide diversification to the total portfolio and reduce volatility within the Public Risk composite. The purpose of this program is to enhance the overall risk/return profile of the Public Risk composite through the inclusion of specialized investment strategies that typically generate returns in a different fashion (i.e., absent a high correlation to equities or bonds). These strategies may utilize leverage as allowed within their governing documents. The returns from these strategies have historically had a low-to-moderate correlation with the traditional equity markets, thus providing diversification benefits in addition to portfolio return enhancement. These strategies seek to control risks and maintain a focus on absolute returns. The inherent nature of these vehicles to serve as a "hedge" provides for the expectation that the program will lag the equity market during times when equities are performing above the long-term averages. However, when equities are performing below the long-term averages, the program would be expected to outperform the equity market. In addition, managers within this asset class have historically possessed significantly lower volatility relative to traditional equity managers.

#### Structure

The Systems have retained Albourne America, LLC (Albourne) as its hedged asset consultant. Albourne is an independent global advisory firm with a significant focus on hedge funds. The Systems utilize direct investments into hedge funds as opposed to incorporating fund-offunds. The Systems' internal staff believes the benefits of direct investments, including lower fees, customized portfolio exposures, direct access to manager knowledge, and higher levels of transparency outweighed the benefit of quicker implementation offered by fund-of-funds.

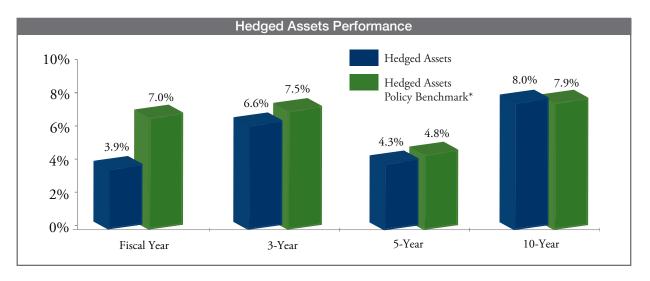

The following chart indicates the strategy diversification of the Hedged Assets program as of June 30, 2019. The Systems manage the Hedged Assets portfolio to a blended benchmark of 25% Russell 3000 Index, 25% MSCI ACWI ex-USA net Index, and 50% Bloomberg Barclays U.S. Intermediate Credit Index.

#### Performance

The total annualized return on the Systems' Hedged Assets portfolio was 3.9%, compared to the benchmark return of 7.0% for the fiscal year ended June 30, 2019.

Over the past ten years, the Hedged Assets program has slightly outperformed its policy benchmark of 7.9%. The performance relative to the policy benchmark is particularly significant given the strong performance of equities over this time period. The Russell 3000 and S&P 500 Indexes were both up an annualized 14.7% over the past ten years and the MSCI ACWI net Index was up an annualized 10.2%. As discussed previously, the hedging characteristics of the Hedged Assets program provide for the expectation that its performance will lag equity markets and/or its policy benchmark during periods of higher-than-normal equity returns. The Hedged Assets program is expected to outperform in more normal and down markets. As the table indicates, the longer-term performance was accomplished by assuming less than one-half of the volatility of the all country world stock index and achieving a beta of approximately 0.40 to the index, signifying that the Systems' portfolio moves up or down less than half as much as the world stock index.

Hedged Assets Statistical Performance						
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year		
Annualized Hedged Assets Return	3.9%	6.6%	4.3%	8.0%

## Safe Assets Summary

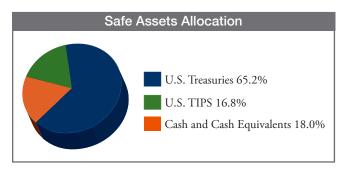

As of June 30, 2019, the Safe Assets had a fair value of approximately \$8.6 billion, representing 18.9% of total plan assets.

#### **Investment Program Description**

The Safe Assets program is intended to act as a source of safety and income for the Systems. The program is designed to create substantial diversification to the total portfolio and reduce volatility through low correlation to other asset classes. Specifically, the Safe Assets portfolio should provide asset protection at the total fund level in periods of economic stress.

#### Structure

As of June 30, 2019, NISA Investment Advisors was the only external investment manager within the Safe Assets program. Additionally, the Safe Assets program includes an FDIC insured interest-bearing account with a competitive yield at J.P. Morgan. The assets held within the program exhibit high liquidity and safety. The pie chart below depicts the Safe Assets program by showing the composite allocations as of June 30, 2019.

The Systems' slightly increased its allocation to Safe Assets from 18.3% as of June 30, 2018 to 18.9% as of June 30, 2019.

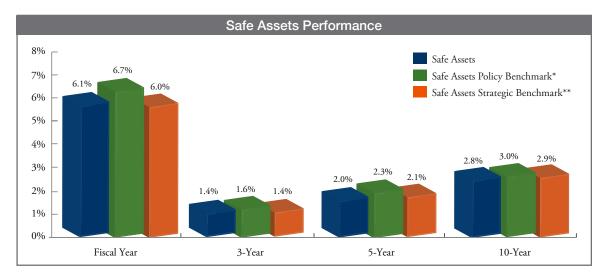

#### Market Overview

The Treasury markets produced very strong returns for year as the yield on the 10-year Treasury decreased to 2.0% on June 30, 2019 from 2.9% on June 30, 2018. Treasury yields ended the year lower across the curve as investors sought lower risk assets and the Federal Reserve signaled a willingness to be accommodative with future rate cuts. The decrease in interest rates throughout the year positively impacted the price of Treasuries. The comprehensive measure of the U.S. Treasuries market (Bloomberg Barclays U.S. Treasuries Index) increased 7.2% while the TIPS market (Bloomberg Barclays U.S. TIPS 1-10 Year) increased 4.7% for the year.

#### Performance

The total return for Safe Assets portfolio was 6.1% producing a strong absolute return for the fiscal year ended June 30, 2019. The portfolio underperformed the Safe Assets benchmark for the year by 60 basis points as a result of the lower duration allocations to cash and cash equivalents within the portfolio.

The absolute return of the Safe Assets portfolio is relatively modest over longer time periods. However, the Safe Assets portfolio continues to provide asset protection at the total fund level in periods of economic stress and ultimate liquidity to the Systems. An allocation to Safe Assets allows the Systems to accept market risk in other portions of the total fund portfolio.

Safe Assets Statistical Performance							
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year			
Annualized Safe Assets Return	6.1%	1.4%	2.0%	2.8%			
Annualized Policy Benchmark Return*	6.7%	1.6%	2.3%	3.0%			
Annualized Strategic Benchmark Return**	6.0%	1.4%	2.1%	2.9%			
Excess Return	-0.6%	-0.2%	-0.3%	-0.2%			
Annualized Standard Deviation of Composite	2.9%	2.7%	2.7%	2.8%			
Annualized Standard Deviation of Policy Benchmark*	3.5%	3.0%	3.0%	3.0%			
Beta to Policy Benchmark*	0.84	0.89	0.90	0.92			
Beta to MSCI ACWI net Index	-0.04	-0.03	-0.05	-0.06			

<sup>\*</sup>The Safe Assets Policy Benchmark is composed as follows: 80.0% Bloomberg Barclays U.S. Treasury Index and 20.0% Bloomberg Barclays U.S. TIPS 1-10 Yrs. Index.

The Systems have specifically taken less risk compared to the policy benchmark due to the inclusion of the cash and cash equivalents portfolios. Additionally, the Safe Assets program has a beta slightly less than 1.0 relative to the policy benchmark over all time periods, indicating less market volatility. Most importantly, the Safe Asset portfolio exhibits a beta of approximately zero relative to the all country world stock index (MSCI ACWI net Index) over longer time periods, indicating no correlation to risk assets. These statistics support one of the primary objectives of Safe Assets: diversification from other risk assets in the total fund.

<sup>\*\*</sup>The Safe Assets Strategic Benchmark changes monthly based on the actual asset allocation at the end of the previous month.

#### **Statistics**

The following table displays the statistical characteristics of the Systems' Safe Assets program as of June 30, 2019 with comparisons shown to the Bloomberg Barclays U.S. Treasury Index. Additionally, the top ten Safe Asset holdings as of June 30, 2019 are shown in the table below the characteristics.

Total		\$ 8,551,019,271	18.9%		

## Private Risk Assets Summary

As of June 30, 2019, the Private Risk assets had a fair value of approximately \$9.2 billion, representing 20.3% of total plan assets.

#### **Investment Program Description**

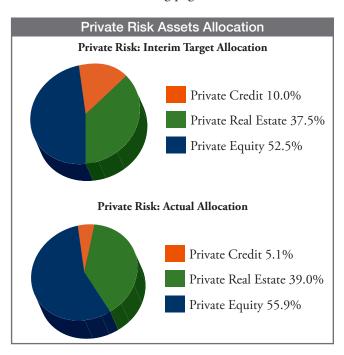

The allocation to Private Risk investments is viewed as a separate asset class for inclusion in the Systems' overall investment portfolios. The process of building the Systems' Private Risk program and fully funding the target allocation is expected to occur over a period of several years. Additional new investments will be necessary beyond the funding period in order to maintain the long-term target allocation. The three programs within the Private Risk Assets composite are Private Equity, Private Real Estate and Private Credit. Each program within the Private Risk allocation is a separate multi-manager composite that is treated generally as a single portfolio. Each program serves a specific and distinct role within the overall Private Risk composite and also within the overall Total Plan allocation. Over time, the Private Risk composite serves as a long-term vehicle to supply the underlying beta exposure to a portfolio of private assets.

Investments in Private Risk Assets differ substantially from the Systems' public markets asset classes (Public Risk Assets and Safe Assets) in part because they are typically very long-term in nature, not publicly traded, relatively illiquid and offer the potential for substantially higher returns (along with a commensurate level of risk). The illiquid nature of Private Risk Assets can result from the form of the asset or security itself, or it can be a function of the investment structure being utilized (e.g., a limited partnership).

Due to the fact that Private Risk Assets are not publicly traded, pricing and performance measurements prior to the realization of gains are less reliable than in the traditional publicly traded asset classes. The Systems continually monitor the valuation policies and procedures utilized for such investments.

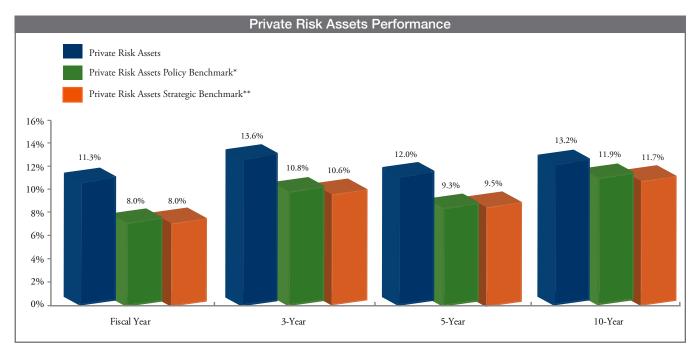

#### Structure

As of June 30, 2019, 55.9% of Private Risk Assets were invested in the Private Equity program, 39.0% in the Private Real Estate program, and 5.1% in the Private Credit program. Each of these programs is discussed in more detail on the following pages.

#### Performance

The total return for the Private Risk portfolio was 11.3%, compared to the policy benchmark return of 8.0% for the fiscal year ended June 30, 2019. The pricing and performance methodology utilized for private assets can provide for significant performance variances over short time periods. For instance, the Systems utilize a liquid benchmark (Russell 3000 Index) to measure an illiquid (private equity) asset class. Thus, there will be significant performance differences over short time periods in volatile markets. Due to the long term nature of Private Risk assets, the performance can be more appropriately judged over a longer timeframe. As the table below indicates, the Private Risk portfolio has produced excellent absolute and relative returns over all time periods. The ten-year return exceeded the benchmark by 130 basis points. These excess returns are net of fees and expenses.

Private Risk Assets Statistical Performance							
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year			
Annualized Private Risk Assets Return	11.3%	13.6%	12.0%	13.2%			
Annualized Policy Benchmark Return*	8.0%	10.8%	9.3%	11.9%			
Annualized Strategic Benchmark Return**	8.0%	10.6%	9.5%	11.7%			
Excess Return	3.3%	2.8%	2.7%	1.3%			

<sup>\*</sup>The Private Risk Assets Policy Benchmark is composed as follows: 52.5% Russell 3000 Index, 37.5% NFI-ODCE Index and 10.0% ICE BofAML U.S. High Yield Master II Index.

<sup>\*\*</sup> The Private Risk Assets Strategic Benchmark changes monthly based on the actual asset allocation at the end of the previous month.

## Private Equity Program Summary

As of June 30, 2019, the Private Equity assets had a fair value of approximately \$5.2 billion, representing 11.4% of total plan assets.

#### **Investment Program Description**

The Private Equity asset class is comprised of investment opportunities not typically included within the public equity and fixed income markets. Private Equity investments provide financing for start-up companies, private middle market companies, firms in financial distress and public and non-public firms seeking buyout financing. Private Equity investments can be classified into three basic sub-asset class categories:

- Venture Capital,
- Buyouts, and
- Debt-Related.

Investments in the sub-asset classes can be made in the U.S. or foreign countries. In total, the allocation to Non-U.S. Private Equity investments will not exceed 40.0% of the overall Private Equity target allocation. The risks associated with Private Equity will be viewed both in isolation and within the context of the entire fund.

In January 2014, the Board of Trustees approved the development and implementation of a Private Equity Co-Investment Program. The Co-Investment Program is expected to further advance the goals and objectives of the overall Private Equity Program by obtaining additional exposure to underlying portfolio company investments through direct equity investments made on a side-by-side basis with private equity funds where the Systems have an existing relationship. Co-investments serve to increase exposure to the private equity asset class with little or no additional fees and/or performance carry paid to the underlying private equity partnerships. The objective of the Co-Investment Program is to leverage existing, high-quality relationships with private equity managers in order to increase commitments to the asset class in a format that does not materially increase overall risk, while simultaneously helping to lower fees and performance carry.

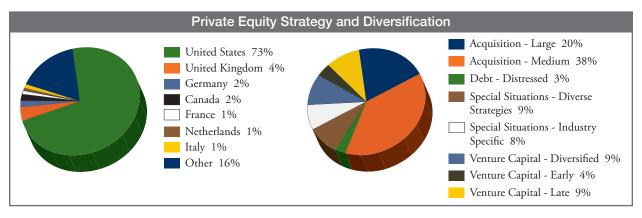

#### Structure

As of June 30, 2019, Private Equity assets committed\* for investment were \$11.6 billion. The fair value of funds that had been drawn down and actually invested as of June 30, 2019 was approximately \$5.2 billion, representing 11.4% of total plan assets. The Systems private equity investment commitments that have not yet been funded were approximately \$4.7 billion as of June 30, 2019.

The objective for the Systems' allocation to Private Equity is to achieve returns that are higher than those attainable in the public equity markets with the added benefit of diversification. The long-term target allocation to Private Equity is 12.0%. However, as of June 30, 2019, the actual allocation for the Systems was 11.4% because the long-term and illiquid nature of the private equity asset class dictates that capital must be invested at a measured pace. In addition, private equity investments have made record distributions in recent years. Pathway Capital Management has been retained by the Systems to provide private equity investment management services through three structures; a discretionary fundof-funds relationship, an advisory relationship and a co-investment program. Additionally, the Systems have invested in private equity secondary funds and also utilize Albourne America, LLC to provide private equity advisory services.

The following pie charts show the diversification (utilizing the market value of invested assets) of the Systems' Private Equity holdings as of June 30, 2019 from both strategy and country perspectives.

<sup>\*</sup> Committed capital reflects the total amount of capital that the Systems are legally obligated to supply to the partnerships and funds as the capital is needed to invest in underlying holdings. Fair value reflects capital that has actually been drawn and invested by the partnerships and funds.

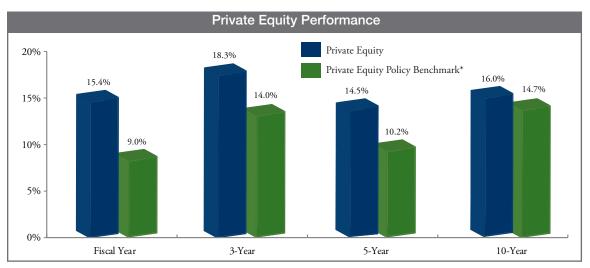

#### Market Overview

The Private Equity program had another excellent year producing the strongest absolute returns across all the Systems' asset classes. Despite the volatility in the public equity markets and heightened global macroeconomic uncertainty, private equity firms continued to have success. The private equity markets were driven by steady GDP growth, accommodative capital markets, and historic deal multiples and capital fundraising activity.

#### Performance

The total return for the Private Equity program was 15.4%, compared to the benchmark return of 9.0% for the fiscal year ended June 30, 2019. While short-term returns are not overly insightful for the Private Equity program in comparison to its benchmark, the one-year return exceeded the benchmark by 640 basis points. The private equity benchmark utilizes a liquid public equity index (Russell 3000 Index) to measure an illiquid (private equity) asset class. As such, there could be significant performance differences over short time periods in volatile markets. Due to the long term nature of the asset class, the performance of a private equity portfolio can be more appropriately judged over a longer timeframe. As the table below indicates, the Private Equity portfolio has produced excellent absolute and relative returns over all time periods. The ten-year return exceeded the benchmark by 130 basis points. These excess returns are net of fees and expenses.

Private Equity Statistical Performance							
Portfolio Characteristics Fiscal Year 3-Year 5-Year 10-							
Annualized Private Equity Return	15.4%	18.3%	14.5%	16.0%			
Annualized Policy Benchmark Return*	9.0%	14.0%	10.2%	14.7%			
Excess Return	6.4%	4.3%	4.3%	1.3%			

<sup>\*</sup>The Private Equity Policy Benchmark is the Russell 3000 Index.

#### **Investment Advisors**

As of June 30, 2019, the Systems were invested in 162 separate partnerships with 69 firms within the Private Equity asset class. In fiscal year 2019 the Systems committed to 26 new partnerships for \$2.5 billion. Additionally, the Systems received total distributions from the private equity partnerships of approximately \$897 million in fiscal year 2019.

<sup>\*</sup>Fair values are reported by the Systems' Private Equity advisors. Fair values reflect the most current net asset values. In instances where the most current net asset values were not as of June 30, 2019, the net asset values utilized were cash flow adjusted through June 30, 2019.

# Private Credit Program Summary

As of June 30, 2019, the Private Credit assets had a fair value of approximately \$465 million, representing 1.0% of total plan assets.

#### **Investment Program Description**

Investments in Private Credit are similar to Private Equity investments in that they are typically very long-term in nature, not publicly traded, relatively illiquid, and offer the potential for substantially higher returns (along with a commensurate level of risk). The Private Credit portfolio also differs from the Private Equity portfolio, and is a separate and distinct composite within Private Risk Assets. The Private Credit asset class is comprised primarily of debt-related investments that provide a current yield along with equity participation (usually warrants) referred to as an 'equity kicker.' Primary strategies are distressed debt, bankruptcy restructurings, mezzanine debt, bank loans and other credit-driven or debt-related investment strategies. Investments can be made in the U.S. or foreign countries. In total, the allocation to Non-U.S. Private Credit investments will not exceed 40% of the overall Private Credit target allocation. The risks associated with Private Credit will be viewed both in isolation and within the context of the entire fund.

#### Structure

As of June 30, 2019, Private Credit assets committed\* for investment were \$1.7 billion. The fair value of funds that have been drawn down and actually invested as of June 30, 2019 was approximately \$465 million, representing 1.0% of total assets. The Systems' private credit investment commitments that have not yet been funded were approximately \$709 million as of June 30, 2019.

The objective for the Systems' allocation to Private Credit is to achieve returns that are higher than those attainable in the public markets with the added benefit of diversification. The long-term and illiquid nature of the private credit asset class dictates that capital must be invested at a measured pace. Pathway Capital Management has

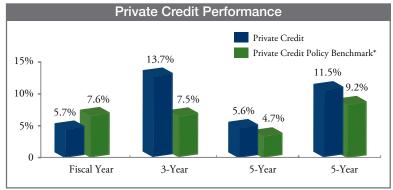

been retained by the Systems to provide private credit investment management services through two structures; a discretionary fund-of-funds relationship and an advisory relationship. Albourne America, LLC has also been retained to provide private credit advisory services.

#### Market Overview

The private credit markets generated strong returns in fiscal year 2019 as a result of accommodating debt market conditions, strong corporate earnings and low levels of distress. The high yield market as measured by the private credit benchmark, ICE BofAML U.S. High Yield Master II Index, returned 7.6% for the year compared to a 2.5% for fiscal year 2018.

#### Performance

The total return for the Private Credit program was 5.7% compared to the benchmark return of 7.6% for the fiscal year ended June 30, 2019. Short-term returns can be volatile for the Private Credit program in comparison to a public benchmark, as discussed previously; private assets are more appropriately evaluated over longer time frames. As the table below indicates, the Private Credit portfolio has produced very strong absolute and relative returns over all extended time periods. The ten-year return exceeded the benchmark by 230 basis points. These excess returns are net of fees and expenses.

Private Credit Statistical Performance						
Portfolio Characteristics Fiscal Year 3-Year 5-Year 10-						
Annualized Private Credit Return	5.7%	13.7%	5.6%	11.5%		
Annualized Policy Benchmark Return	* 7.6%	7.5%	4.7%	9.2%		
Excess Return	-1.9%	6.2%	0.9%	2.3%		

<sup>\*</sup>The Private Credit Policy Benchmark is the ICE BofAML U.S. High Yield Master II Index.

<sup>\*</sup> Committed capital reflects the total amount of capital that the Systems are legally obligated to supply to the partnerships and funds as the capital is needed to invest in underlying holdings. Fair value reflects capital that has actually been drawn and invested by the partnerships and funds.

#### **Investment Advisors**

As of June 30, 2019, the Systems were invested in 24 separate partnerships with 17 firms within the Private Credit asset class. Four new commitments were made to the Private Credit asset class during fiscal year 2019 for \$234 million. The Systems received total distributions from the private credit partnerships of approximately \$86 million in fiscal year 2019.

<sup>\*</sup>Fair values are reported by the Systems' Private Credit advisors. Fair values reflect the most current net asset values. In instances where the most current net asset values were not as of June 30, 2019, the net asset values utilized were cash flow adjusted through June 30, 2019.

## Private Real Estate Program Summary

As of June 30, 2019, the Private Real Estate assets had a fair value of approximately \$3.6 billion, representing 7.9% of total plan assets.

#### **Investment Program Description**

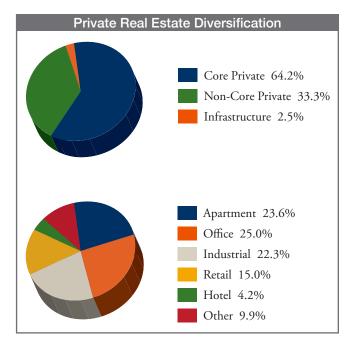

The Real Estate allocation is intended to provide exposure to a diversified portfolio of institutional quality private real estate investments that will provide meaningful, consistent returns and act as a hedge against inflation and as a diversifier to the overall investment portfolio. The specific objectives of the real estate allocation will be to optimize yield and return, preserve capital and enhance portfolio value across market cycles. The risks associated with Private Real Estate will be viewed both in isolation and within the context of the entire fund.

#### Structure

As of June 30, 2019, the Systems' Private Real Estate assets committed\* for investment were \$5.7 billion. The fair value of funds that had been drawn down and actually invested as of June 30, 2019 was approximately \$3.6 billion, representing 7.9% of total assets. The Systems' private real estate investment commitments that had not yet been funded were approximately \$1.8 billion as of June 30, 2019.

Within the overall Real Estate allocation, the Systems have established a 55% target allocation to non-core real estate (inclusive of infrastructure) and a 45% allocation to core private real estate. Non-core investments represent those properties and/or investment strategies that require specialized acquisition and management expertise or skill to mitigate the business and leasing risk that may be associated with individual investments. Non-core investments have greater associated risk compared to core investments. Core investments include existing, substantially leased income-producing properties located mainly in metropolitan areas that exhibit reasonable economic diversification and growth.

The following pie charts indicate the current allocation to real estate investment strategies utilizing the market value of the Systems' invested real estate assets and the diversification within the real estate composite by property type.

#### Market Overview

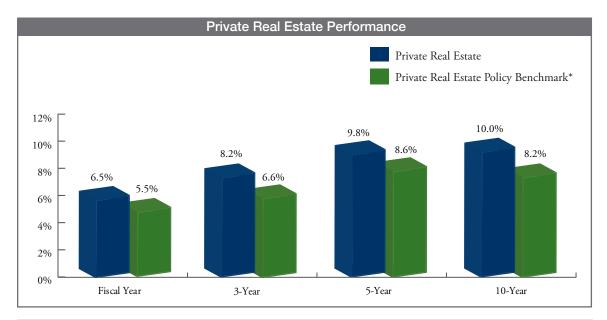

The Private Real Estate benchmark, the NCREIF Fund Index – Open Diversified Core Equity (NFI-ODCE), returned 5.5% for fiscal year 2019 compared to a 7.5% return for fiscal year 2018. The total return of 5.5% consisted of 4.1% income and 2.2% appreciation, gross of fees. The positive appreciation for the year indicates properties are still increasing in value but at a more moderated pace than recent years.

The Systems maintain a sizable allocation to high-quality, stabilized real estate assets (core) due to the secure income return. Additionally, the Systems have an allocation to non-core assets to enhance return to the overall real estate portfolio. The Systems will continue to focus real estate efforts going forward on investments that complement the existing portfolio.

<sup>\*</sup> Committed capital reflects the total amount of capital that the Systems are legally obligated to supply to the partnerships and funds as the capital is needed to invest in underlying holdings. Fair value reflects capital that has actually been drawn and invested by the partnerships and funds.

#### Performance

The total return for the Private Real Estate program was 6.5% compared to the benchmark return of 5.5% for the fiscal year ended June 30, 2019. The Systems' Private Real Estate program has produced very strong absolute and relative returns for all time periods as noted below. The ten-year return exceeded the benchmark by 180 basis points. These excess returns are net of fees and expenses.

Private Real Estate Statistical Performance							
Portfolio Characteristics Fiscal Year 3-Year 5-Year 10							
Annualized Private Real Estate Return	6.5%	8.2%	9.8%	10.0%			
Annualized Policy Benchmark Return*	5.5%	6.6%	8.6%	8.2%			
Excess Return	1.0%	1.6%	1.2%	1.8%			

<sup>\*</sup>Effective January 1, 2016 the Real Estate Policy Benchmark is the NCREIF Open End Diversified Core Equity Index (NFI-ODCE). The NCREIF Property Index is used for prior periods.

#### **Investment Advisors**

As of June 30, 2019, the Systems were invested in 66 separate partnerships with 32 firms within the Private Real Estate asset class. In fiscal year 2019 the Systems committed to nine new partnerships totaling \$852 million. Additionally, the Systems received total distributions from the real estate partnerships of approximately \$438 million during the year.

# Certification of Actuarial Results

November 13, 2019

Board of Trustees Public School Retirement System of Missouri Public Education Employee Retirement System of Missouri 3210 West Truman Boulevard Jefferson City, MO 65109

#### Re: Certification of Actuarial Results as of June 30, 2019

Dear Members of the Board:

At your request, we have performed actuarial valuations of the Public School Retirement System ("PSRS") and the Public Education Employee Retirement System ("PEERS") of Missouri as of June 30, 2019. An actuarial valuation of each System is performed annually for purposes of preparing the required accounting information under Governmental Accounting Standards and for purposes of determining the Actuarial Determined Contribution under the Plan's funding policy. Our reports have been prepared pursuant to an engagement letter between PSRS and PEERS of Missouri and PwC, and are intended solely for the use and benefits of PSRS and PEERS of Missouri and not for reliance by any other person.

The actuarial valuations are based upon:

- a. Benefit Provisions Our understanding of the benefit provisions in effect on the valuation date under Missouri Revised Statutes Chapter 169.
- b. Data Relative to the Members of the Systems Data for all members of each System as of June 30, 2019 was provided by PSRS and PEERS of Missouri staff ("staff"). PwC relied on the data provided. PwC reviewed the data for reasonableness relative to the prior year's data, but the data was not audited.
- c. Assets of the Fund The values of the trust fund assets as of June 30, 2019 for each System were also provided by the staff. An actuarial value of assets, with investment gains and losses relative to the assumed return recognized over five years, is used in the development of the contribution rates.
- d. Actuarial Cost Method The actuarial cost method utilized by each System for accounting purposes is the Entry Age Normal, Level Percent method, as required by GASB Statement No. 67. The system has elected to use the same cost method in the determination of the contribution rates for pre-funding the benefits. The objective of this method is to allocate the cost of benefits as a level percentage of pay over the entire career of each member. On a funding basis, any Unfunded Actuarial Accrued Liability ("UAAL") is separately financed as a level percentage of payroll over a fixed 30-year period, where a new 30-year amortization base is established for the gain or loss that occurred during the year prior to the valuation date.
- e. Actuarial Assumptions For the June 30, 2019 valuation, the actuarial assumptions were adopted by the Board pursuant to an experience study completed in June 2016. Since the last experience study, the investment return and COLA assumptions have been updated. For the June 30, 2017 valuations, the investment return assumption was lowered from 7.75% to 7.60% and the COLA assumption was increased based on changes to the Board's funding policy relating to COLAs. Both changes were adopted at the November 3, 2017 meeting. For the June 30, 2018 valuations, the investment return assumption was further lowered from 7.60% to 7.50%, as adopted by the Board at the October 29, 2018 meeting. There were no additional changes for the June 30, 2019 valuation.

For accounting purposes, the actuarial assumptions and methods used in this valuation were selected and approved by the Board and are in accordance with our understanding of GASB Statement No. 67.

For funding purposes, the actuarial assumptions and methods were selected and approved by the Board and are consistent with the funding policy adopted by the Board and summarized below. In general, the methods provide orderly funding of all benefits being accrued, as well as funding of any Unfunded Actuarial Accrued Liability over a period of thirty years. The smoothing method employed in determining the Actuarial Value of Assets may accelerate or lengthen the effective funding period, depending on whether gains or losses are experienced. In our opinion, the actuarial assumptions and methods are reasonable for purposes of the actuarial valuations and meet the parameters set by the Actuarial Standards of Practice.

In order to establish long-term, consistent methods for pre-funding the benefits of each System, the Board of Trustees has adopted a funding policy. The objective is to achieve a funded ratio of 100% over a closed 30-year period. For this purpose, the funded ratio is defined as the Actuarial Value of Assets divided by the Actuarial Accrued Liability determined under the Entry Age Normal Level Percent cost method and the actuarial assumptions adopted by the Board.

PricewaterhouseCoopers LLP, One North Wacker Drive Chicago, IL,60606 T: (312)298 2000, F: (312) 298 2001, www.pwc.com/us

# Certification of Actuarial Results, continued

The Board has identified the following principles to guide its funding policy:

- 1. Maintain adequate assets so that current plan assets plus future contributions and investment earnings should be sufficient to fund all benefits expected to be paid to members and their beneficiaries.
- Maintain stability of contribution rates, consistent with other funding objectives.
- 3. Maintain public policy goals of accountability and transparency. Each policy element is clear in intent and effect, and each should allow an assessment of whether, how, and when the funding requirements of the plan will be met.
- 4. Promote intergenerational equity. Each generation of members and employers should incur the cost of benefits for the employees who provide services to them, rather than deferring those costs to future members and employers.
- 5. Provide a reasonable margin for adverse experience to help offset risks.
- 6. Review the investment earnings assumption in conjunction with the periodic asset / liability study and in consideration of the Board's risk profile.
- 7. Review demographic and economic assumptions in conjunction with the periodic experience study performed by an actuary.
- 8. Continue progress of systematic reduction of the Unfunded Actuarial Accrued Liabilities (UAAL) while keeping the member and employer contribution rates at or near 14.5% of pay for PSRS and 6.86% of pay for PEERS, the contribution rates first paid during 2011-2012.

The actuarially determined contribution rates developed from the June 30, 2019 valuations reflect these principles.

We provide the information used by PSRS and PEERS of Missouri staff to prepare the following schedules and other data in this Actuarial Section:

- Schedules of Funding Progress
- Required Contribution Rate and Amortization of Unfunded Liability
- Reconciliation of Unfunded Actuarial Accrued Liability
- Solvency Tests
- Schedules of Active Member Valuation Data
- Schedules of Retirees and Beneficiaries Added to and Removed from Retirement Rolls

We also provide the information used by PSRS and PEERS of Missouri staff to prepare the following schedules and other data in the Financial Section:

- Sensitivity of the Net Pension Liabilities to Changes in the Discount Rate
- Schedules of Changes in the Employers' Net Pension Liability
- Schedules of Employers' Net Pension Liability
- Schedules of Employer Contributions

A range of results, different from those presented in this report could be considered reasonable. Future actuarial measurements may differ significantly from the current measurement presented in this report due to a number of factors including but not limited to: plan experience differing from that anticipated by the economic and demographic assumptions; increases or decreases expected as part of the natural operation of the methods used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); rounding conventions; and changes in plan provisions or applicable law. Due to the limited scope of this report, an analysis of the potential range of such future measurements has not been performed.

To the best of our knowledge, our actuarial reports are complete and accurate and have been prepared in accordance with generally accepted actuarial principles and practices and with the Actuarial Standards of Practice issued by the Actuarial Standards Board. Our calculations also reflect our understanding of the requirements of Missouri state law. The undersigned actuaries are members of the Society of Actuaries and other professional organizations, including the American Academy of Actuaries, and meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States relating to pension plans. There is no relationship between the PwC practitioners involved in this engagement and PSRS and PEERS of Missouri that may impair our objectivity.

We certify that the information presented herein is accurate and fairly portrays the actuarial position of the Plans administered by PSRS and PEERS of Missouri as of June 30, 2019 based on the underlying census data, asset information and selected assumptions and methods.

Sincerely,

Cindy Draturija Cindy Fraterrigo, FSA, EA, MAAA

Principal

Brandon Robertson, ASA, EA, MAAA

Director

# PSRS Summary Plan Description

The Public School Retirement System of Missouri (PSRS) became operative July 1, 1946. It was established by an Act of the Missouri Legislature and is governed by Chapter 169 of the Revised Statutes of Missouri. Its purpose is to provide benefits to members and their dependents at retirement or in the event of death or disability prior to retirement.

PSRS is a defined benefit plan funded on an actuarial reserve basis, which establishes the availability of funds to pay benefits as prescribed by law. The System is established as an independent trust fund and is not subject to direction by any state agency. Administrative expenses are paid entirely out of investment earnings.

Administration – The administration of PSRS is vested in a seven-member Board of Trustees, composed of three elected active PSRS members, one elected active Public Education Employee Retirement System of Missouri (PEERS) member, and three appointed trustees. The four elected trustees are selected by vote of the members and retirees of both Systems. Two are elected each even-numbered calendar year to serve four-year terms. The three appointed trustees, one of whom must be a PSRS or a PEERS retiree, are named by the governor to serve four-year terms. The appointed trustees must be residents of school districts included in the System but not employees of such districts nor state employees nor state elected officials.

The Board appoints an executive director who is responsible for employment of the retirement office staff, routine operation of the System, and acts as an advisor to the Board on all matters pertaining to the System.

Member Participation – PSRS membership is automatic for certificated, full-time employees of public school districts in Missouri (except the St. Louis city and the Kansas City school districts), public two-year colleges in Missouri, PSRS and certain statewide non-profit educational associations that have previously elected to join. Non-profit educational associations are no longer allowed to join the System. Certificated, part-time employees whose services would qualify them for membership in PEERS are contributing members of PSRS unless PEERS membership is elected. The vast majority of PSRS members are not covered by Social Security. However, there are a few exceptions

due to specific guidance from the Social Security Administration. Those members who are also covered by Social Security contribute to PSRS at two-thirds the rate of other members and receive two-thirds benefits.

Members working in covered employment are considered active members. Such members contribute 14.5% of total retirement salary to PSRS. The contributions are deducted and remitted by the employer and are credited by PSRS to individual member accounts. Since July 1, 1989, member contributions have been tax-deferred for federal and state income tax purposes under IRS 414(h) (2). Contributions are not considered income for such purposes until they are paid as a lump-sum refund or monthly benefits.

Interest at a rate set each year by the Board of Trustees is credited to individual member accounts each June 30 on the previous June 30 balance. The interest rate set annually by the board, was 2.0% on June 30, 2019. Since PSRS is a defined benefit plan, benefits are based upon the member's final average salary and years of service. The amount of interest credited to a member's account has no bearing on the monthly benefit amount payable at retirement.

In addition to service earned for covered employment, members may purchase service in various categories including several types of leave, out-of-state school service, other public and private employment, active U.S. military duty, and service under the federal Uniformed Services Employment and Re-Employment Rights Act of 1994 (USERRA).

Members who have contributions on deposit with PSRS but are not working in covered employment are considered inactive members.

Employer Participation – The employers served by PSRS withhold members' contributions from salary payments and contribute an amount equal to those contributions at a current rate of 14.5% of payroll. Employer contributions and investment earnings on those funds are placed by PSRS in a general reserve account to pay monthly benefits to retirees and to beneficiaries of deceased members. Employers are responsible for remitting contributions promptly and for furnishing contribution information and new membership information to PSRS. Employers also provide needed data when members apply for monthly benefits or for refunds upon termination of employment.

Survivor Benefits – The designated beneficiary of a member who dies before retirement is eligible for a lump-sum refund of the member's contributions and interest. If the beneficiary is an eligible dependent and the member dies while in covered employment with at least two years of service, or while eligible for disability retirement benefits, monthly survivor benefits based on a percentage of the member's salary for the last full year of covered service can be elected instead of a lump-sum refund. Monthly survivor benefits may also be payable to qualified dependents of an inactive member who has at least five years of service.

In lieu of a lump-sum refund or monthly survivor benefits, survivors with an insurable interest and beneficiaries of disability retirees may elect to receive monthly benefits under the Joint-and-Survivor 100% benefit plan. Such benefits are payable when the member would have been eligible for early or normal service retirement.

**Refund of Contributions** – Member contributions and interest are fully refundable upon termination of covered employment or death. All service and benefit rights are forfeited upon voluntary refund or automatic termination of membership.

A member may, upon returning to covered employment, reinstate the service forfeited through termination of a previous membership by repaying the money refunded plus interest.

**Membership Termination** – Membership is terminated by death, retirement, refund of contributions or absence from covered employment by a non-vested member for five consecutive school years.

**Disability Retirement Benefits** – Disability retirement benefits are payable to eligible members who have met service and eligibility requirements and who, because of permanent disability, are unable to earn a livelihood in any occupation. In most instances, the disability retirement benefit is calculated at 50% of the member's salary for the last full year of service.

**Service Retirement Benefits** – Service retirement benefits are payable to members who have terminated covered employment and have met certain eligibility requirements.

Benefit Formula – All service retirement benefits are based on a formula which multiplies final average salary by the applicable benefit factor, by the years of service and, in the case of early retirement, by an age-reduction factor. Final average salary is obtained by dividing the total salaries for the three highest consecutive years of service by 36 months to arrive at a monthly average; the applicable factor is determined by the type of retirement eligibility; total service is the amount accumulated at retirement for covered employment and purchased service; and the age-reduction factor, when applicable, is determined by the age at retirement.

Normal Retirement – A member may retire with benefits calculated under the standard (2.5%) benefit factor at age 60 with five years of service, at any age with 30 years of service, or when a combination of age and service equals 80 or more. Between July 1, 2001 and July 1, 2014, a member could retire with a 2.55% benefit factor with 31 or more years of service.

**Early Retirement** – A member may retire with benefits calculated under the standard (2.5%) formula with an age-reduction factor applied, at age 55 with five years of service or at any age with 25 years of service, as long as he or she does not qualify for Rule of 80.

A special provision allows members under age 55 with 25.0 to 29.9 years of service to retire with benefits calculated under a modified benefit factor ranging from 2.2% to 2.4% with no age-reduction factor applied.

Payment Options – A retiring member may choose to receive the maximum benefits payable under the Single Life benefit plan, or may elect to receive a reduced benefit under one of three Joint-and-Survivor benefit plans or under one of two Term-Certain benefit plans, to provide survivor benefit coverage in varying degrees after the retiree's death.

Certain benefit minimums apply to normal or early retirement with 15 or more years of service. The minimums for 15 but fewer than 25 years of service are reduced if a Joint-and-Survivor or a Term-Certain benefit plan is elected and/or if an age-reduction factor is applicable because of early retirement. The minimums for 25 or more years of service are reduced only if a Joint-and-Survivor or a Term-Certain benefit plan is selected.

The Partial Lump Sum Option (PLSO) is available to qualified members. This option allows qualified members to choose to have their lifetime monthly benefits actuarially reduced in exchange for the right to also receive a one-time, lump-sum payment at retirement.

**Cost-of-Living Adjustments** – Cost-of-living adjustments (COLAs) are provided beginning the second January after retirement to service and disability retirees, and to Joint-and-Survivor and Term-Certain beneficiaries of deceased retirees. Lifetime COLAs are limited to 80% of the original retirement benefit.

The Department of Labor Consumer Price Index for Urban Consumers (CPI-U) for the previous fiscal year is used as a guideline for the annual COLA which is set by the Board. By law, if the change in CPI-U is 2% or more, the COLA must be at least 2%, but no more than 5%. If the change in CPI-U is between 0% and 2%, the Board may grant a COLA of 0% to 5%. If the change in CPI-U is less than 0%, no increase can be given. If it is more than 5%, the Board is required to give a 5% increase. Under the funding policies adopted by the Board in November 2017. The following applies:

- If the June to June change in the CPI-U is less than 2% for consecutive one-year periods, a cost-of-living increase of 2% will be granted when the cumulative increase is equal to or greater than 2%, at which point the cumulative increase in the CPI-U will be reset to be based on the June value immediately preceding the January 1 at which the 2% cost-of-living increase is granted.
- If the June to June change in the CPI-U is greater than or equal to 2%, but less than 5%, a cost-of-living increase of 2% will be granted.
- If the June to June change in the CPI-U is greater than or equal to 5%, a cost-of-living increase of 5% will be granted.

Member Handbook – A *Member Handbook* containing detailed information concerning the retirement program is available on our website or can be obtained from the retirement office upon request.

# PEERS Summary Plan Description

The Public Education Employee Retirement System of Missouri (PEERS) was established by an Act of the Missouri Legislature to begin operations on November 1, 1965, and is governed by Chapter 169 of the Revised Statutes of Missouri. Its purpose is to provide benefits to members and their dependents at retirement or in the event of death or disability prior to retirement.

PEERS is a defined benefit plan funded on an actuarial reserve basis, which establishes the availability of funds to pay benefits as prescribed by law. The System is established as an independent trust fund and is not subject to direction by any state agency. Administrative expenses are paid entirely out of investment earnings.

**Administration** – The law provides that the responsibility for the operation and administration of the retirement system is vested in the Public School Retirement System of Missouri (PSRS) Board of Trustees sitting as the Board of Trustees for PEERS. The Board is comprised of three elected active PSRS members, one elected active PEERS member and three appointed trustees. The four elected trustees are selected by vote of the members and retirees of both Systems. Two are elected each even-numbered calendar year to serve four-year terms. The three appointed trustees, one of whom must be a PSRS or a PEERS retiree, are named by the governor to serve four-year terms. The appointed trustees must be residents of school districts included in the System but not employees of such districts nor state employees nor state elected officials.

The Board appoints an executive director who is responsible for employment of the retirement office staff, routine operation of the System, and acts as an advisor to the Board on all matters pertaining to the System.

Member Participation – PEERS membership is automatic, regardless of position, for all persons not covered by PSRS who are employed for 20 or more hours a week on a regular basis in a position that normally requires at least 600 hours during the school term by the public school districts in Missouri (except the St. Louis city and the Kansas City school districts), public two-year colleges in Missouri (except St. Louis Community College), PSRS and statewide non-profit educational associations that have elected to join.

Members working in covered employment are considered active members. Such members contribute 6.86% of their total retirement salary to PEERS. The contributions are deducted by the employer and are credited by PEERS to individual member accounts. PEERS members are also covered by Social Security.

PEERS membership can be elected by employees with Missouri educator certificates who work in any position for 17 or more hours weekly but less than full time; however, PSRS membership is automatic if a PEERS election is not made. The election to join PEERS must be filed with the Board within 90 days after entering first time, part-time employment.

Since July 1, 1989, member contributions have been tax-deferred for federal and state income tax purposes under IRC 414(h)(2). Contributions are not considered as income for federal or state income tax purposes until they are paid in a lump-sum refund or in monthly benefits.

Individual accounts are maintained for all PEERS members. Interest is credited each June 30 on the previous June 30 balance. The interest rate, set annually by the Board, was 2.0% on June 30, 2019. Since PEERS is a defined benefit plan, benefits are based upon the member's final average salary and years of service. The amount of interest credited to a member's account has no bearing on the monthly benefit amount payable at retirement.

In addition to service earned for covered employment, members may purchase service in various categories including several types of leave, out-of-state school service, other public and private employment, active U.S. military duty, and service under the federal Uniformed Services Employment and Re-employment Rights Act of 1994 (USERRA).

Members who have contributions on deposit with PEERS but are not currently working in covered employment are considered inactive members.

Employer Participation – The employers served by PEERS withhold members' contributions from salary payments and contribute an amount equal to employee contributions at a current rate of 6.86% of payroll. Employer contributions and investment earnings on those funds are placed in a general reserve account to pay monthly benefits to retirees and to beneficiaries of deceased members. It is the responsibility of the employers to remit contributions promptly and for furnishing contribution information and new membership information to PEERS. Employers also

provide needed data when members apply for benefits or refund of contributions upon termination of employment.

Survivor Benefits – When a member dies before retirement, the designated beneficiary becomes eligible for a lump-sum refund of the employee's contributions and interest. In lieu of a lump-sum refund, survivors with an insurable interest and beneficiaries of disability retirees may elect to receive monthly benefits under the Joint-and-Survivor 100% benefit plan. Such benefits are payable when the member would have been eligible for early or normal service retirement.

**Refund of Contributions** – Member contributions and interest are fully refundable upon termination of covered employment or death. All service and benefit rights are forfeited upon voluntary refund or automatic termination of membership.

A member may, upon returning to covered employment, reinstate the service forfeited through termination of a previous membership by repaying the money refunded plus interest.

**Membership Termination** – Membership is terminated by death, retirement, refund of contributions or absence from covered employment by a non-vested member for five consecutive school years.

**Disability Retirement Benefits** – Disability retirement benefits are payable to members who have met service and eligibility requirements and who, because of permanent disability, are unable to earn a livelihood in any occupation. The disability retirement benefit is calculated at 90% of the normal service retirement benefit.

**Service Retirement Benefits** – Service retirement benefits are payable to members who have terminated covered employment and who have met certain eligibility requirements.

Benefit Formula – All service retirement benefits are based on a formula which multiplies final average salary by the applicable benefit factor, by the years of service and, in the case of early retirement, by an age-reduction factor. Final average salary is obtained by dividing the total salaries for the three highest consecutive years of service by 36 months to arrive at a monthly average; the applicable factor is determined by the type of retirement eligibility; total service is the amount accumulated at retirement for covered employment and purchased service; and the age-reduction factor, when applicable, is determined by the age at retirement.

Because of the conversion of the System from a formula integrated with Social Security to the present basis, a special "frozen benefit" is in effect for certain members for service prior to July 1, 1973.

Normal Retirement – A member may retire with benefits calculated under the standard (1.61%) formula at age 60 with five years of service, at any age with at least 30 years of service, and at the point where the member's age plus service equals 80 or more (Rule of 80). A member may retire under the standard (1.61%) formula when the member qualifies for Rule of 80 or 30-and-Out and will receive an additional .8% multiplier until reaching minimum eligibility age for Social Security benefits (currently age 62).

**Early Retirement** – A member may retire with benefits calculated under the standard (1.61%) formula with an age-reduction factor applied at age 55 with five years of service, or at any age with 25 years of service, as long as he or she does not qualify for Rule of 80.

A special provision allows members under age 55 with 25.0 to 29.9 years of service to retire with benefits calculated under a modified benefit factor ranging from 1.51% to 1.59% with no age-reduction factor applied.

Payment Options – A retiring member may choose to receive the maximum benefits payable under the Single Life benefit plan, or may choose to receive a reduced benefit under one of three Joint-and-Survivor benefit plans or under one of two Term-Certain benefit plans, to provide survivor benefit coverage in varying degrees after the retiree's death.

Another option, the Accelerated Payment Plan (APP), allows members to receive a higher PEERS benefit prior to minimum Social Security eligibility age (currently age 62). When the minimum Social Security eligibility age is attained, the member's PEERS benefit is reduced and remains at a reduced level for the remainder of their retirement.

The Partial Lump Sum Option (PLSO) is available to qualified members. This option allows qualified members to choose to have their lifetime monthly benefits actuarially reduced in exchange for the right to also receive a one-time, lump-sum payment at retirement.

Cost-of-Living Adjustments – Cost-of-living adjustments (COLAs) are provided starting the fourth January after retirement to service and disability retirees, and to Joint-and-Survivor and Term-Certain beneficiaries of deceased retirees. Lifetime COLAs are limited to 80% of the original retirement benefit.

The Department of Labor Consumer Price Index for Urban Consumers (CPI-U) for the previous fiscal year is used as a guideline for the annual COLA which is set by the Board of Trustees. By law, if the change in CPI-U is 2% or more, the COLA must be at least 2%, but no more than 5%. If the change in CPI-U is between 0% and 2%, the Board may grant a COLA of 0% to 5%. If the change in CPI-U is less than 0%, no increase can be given. If it is more than 5%, the Board is required to give a 5% increase. Under the funding policies adopted by the Board in November 2017. The following applies:

- If the June to June change in the CPI-U is less than 2% for consecutive one-year periods, a cost-of-living increase of 2% will be granted when the cumulative increase is equal to or greater than 2%, at which point the cumulative increase in the CPI-U will be reset to be based on the June value immediately preceding the January 1 at which the 2% cost-of-living increase is granted.
- If the June to June change in the CPI-U is greater than or equal to 2%, but less than 5%, a cost-of-living increase of 2% will be granted.
- If the June to June change in the CPI-U is greater than or equal to 5%, a cost-of-living increase of 5% will be granted.

Member Handbook – A *Member Handbook* containing detailed information concerning the retirement program is available on our website or can be obtained from the retirement office upon request.

# PSRS and PEERS Summary of Actuarial Assumptions and Methods

The Board is responsible for the adoption of the Systems' Funding Policies and assumptions. A summary of the current Funding Policy is included in the Certification of Actuarial Results.

The actuarial assumptions and methods utilized for funding and financial report purposes differ slightly. The primary difference between the two methods is the fact that financial reporting requires the recognition of investment gains at market with no smoothing.

#### Inflation

Inflation is assumed to be 2.25% per annum (effective 6/30/16).

#### Payroll Growth

Total payroll growth for PSRS is assumed to be 2.75% per annum, consisting of 2.25% inflation, 0.25% real wage growth due to the inclusion of active health care costs in pension earnings, and 0.25% of real wage growth due to productivity (effective 6/30/16).

Total payroll growth for PEERS assumed to be 3.25% per annum, consisting of 2.25% inflation, 0.50% real wage growth due to the inclusion of active health care costs in pension earnings, and 0.50% of real wage growth due to productivity (effective 6/30/16).

#### Individual Salary Growth

#### PSRS

Individual salaries for PSRS are assumed to increase each year with inflation of 2.25%, real wage growth generated by the cost of active health care of 0.25% (since health care costs are included in pension earnings), real wage growth due to productivity of 0.25%, and additional real salary growth for merit, promotion, and seniority (effective 6/30/16).

				Merit,	Total Individua
Service	Inflation	Health Care Cost	Productivity	Promotion, Seniority	Salary Growth
0	2.25%	0.25%	0.25%	6.75%	9.50%
1	2.25%	0.25%	0.25%	3.25%	6.00%
2	2.25%	0.25%	0.25%	3.10%	5.85%
3	2.25%	0.25%	0.25%	2.95%	5.70%
4	2.25%	0.25%	0.25%	2.80%	5.55%
5	2.25%	0.25%	0.25%	2.65%	5.40%
6	2.25%	0.25%	0.25%	2.50%	5.25%
7	2.25%	0.25%	0.25%	2.35%	5.10%
8	2.25%	0.25%	0.25%	2.20%	4.95%
9	2.25%	0.25%	0.25%	2.05%	4.80%

#### Investment Return

It is assumed that investments of the Systems will return a yield of 7.50% per annum, net of system expenses (investment and administrative) (effective 6/30/18).

#### Cost-of-Living Adjustments

The long-term cost-of-living adjustment assumed in the valuation is 1.65% per year, based on the current policy of the Board. The Board policy is as follows:

- If the June to June change in the CPI-U is less than 2.00% for consecutive one-year periods, a cost-of-living increase of 2.00% will be granted when the cumulative increase is equal to or greater than 2.00%, at which point the cumulative increase in the CPI-U will be reset to be based on the June value immediately preceding the January 1 at which the 2.00% cost-of-living increase is granted.
- If the June to June change in the CPI-U is greater than or equal to 2.00%, but less than 5.00%, a cost-of-living increase of 2.00% will be granted.
- If the June to June change in the CPI-U is greater than or equal to 5.00%, a cost-of-living increase of 5.00% will be granted.

The actuarial assumption increases from 1.30% to 1.65% over seven years beginning January 1, 2021. The COLA applies to service retirements and beneficiary annuities. The COLA does not apply to the benefits for in-service death payable to spouses (where the spouse is over age 60), and does not apply to the spouse with children pre-retirement death benefit, the dependent children pre-retirement death benefit, or the dependent parent death benefit. The total lifetime COLA cannot exceed 80% of the original benefit. Future COLAs for current benefit recipients reflect actual cumulative adjustments granted at the time of valuation. (effective 6/30/17).

#### Mortality Rates

#### Active Member Mortality

#### **PSRS**

Mortality rates for PSRS active members are based on RP 2006 White Collar Employee Mortality Table, multiplied by an adjustment factor of 0.75 at all ages for both males and females, with static projection using the 2014 SSA Improvement Scale to 2028 (i.e. a 12-year projection from the date first implemented, the approximate duration of the total actuarial accrued liability). Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/16):

PSF	PSRS Active Member Mortality								
Age	Male	Female							
20	0.196	0.097							
30	0.228	0.123							
40	0.280	0.224							
50	0.851	0.666							
60	1.929	1.205							
70	6.434	3.579							

#### **PEERS**

Mortality rates for PEERS active members are based on the RP 2006 Total Dataset Employee Mortality Table, multiplied by an adjustment factor of 0.75 at all ages for both males and females, with static projection using the 2014 SSA Improvement Scale to 2028 (i.e. a 12-year projection from the date first implemented, the approximate duration of the total actuarial accrued liability). Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/16):

PEERS Active Member Mortality								
Age	Male	Female						
20	0.279	0.114						
30	0.325	0.146						
40	0.399	0.265						
50	1.214	0.789						
60	2.751	1.429						
70	8.672	4.156						

#### Service Retiree, Beneficiary and Survivor Mortality

#### **PSRS**

Mortality rates for PSRS non-disabled retirees and beneficiaries are based on the RP 2006 White Collar Mortality Table multiplied by the plan specific adjustment factors shown in the table below, with static projections using the 2014 SSA Improvement Scale to 2028 (i.e. a 12-year projection from the date first implemented, the approximate duration of the total actuarial accrued liability). (effective 6/30/16).

	PSRS Non-Disabled Retiree and Beneficiary Plan Specific Mortality Adjustment Factors							
Age	Male	Female						
<60	1.00	1.00						
60-74	0.89	0.67						
75-89	1.05	0.91						
>=90	1.05	1.16						

Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/16):

SRS Service Retiree, Beneficiary and Survivor Mortality							
Age	Male	Female					
40	0.373	0.298					
50	2.655	1.982					
60	3.639	2.034					
70	9.212	6.211					
80	34.813	25.742					
90	126.672	118.203					
100	314.507	310.679					
110	465.57	493.661					

#### **PEERS**

Mortality rates for PEERS non-disabled retirees and beneficiaries are based on the RP 2006 Total Dataset Mortality Table multiplied by the plan specific adjustment factors shown in the table below, with static projections using the 2014 SSA Improvement Scale to 2028 (i.e. a 12-year projection from the date first implemented, the approximate duration of the total actuarial accrued liability) (effective 6/30/16).

PEERS Non-Disabled Retiree and Beneficiary Plan Specific Mortality Adjustment Factors							
Age	Male	Female					
<60	1.00	1.00					
60-74	1.49	0.77					
75-89	1.27	1.03					
>=90	1.16	1.04					

Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/16):

Age	Male	Female
40	0.532	0.353
50	3.904	2.642
60	9.060	3.119
70	20.854	8.702
80	50.476	33.375
90	153.099	113.293
100	347.456	278.540
110	514.345	442.593

### Disability Retiree Mortality

Mortality rates for PSRS and PEERS disabled retirees are based on the RP 2006 Disabled Retiree Mortality Table, with static projections using the 2014 SSA Improvement Scale to 2028 (i.e. a 12-year projection from the date first implemented, the approximate duration of the total actuarial accrued liability) (effective 6/30/16).

Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/16):

PSRS an	PSRS and PEERS Disability Retiree Mortality								
Age	Male	Female							
40	9.317	4.862							
50	19.588	11.367							
60	20.817	13.263							
70	33.674	24.771							
80	68.090	56.760							
90	168.008	134.892							
100	311.674	275.075							
110	443.401	425.570							

#### Retirement Rates

Retirement is assumed in accordance with the following rates per 1,000 eligible members (effective 6/30/16):

				PS	RS Activ	e Member	Retireme	nt			
	Years of Service										
Age	<=20	21	22	23	24	25	26	27	28	29	>=30

#### Withdrawal Rates

Termination of membership prior to eligibility for retirement from all causes other than death, disability or retirement is assumed in accordance with the following illustrative rates per 1,000 members (effective 6/30/16):

PSRS Active Member Withdrawal							
Rate							
240.0							
115.0							
100.0							
80.0							
70.0							
60.0							
27.5							
15.0							
10.0							
0.0							

PEERS Active Member Withdrawal								
Years of Service	Rate							
0	350.0							
1	230.0							
2	180.0							
3	150.0							
4	125.0							
5	100.0							
10	55.0							
15	33.0							
20	18.0							
25+	0.0							

#### Refund of Contributions

Active members who terminate employment with less than five years of service and inactive members with less than five years of service are assumed to take an immediate refund of their contributions.

Active members who terminate employment with five or more years of service, but prior to satisfying the age and service requirements for service retirement, and inactive members with five or more years of service are assumed to select the option that has the greater present value between an immediate refund of their contributions and a life annuity deferred to their earliest retirement age (effective 6/30/16).

Active members who terminate employment with five or more years of service and satisfy the age and service requirements for service retirement upon termination, and inactive members with five or more years of service and currently eligible for service retirement are assumed to select an immediate life annuity (effective 6/30/16).

#### Disability Rates

Retirement for disability prior to age 60 is assumed in accordance with the following illustrative rates per 1,000 eligible members (effective 6/30/16):

PSRS Active Member Disability					
Age	Rates				
25	0.0017%				
30	0.0080%				
35	0.0220%				
40	0.0480%				
45	0.0780%				
50	0.1110%				
55	0.1460%				

PEERS Active Member Disability							
Age	Rates						
25	0.0017%						
30	0.0080%						
35	0.0016%						
40	0.0320%						
45	0.0640%						
50	0.1220%						
55	0.2100%						

#### Interest on Member Accounts

1.00% per annum (effective 6/30/10)

#### Service Purchases

A 1.00% load for PSRS and a 1.50% load for PEERS is added to the Normal Cost to account for anticipated losses resulting from service purchases and reinstatements (effective 6/30/16).

#### **Provisions for Expenses**

There is no specific provision for expenses. The implicit assumption is that administrative expenses are paid from investment income in excess of 7.5% per annum (effective 6/30/18).

#### **Dependent Assumptions**

(effective 6/30/16)

- Marriage Assumptions (Pre-retirement) 70% of male and female members are assumed to be married. Beneficiaries are assumed to be of the opposite sex from the member. Male spouses are assumed to be two years older than that of female spouses.
- **Beneficiary Assumptions (Post-retirement)** Retired members, regardless of gender, are assumed to be three years older than their joint annuitant.

#### Survivor Benefits (Pre-retirement PSRS Only)

All active members under age 50 are assumed to have two dependent children. Each child is assumed to receive payments of \$860 per month for 18 years if the member is under age 32, and grading down to zero years if the member is age 50 (effective 6/30/16).

#### Return of Unused Member Account Balance

A cash refund feature is included in the valuation of annuity benefits to reflect that cumulative annuity payments to members may not be less than the amount of contributions paid by the member (effective 6/30/16).

#### Actuarial Cost Method

The actuarial cost method is Entry Age Normal - Level Percent of Payroll.

The normal cost is calculated separately for each active member and is equal to the level percentage of payroll needed as an annual contribution from entry age to retirement age to fund projected benefits. The Actuarial Accrued Liability on any valuation date is the accumulated value of such normal costs from entry age to the valuation date (effective 1947).

#### Asset Valuation Method

The Actuarial Value of Assets is a smoothed value of assets. The actuarial value at June 30 of the prior year is projected by increasing the amount by 7.5% interest, adding contributions with 7.5% interest for half the year, and subtracting benefit payments for half the year. Twenty percent of the difference between the actual returns at market value for the year and expected return from the projection of the prior year actuarial value, along with corresponding amounts from each of the prior four years is added to the actuarial value. The Actuarial Value of Assets was reset to market value at June 30, 2003. The methodology remains unchanged (1994).

# Amortization of Unfunded Actuarial Accrued Liability

Gains and losses occurring from census experience different than assumed and assumption changes are amortized over a 30-year period as a level percent of payroll. A new gain or loss base is established each year based on the additional gain or loss during that year and that base is amortized over a new 30-year period. The purpose of the method is to give a smooth progression of the costs from year to year and, at the same time, provide for an orderly funding of the unfunded liabilities. Increases or decrease in the Actuarial Accrued Liability caused by changes in the benefit provisions are amortized over 20 years, as determined in the 2007 session of the Legislature.

The method for amortizing the unfunded Actuarial Accrued Liability was changed from a rolling 30-year method to the closed 30-year method described above effective June 30, 2011.

For accounting, gains and losses occurring form census experience different than assumed and assumption changes are amortized into expense over the average expected future service of all plan participants (active and inactives). Gains and losses occurring from investment experience different than assumed are amortized into expense over a five year period. The effect of plan changes on the plan liability are fully recognized in expense in the year in which they occur.

Note: Dates reflect the effective date as adopted by the Board of Trustees. The most recent assumption revisions were approved by the Board of Trustees at their October 2018 meeting. The revised assumptions were first used for the June 30, 2018 valuation.

# Statistical Summary

### **Benefit Recipients**

The largest percentage of the Systems' benefit recipients are service retirees. Service retirement benefits are payable to members who have met age and service requirements. The number of PSRS service retirees on the payment rolls increased by 1,572 from 55,930 at June 30, 2018 to 57,502 at June 30, 2019. The number of PEERS service retirees on the payment rolls increased by 1,372 from 27,575 at June 30, 2018 to 28,947 at June 30, 2019.

Disability benefits in PSRS and PEERS are paid to members who are unable to earn a livelihood due to permanent disability and who have met certain eligibility requirements. The number of PSRS disability retirees on the payment rolls increased by 29 from 991 at June 30, 2018 to 1,020 at June 30, 2019. The number of PEERS disability retirees on the payment rolls increased by 19 from 813 at June 30, 2018 to 832 at June 30, 2019.

In both PSRS and PEERS, beneficiary payments are available to survivors if the retiree elected this option. Three Joint-and-Survivor benefit plans and two Term-Certain benefit plans are available. In PSRS, survivor benefits are also available to designated beneficiaries of members who die before retirement.

The charts on page 124 detail the number of benefit recipients by type and monthly benefit amount for each System.

# **Pension Funding**

An unfunded actuarial accrued liability (UAAL) for pension benefits generally represents the difference between the present value of all benefits estimated to be payable to plan members as a result of their age, salary, and service through the valuation date and the actuarial value of plan assets available to pay those benefits. This amount changes over time as a result of changes in accrued benefits, pay levels, rates of return on investments, changes in actuarial assumptions, and changes in the demographics of the employee base. Each year an outside actuary performs a valuation to determine the present value of the benefits payable (actuarial accrued liability) and compares this to the assets available to arrive at the funded status of the Systems. The charts on page 132 show a comparison of the assets and liabilities of the Systems over time. At June 30, 2019, PSRS was 84.4% pre-funded and PEERS was 86.4% pre-funded. At June 30, 2018, PSRS was 84.0% pre-funded and PEERS was 86.1% pre-funded. Detailed information on actuarial assumptions, can be found in the Actuarial Section of this report.

# Changes in Net Assets

The charts on page 125 detail a 10-year history of the additions (revenue) and deductions (expenses) of the Systems.

Other charts in this section detail demographic information concerning our members and employers.

The data in this section was derived from internal sources and the annual actuarial valuation reports.
